shall describe twelve months exploration during which I examined every individual river that is tributary to the Nile from Abyssinia including the Atbara Settite Royan Salaam Angrab Rahad Dinder and the Blue Nile The interest attached to these portions of Africa differs entirely from that of the White Nile regions as the whole of Upper Egypt and Abyssinia is capable of development and is inhabited by races either Mohammedan or Christian while Central Africa is peopled by a hopeless race of savages for whom there is no prospect of civilization

The Nile Tributaries of Abyssinia and the Sword Hunters of the Hamran Arabs by Sir Samuel W. Baker Samuel White Baker, 1868 *The Nile Tributaries of Abyssinia and the Sword Hunters of the Hamran Arabs* Samuel Baker, 2017-07-22 THE work entitled The Albert Nyanza Great Basin of the Nile published in 1866 has given an account of the equatorial lake system from which the Egyptian river derives its source It has been determined by the joint explorations of Speke Grant and myself that the rainfall of the equatorial districts supplies two vast lakes the Victoria and the Albert of sufficient volume to support the Nile throughout its entire course of thirty degrees of latitude Thus the parent stream fed by never failing reservoirs supplied by the ten months rainfall of the equator rolls steadily on its way through arid sands and burning deserts until it reaches the Delta of Lower Egypt It would at first sight appear that the discovery of the lake sources of the Nile had completely solved the mystery of ages and that the fertility of Egypt depended upon the rainfall of the equator concentrated in the lakes Victoria and Albert but the exploration of the Nile tributaries of Abyssinia divides the Nile system into two proportions and unravels the entire mystery of the river by assigning to each its due share in ministering to the prosperity of Egypt

The Nile Tributaries of Abyssinia Samuel W. Baker, 2015-08-06 Excerpt from The Nile Tributaries of Abyssinia And the Sword Hunters of the Hamran Arabs It would at first sight appear that the discovery of the lake sources of the Nile had completely solved the mystery of ages and that the fertility of Egypt depended upon the rainfall of the equator concentrated in the lakes Victoria and Albert but the exploration of the Nile tributaries of Abyssinia divides the Nile system into two proportions and unravels the entire mystery of the river by assigning to each its due share in

ministering to the prosperity of Egypt The lake sources of Central Africa support the life of Egypt by supplying a stream throughout all seasons that has sufficient volume to support the exhaustion of evaporation and absorption but this stream if unaided could never overflow its banks and Egypt thus deprived of the annual inundation would simply exist and cultivation would be confined to the close vicinity of the river The inundation which by its annual deposit of mud has actually created the Delta of Lower Egypt upon the overflow of which the fertility of Egypt depends has an origin entirely separate from the lake sources of Central Africa and the supply of water is derived exclusively from Abyssinia About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
