## **The Nineteenth Century 1814 1880:**

*Nineteenth Century* Paul M. Hayes, 1975-06-01      *The Mid-Victorian Generation, 1846-1886* K. Theodore Hoppen, 1998

This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill. In his magisterial study of the mid-Victorian generation Theo Hoppen identifies three defining themes. The first he calls established industrialism: the growing acceptance that factory life and manufacturing had come to stay. It was during these four decades that the balance of employment shifted irrevocably. For the first time in history more people were employed in industry than worked on the land. The second concerns the multiple national identities of the constituent parts of the United Kingdom. Dr Hoppen's study of the histories of Ireland, Scotland, Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state. The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period. This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political, economic, scientific, literary and artistic developments. This original and authoritative book will define these pivotal forty years in British history for the next generation.

**The Cowley Fathers** Serenhedd James, 2019-07-30 A definitive history of one of the most significant religious orders to emerge in the Anglican church: the Cowley Fathers, the first men's religious order to be founded in the Church of England since the Reformation.

**Progress of the Nineteenth Century** John Wesley Hanson, 1900

**British Political History, 1867-2001** Malcolm Pearce, Geoffrey Stewart, 2013-09-13 This third edition of *British Political History 1867-2001* is an accessible summary of major political developments in British history over the last 140 years. Analyzing the changing nature of British society and Britain's role on the world stage, Malcolm Pearce and Geoffrey Stewart also outline the growth of democracy and the growth in the power of the state against a background of party politics. New coverage includes domestic affairs from 1992 to 2001: John Major's Government, the creation of New Labour and the Third Way, Blair's first ministry, developments in Northern Ireland from 1995 through the Easter Peace Deal into 2001, the 2001 General Election results and implications. Students of British politics and history will find this the perfect resource for their studies.

*The Revolutions in Europe, 1848-1849* Hartmut Pogge von Strandmann, Robert John Weston Evans, 2000 These essays arose out of lectures given in Oxford to commemorate the 150th anniversary of the 1848 revolutions in Europe. Authoritative yet readable and colourful, they comprise judicious summaries of the existing state of knowledge as well as new insights and unfamiliar information. The book also seeks to place the revolutionary events in their wider context, apart from chapters covering the main centres of disturbance in France, Germany, Italy and the Habsburg lands, there are discussions of the situation in Britain and Russia which were affected but not convulsed by the disorders elsewhere, of reactions in the United States of America of the symbolism of 1848 for the later democratic radical and socialist movements. 1848 marked the first breakdown of

traditional authority across much of the continent and as such is of profound significance in the development of modern European politics as a whole      *The National Union Catalog, Pre-1956 Imprints* Library of Congress, American Library Association. understanding of the global literary field in the long nineteenth century by discussing nine different places outside the established metropolises. It shows how different economic, geographical, and political factors combined to give each place its own distinctive literary culture and symbolic capital. Taking a geocritical approach, the book shows how its different case studies can be seen as literary capitals in terms of their role within the wider nation, region, or empire. The volume is divided into three parts. Part One discusses Kolkata, Hong Kong, and Buenos Aires. Part Two considers semi-peripheral European cities: Pest, Buda, Budapest, Helsinki, and Dublin. Part Three focuses on cities within Italy: Trieste, Florence, and Rome. Drawing on a wide range of literary texts and different genres, the book reads the nineteenth-century literary field as a constellation where different connections can be plotted across various points on the map at different times. *British Sources of Information* P. **The Political Economy of Grand Strategy** Kevin Narizny, 2007. A nation's grand strategy rarely serves the best interests of all its citizens. Instead, every strategic choice benefits some domestic groups at the expense of others. When groups with different interests separate into opposing coalitions, societal debates over foreign policy become polarized along party lines. Parties then select leaders who share the priorities of their principal electoral and financial backers. As a result, the overarching goals and guiding principles of grand strategy as formulated at the highest levels of government derive from domestic coalitional interests. In *The Political Economy of Grand Strategy*, Kevin Narizny develops these insights into a comprehensive theoretical framework for understanding the dynamics of security policy. The focus of this analysis is the puzzle of partisanship. The conventional view of grand strategy, in which state leaders act as neutral arbiters of the national interest, cannot explain why political turnover in the executive office often leads to dramatic shifts in state behavior. Narizny, in contrast, shows how domestic politics structured foreign policymaking in the United States and Great Britain from 1865 to 1941. In so doing, he sheds light on long-standing debates over the revival of British imperialism, the rise of American expansionism, the creation of the League of Nations, American isolationism in the interwar period, British appeasement in the 1930s, and both countries' decisions to enter World War I and World War II.

The book begins with a look at Catholic life in the Old Regime and during the French Revolution and proceeds to topical chapters on the secular clergy, the

religious orders popular religion religious practice by region gender and age and the social classes The final chapter deals with the re Christianization of France in the latter part of the nineteenth century This volume will be of interest to students and researchers of history and religion
