Dumont,2009-05-06 What have we learnt about the Nile since the mid 1970s the moment when Julian Rzska decided that the time had come to publish a comprehensive volume about the biology and the geological and cultural history of that great river And what changes have meanwhile occurred in the basin The human population has more than doubled especially in Egypt but also in East Africa Locally industrial development has taken place and the Aswan High Dam was clearly not the last major infrastructure work that was carried out More dams have been built and some water diversions like the Toshka lakes have created new expanses of water in the middle of the Sahara desert What are the effects of all this on the ecology and economy of the Basin That is what the present book sets out to explore 33 years after the publication of The Nile Biology of an Ancient River Thirty seven authors have taken up the challenge and have written the new book They come from 13 different countries and 15 among them represent the largest Nilotic states Egypt Sudan Ethiopia Uganda and Kenya Julian Rzska died in 1984 and most of the authors of his book have now either disappeared or retired from research Only Jack Talling and Samir Ghabbour were still available to participate again *The Nile* Sir Ernest Alfred Wallis Budge,1902 [Search for the Nile's Source](#) John Humphries,2013-09-15 The source of the Nile had long eluded and tormented explorers and John Hanning Spekes discovery of Lake Victoria in 1858 elevated him to the pantheon of heroes of African exploration alongside Livingstone and Stanley But the part played by the Welsh mining engineer John Petherick in the discovery was ignored after he was branded a slave trader by Speke and the controversy that followed ended with Petherick ruined and Speke dead This first biography of Petherick places him at the centre of one of the great discoveries in African exploration and as the focus of a dispute that rocked the geographical establishment Was Petherick a rogue as portrayed by some or the victim of a conspiracy that destroyed his reputation and denied him a share of the credit for his part in one of the greatest feats in African exploration **The Nile** Toby Wilkinson,2014-02-13 From Herodotus's day to the present political upheavals the steady flow of the Nile has been Egypt's heartbeat It has shaped its geography controlled its economy and moulded its civilisation The same stretch of water which conveyed Pharaonic battleships Ptolemaic grain ships Roman troop carriers and Victorian steamers today carries modern day tourists past bankside settlements in which rural life fishing farming flooding continues much as it has for millennia At this most critical juncture in the country's history foremost Egyptologist Toby Wilkinson takes us on a journey up the Nile north from Lake Victoria from Cataract to Cataract past the Aswan Dam to the delta The country is a palimpsest every age has left its trace as we pass the Nilometer on the island of Elephantine which since the days of the Pharaohs has measured the height of Nile floodwaters to predict the following season's agricultural yield and set the parameters for the entire Egyptian economy the wonders of Giza which bear the scars of assault by nineteenth century archaeologists and the modern day unbridled urban expansion of Cairo and in Egypt's earliest art prehistoric images of fish traps carved into cliffs and the Arab Spring fought on the bridges of Cairo the Nile is our guide to

understanding the past and present of this unique chaotic vital conservative yet rapidly changing land The Nile: Natural and Cultural Landscape in Egypt Harco Willems, Jan-Michael Dahms, 2017-03-15 Although Herodotus dictum that Egypt is a gift of the Nile is proverbial there has been only scant attention to the way the river impacted on ancient Egyptian society Egyptologists frequently focus on the textual and iconographic record whereas archaeologists and earth scientists approach the issue from the perspective of natural sciences The contributions in this volume bridge this gap by analyzing the river both as a natural and as a cultural phenomenon Adopting an approach of cultural ecology it addresses issues like ancient land use administration and taxation irrigation and religious concepts **The Nile** James Barter, 2003 Describes the Nile River from ancient times to the present and discusses what must be done to protect and preserve this river The Nile Toby Wilkinson, 2015-03-03 The Nile like all of Egypt is both timeless and ever changing In these pages renowned Egyptologist Toby Wilkinson takes us on a journey downriver that is both history and travelogue We begin at the First Nile Cataract close to the modern city of Aswan From there Wilkinson guides us through the illustrious nation birthed by this great river We see Thebes with its Valley of the Kings Valley of the Queens and Luxor Temple We visit the fertile Fayum the Great Pyramid of Giza and finally the pulsing city of Cairo where the Arab Spring erupted on the bridges over the water Along the way Wilkinson introduces us to the gods pharaohs and emperors who joined their fate to the Nile and gained immortality and to the adventurers archaeologists and historians who have all fallen under its spell Peerlessly erudite vividly told The Nile brings the course of this enduring river into stunning view *The Nile and Ancient Egypt* Judith Bunbury, 2019-06-20 The economic political and historical story of the Nile in ancient times is unearthed through its landscape *The Nile and Its People* Charlotte Booth, 2014-05-14 Changes through history of the culture and people of Egypt are reflected in how the river Nile was seen and used As their manipulation and exploitation of the Nile improved so did their economy Follow the journey of the Nile thus far from the attraction it held for early settlers and how it affected their living methods through the pharaonic period and how it was used politically to the nineteenth century industrial age and its role as a centre for tourism

The Nile Robert O. Collins,2002 The Nile is the longest river in the world In its route from the Lake Plateau of East Africa to the Mediterranean the Nile flows for more than four thousand miles through nine countries Tanzania Kenya Congo Burundi Rwanda Ethiopia Uganda the Sudan and Egypt The river begins in volcanoes and mountains with glacial snows and ends in arid deserts Throughout history the banks of the Nile have been home to many peoples from Bantu cultivators Nilotic herdsman and Ethiopians in their highlands to the Sudanese Nubians and Egyptians on the plains below No other river in the world has embraced such human diversity But the huge and varied populations that have thrived on the waters of the Nile have also exerted extraordinary pressures on the river and its environment From the early canals dug by the pharaohs to the building of the Aswan High Dam in 1971 civilizations have struggled to tame the Nile and control its resources In *The Nile* Robert Collins charts this dynamic interplay between man and nature in chronicling the past present and future of this great river

The Nile Development Game Mina Michel Samaan,2018-12-30 This book introduces an analytic framework constructed upon the iterated Prisoners Dilemma game to model and analyze transboundary water interactions along the Nile River It presents a thorough and in depth analysis of the historical path through which conflict and cooperation have been generated among the Nile riparians over large scale developmental schemes This is done through modeling water interactions in the basin as an iterated Prisoners Dilemma game and employing process tracing method to compare four distinguishable rounds of the game the colonial round the Cold War round the post Cold War round and the post 2011 round The book examines the influences of the changing political contexts at the domestic regional and global levels on the game outcomes This framework is initially applied on several cases of international rivers worldwide while the rest of the book is devoted to the Nile case The book s central argument is that the riparians interests capabilities and beliefs are heterogeneous in varying degrees and that the changing multilevel political contexts influence the level of such heterogeneities among the riparians which ultimately drive the equilibrium dynamics in the Nile game to generate different

conflictive and cooperative outcomes over time Although the book s main conclusion indicates that the absence of economic interdependence and regional integration will transfer the game into tug of war which will impose harsh punishment on the basin communities and ecosystems on the long term the final chapter lists a group of recommendations addressed to the riparian states and international donors exploring the way for boosting cooperation and preventing conflicts in the basin Presenting clear theoretical methodological and policy implications this book is appropriate for students and scholars of international relations hydrology and development studies
