

The background of the entire cover is a deep space scene. It features a dark, star-filled sky with several colorful nebulae in shades of blue, green, and red. A bright, glowing star with a lens flare is positioned in the center-left. In the lower right, a portion of a planet's horizon is visible, showing a dark, silty surface. The title text is overlaid on this background.

The New Science Of Antimass:

The New Science of Antimass Eric Peterson, 2003-11

The New Science of the Ufo Kenneth W.

Behrendt, 2013-05-10 The New Science of the UFO now completes author and researcher Kenneth W Behrendts groundbreaking trilogy on the subject of UFOs It contains a complete scan of all 24 issues of a previously out of print privately published typescript UFO research journal titled Annals of Ufological Research Advances or AURA for short which was the basis for his first two volumes Secrets of UFO Technology and The How and Why of UFOs Practically every conceivable facet of the UFO enigma was explored in the pages of AURA at a level of scientific detail that was unprecedented in the field of ufology Those able to obtain some of the limited number of copies of each issue available to the public learned all about such exotic topics as the sources of the mysterious glows that envelope nocturnal UFOs why some malfunctioning UFOs must eject liquid metals in order to correct their propulsion system problems how alien crews tap our earthly electrical power grids to recharge their scout craft the nature of the mysterious angel hair and devil jelly residues left by hovering craft how alien paralysis weapons are used for their personal defense and how crews protect their mother ships from attack how alien telepathy works how the living space creatures known as zerooids can biologically duplicate UFO capabilities and much much more The material in AURA was intended for the most serious of ufologists seeking ultimate and satisfying answers to the mysteries that they were exploring Now for the first time in almost two decades these answers are again available for a new generation of researchers

Essays from the Edge of Science Kenneth W. Behrendt, 2015-04-29 Essays from the Edge of Science is author and researcher Kenneth W Behrendts latest contribution to the literature of the New Age It is an exciting and insightful analysis of various topics that takes the reader from the depths of our planets oceans to the farthest reaches of cosmic space and time while outlining what will most likely be accepted science by the end of this century Youll learn about the astonishing telepathic powers of the so called lower animals An entire chapter is devoted to the living subterrestrial creatures that inhabit the Earths crust and whose highly evolved paranormal powers are responsible for many of the events taking place in haunted houses The soon coming elimination of fossil fuels and their replacement by free energy devices that use the power of permanent magnets is discussed Even the nature of time as well as a means to travel through it is explored as the reader is taken on an imaginary ride aboard what could be the first truly functional time machine In a highly controversial chapter the author finally gives the real reason that our planets major governments dare not reveal what they know about the UFO phenomenon All this however is only a small sample of what awaits one in this incredible work This book is sure to fascinate the general reader who has always suspected that what we have been taught is real is in fact only a very small portion of a much larger and stranger reality Now that rarely seen hidden reality is exposed so that it can finally be a subject for serious scientific inquiry
