Budish, 2015-07-04 Excerpt from *The New Unionism in the Clothing Industry* Some readers of this book may miss emphasis on the names of important union officials such as Sidney Hillmann and Joseph Schlossberg of the Amalgamated Clothing Workers of America and Benjamin Schlesinger and Abraham Baroff of the International Ladies Garment Workers Union If we once began to assign credit to individuals however the list could not stop with the Presidents and General Secretaries but would go on through Managers Business Agents Delegates Shop Chairmen until it had included well nigh every member of the unions To write a book about the needle trades organizations without giving due praise to all the able and devoted officials is not to write a Hamlet with the Hamlet left out for the greatest possible tribute to them is an exhibition of the movement with which they have been associated Our thanks is due to the Survey for permission to reprint the quotations from Katherine Coman in Chapter IV About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The New Unionism in the Clothing Industry* Jacob M. Labour in the Clothing Industry in the Asia Pacific Vicki Crinis, Adrian Vickers, 2016-11-25 The clothing industry provides employment for 60 million workers worldwide More than a quarter of these workers are employed in the Asia Pacific region where the industry is based on subcontracted production on behalf of international buyers Rapid movements of manufacturing activity from country to country in search of cost advantages make clothing workers part of a globalizing labour market where they increasingly suffer from job insecurity This book presents carefully researched case studies which highlight the ways in which labour is informalized fragmented and made disposable by the globalization of production Chapters address issues pertaining to rights and citizenship and new forms of activism and organization in conjunction and coordination with diverse support groups consumers and wider global campaigns Contributors further examine the role of the nation state government regulatory bodies as well as independent monitoring systems such as the International Labour

Organization Although there has been considerable effort directed to understanding how firms operate across multiple countries in studies of the organization of global production networks and the implications for complexities of scale de territorialization and state development projects there has been far less focus on how these processes produce precarious labour and reshape worker consciousness Offering new insights into the understanding and support of workers in the global textile and garment industry this book will be of interest to academics in a variety of disciplines including Asian Studies sociology political economy development human rights labour and gender

The Survey, 1922 **Culture of Misfortune**

Cletus E. Daniel, 2018-10-18 The failure of the Textile Workers Union of America to organize its jurisdiction has often been considered the CIO's most critical setback in establishing industrial unionism in the United States The textile industry had more than 1 250 000 workers and the massive organizing campaign the CIO launched in 1937 resulted in perhaps the longest most bitter and most significant labor capital clash of the century In *Culture of Misfortune* Clete Daniel integrates many primary sources including extensive archival records and numerous oral interviews into his examination of this conflict He pays close attention to the internal political culture of the TWUA and how it was affected by the dislocation and transformation of the textile industry the postwar assault on workers rights and the risks of activism in the face of the rampant anti unionism of the South Daniel explains the inability of the TWUA to match the achievements of CIO unions in other mass production industries through an analysis both of the internal dynamics of the organization and of the external political social and cultural impediments it confronted He suggests that the multiplying difficulties that beset the TWUA predicted the challenges faced by all industrial unions in the last decades of the twentieth century

Angels of the Workplace Mercedes Steedman, 1997-12-15 In this renowned 1997 study of the clothing industry in Canada Mercedes Steedman examines how the intricate weaving together of the meanings of class gender ethnicity family and the workplace created a job ghetto for women Although women comprised a significant majority of garment workers their roles were limited both in the workplace and in the trade union bureaucracy Detailing the disparities between men and women in terms of wages and representation *Angels of the Workplace* is the definitive history of discrimination against women in Canada's clothing industry Steedman shows the crucial role that women played at the front of the picket lines during labour strikes and reveals how they gained sympathy and favourable media coverage for the workers cause Tracing both the new hopes for more equitable work brought about by left wing unionism and the disappointments caused by the cooperation of labour and management in the new unionism of the 1930s *Angels of the Workplace* reveals how formalized workplace gender discrimination was formalized for the rest of the century

Fighting for the Union Label: The Women's Garment Industry and the ILGWU in Pennsylvania, The garment industry gained a foothold in Pennsylvania's hard coal region as mines were closing Runaway factories especially from Manhattan set up shop in mining towns where labor was plentiful and unions scarce By the 1930s garment factories employed thousands of wives and daughters of unemployed or underemployed coal miners Organizing these workers proved difficult for the International Ladies Garment Workers Union ILGWU

Our Own Time David R. Roediger, Philip S. Foner, 1989-11-17 Our Own Time retells the story of American labor by focusing on the politics of time and the movements for a shorter working day It argues that the length of the working day has been the central issue for the American labor movement during its most vigorous periods of activity uniting workers along lines of craft gender and ethnicity The authors hold that the workweek is likely again to take on increased significance as workers face the choice between a society based on free time and one based on alienated work and unemployment
