The Next Steps in Central America Bruce L. R. Maya Intellectual Renaissance Victor D. Montejo, 2010-01-01 When Mayan leaders protested the celebration of the Quincentenary of the discovery of America and joined with other indigenous groups in the Americas to proclaim an alternate celebration of 500 years of resistance they rose to national prominence in Guatemala This was possible in part because of the cultural political economic and religious revitalization that occurred in Mayan communities in the later half of the twentieth century Another result of the revitalization was Mayan students enrollment in graduate programs in order to reclaim the intellectual history of the brilliant Mayan past Victor Montejo was one of those students This is the first book to be published outside of Guatemala where a Mayan writer other than Rigoberta Menchu discusses the history and problems of the country It collects essays Montejo has written over the past ten years that address three critical issues facing Mayan peoples today identity representation and Mayan leadership Montejo is deeply invested in furthering the discussion of the effectiveness of Mayan leadership because he believes that self evaluation is necessary for the movement to advance He also criticizes the racist treatment that Mayans experience and advocates for the construction of a more pluralistic Guatemala that recognizes cultural diversity and abandons assimilation This volume maps a new political alternative for the future of the movement that promotes inter ethnic collaboration alongside a reverence for Mayan culture *U.S. Security Policy in a Changing World* ,

Brookings at Seventy-Five James Allen Smith, 2010-12-01 The historian James Allen Smith traces the evolution of Washington s oldest and prototypical think tank on the occasion of its seventy fifth anniversary in 1991 Dedicated to bringing expertise to bear on public policy issues Brookings has been a pioneer in bridging the disparate worlds of social science research and American policymaking But while its efforts have been made steady there have been frustrations and controversy over the years Inspired by the scientific management and government efficiency movements in the Progressive Era Brookings has evolved from an organization that consulted with government agencies on accounting and personnel practices into an institution with a wide ranging research and publishing program as well as active public policy education and media outreach efforts Smith vividly tells of the key individuals beginning with Robert Brookings who have shaped the institution He recounts its relationships with financial supporters and presidential administrations and he candidly discusses

the problems surrounding efforts at funding Smith places the Brookings research program in an intellectual context and within the changing policymaking environment of Washington He reveals how Brookings has withstood seventy five years of shifts in national politics external perceptions on the institution and internal leadership to emerge as one of the most prominent sources of policy expertise in the world The proliferation of private think tanks and the expansion of governmental research agencies in the past quarter century have changed the policy environment The Brookings Institution on its seventy fifth anniversary offers a singular vantage point from which to observe the ever changing relationship between expert knowledge and political decisionmaking in our democracy Labor Market Policies in Canada and Latin America:

Challenges of the New Millennium R. Albert Berry, 2013-03-14 Canada and the countries of Latin America are in the midst of major changes and choices in the area of labor markets and related social policy These decisions are likely to have profound consequences for the quality of life of workers throughout the hemisphere Labor Market Policies in Canada and Latin America Challenges of the New Millennium reviews the evidence of Canada and Latin America on three major labor policy instruments unemployment insurance minimum wages and training and on the effects of the payroll taxes which are the main means of funding the unemployment insurance system and other components of social expenditure This is the first study attempting an in depth comparison of these labor policy instruments between Canada and Latin America The useful juxtaposition of Canadian and Latin American experiences comes at a time when the trend in Canada is to back away from the perhaps overly generous or ineffectively administered elements of the labor legislation social security net and when Latin American countries have undertaken significant reforms of their past systems but require further changes to move toward the sorts of legislation and support systems that characterize developed countries The experiences of Canada and Latin America are mutually relevant since all are small economies forced to adjust to events at the world or hemispheric level and most are inclined to approach policy in an intermediate fashion which falls between the more market oriented American and the more interventionist European models Together with its comparative aspect this volume attempts a more balanced and in depth assessment in each of the policy areas than has hitherto been available The gradually increasing base of available empirical data on the period after the reforms has been used in the studies which provide thorough syntheses of the available research for Canada and Latin America *Legislative Review Activities of The Committee on International Relations,*

Andy Knight, Julián Castro-Rea, Hamid Ghany, 2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn t been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs academic as well as non academic audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere s recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub regional bodies that have emerged in this hemisphere over the past couple of decades

Subcommittee on Domestic and International Monetary Policy, Trade, and Technology, 2004 *Latin America-European Union relations in the twenty-first century* Arantza Gomez Arana, María J. The Department of State Bulletin ,1989 Encyclopedia of Global Warming and Climate Change, Second Edition S. George Philander,2012-07-10 This Second Edition of an academic yet non technical resource examines the effects history and ongoing research in the important field of global warming and climate change Special Report - The Department of State United States. Department of State. Office of Public Communication,1978 Social Standards in EU and US Trade Agreements Evgeny Postnikov,2020-04-02 This book examines the causes and consequences of social standards in US and EU preferential trade agreements PTAs PTAs are the new reality of the global trading system Pursued by both developed and developing countries they increasingly incorporate labor and environmental issues to prevent a race to the bottom in social regulation and counter protectionism Using principal agent theory to explore why US PTAs have stricter social standards than those signed by the EU Postnikov argues that the level of institutional insulation of trade policy executives from interest groups and legislators determines the design of social standards In the EU where institutional insulation is high social standards mirror the normative preferences of the European Commission leading to a softer approach In the US where such insulation is low social standards are driven by interest groups and legislators they control resulting in a stricter approach This book shows that both approaches can be effective but work through different causal mechanisms To test his argument Postnikov draws on original data collected in Brussels Washington Santiago Bogota and Seoul This book will be of interest to all scholars and students working in the fields of international political economy and EU and US trade policy
