Music Division,1992 **Waterstone's Guide to Books** ,1989 Measurement for the Social Sciences John R. Rossiter,2010-11-25 This book proposes a revolutionary new theory of construct measurement called C OAR SE for the social sciences The acronym is derived from the following key elements construct definition object representation attribute classification rater entity identification selection of item type enumeration and scoring The new theory is applicable to the design of measures of constructs in Management Marketing Information Systems Organizational Behavior Psychology Sociology C OAR SE is a rationally rather than empirically based theory and procedure It can be used for designing measures of the most complex and also the most basic constructs that we use in social science research C OAR SE is a radical alternative to the traditional empirically based psychometric approach and a considerable amount of the book's content is devoted to demonstrating why the psychometric approach does not produce valid measures The book argues that the psychometric approach has resulted in many misleading findings in the social sciences and has led to erroneous acceptance or rejection of many of our main theories and hypotheses and that the C OAR SE approach to measurement would correct this massive problem The main purpose of this book is to introduce and explain C OAR SE construct measurement theory in a way that will be understood by all social science researchers and that can be applied to designing new more valid measures Featuring numerous examples practical applications end of chapter questions and appendices the book will serve as an essential resource for students and professional researcher alike Reference Sources for Small and Medium-Sized Libraries Jack O'Gorman,2014-02-25 Focusing on new reference sources published since 2008 and reference titles that have retained their relevance this new edition brings O Gorman's complete and authoritative guide to the best reference sources for small and medium sized academic and public libraries fully up to date **British Catalogue of Music, 1957-1985** Michael D. Chapman,Elizabeth Robinson,1988 Global Mandatory Fair Use Tanya Aplin,Lionel Bently,2020-11-05 In a path breaking work Tanya Aplin and Lionel Bently make the case that the quotation exception in Article 10 of the Berne Convention constitutes a global mandatory fair use provision It is global they argue because of the reach of Berne qua Berne and qua TRIPS and its mandatory nature is apparent from the clear language of Article 10 and its travaux It relates to use that is not limited by type of work type of act or purpose and it is fair use because the work must be made available to the public with attribution and the use must be proportionate and consistent with fair practice By explaining the contours of global mandatory fair use and thus displacing the three step test as the dominant international copyright norm governing copyright exceptions this book creates new insights into how national exceptions should be framed and interpreted
