The Nonconformists In Search Of A Lost Culture:

The Nonconformists James Munson, 1991 *Protestant Nonconformist Texts: The nineteenth century* Robert Tudur Jones, David William Bebbington, Kenneth Dix, Alan Ruston, 2006 This is a series of four substantial volumes designed to demonstrate the range of interests of the several Protestant Nonconformist traditions from the time of their Separatist harbingers in the 16th century to the end of the 20th century It represents a major project of the Association of Denominational Historical Societies and Cognate Libraries of such topics as theology philosophy worship socio political concerns and so on Prepared by a team of 12 editors all of whom are expert in their areas and drawn from a number of the relevant traditions it should provide a much needed comprehensive view of Nonconformity told largely in the words of those whose story it is Nonconformity Through contemporary writings it provides a lively insight into the life and thought of the Methodists Congregationalists Baptists Quakers Unitarians and other groups that formed pieces in the diverse mosaic of the 19th century chapels Each aspect of Nonconformity has an introductory discussion which includes a guide to the secondary literature on the subject and each passage from a primary source is put in context **The Oxford History of Protestant Dissenting Traditions** Mark A. Noll, Timothy Larsen, Michael Ledger-Lomas, 2017 The five volume Oxford History of Dissenting Protestant Traditions series is governed by a motif of migration out of England It first traces organized church traditions that arose in England as Dissenters distanced themselves from a state church defined by diocesan episcopacy the Book of Common Prayer the Thirty Nine Articles and royal supremacy but then follows those traditions as they spread beyond England and also traces newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent Secondly it does the same for the doctrines church practices stances toward state and society attitudes toward Scripture and characteristic patterns of organization that also originated in earlier English Dissent but that have often defined a trajectory of influence independent ecclesiastical organizations The Oxford History of Protestant Dissenting Traditions Volume III considers the Dissenting traditions of the United Kingdom the British Empire and the United States in the nineteenth century It provides an overview of the historiography on Dissent while making the case for seeing Dissenters in different Anglophone connections as interconnected and conscious of their genealogical connections The nineteenth century saw the creation of a vast Anglo world which also brought Anglophone Dissent to its apogee Featuring contributions from a team of leading scholars the volume illustrates that in most parts of the world the later nineteenth century was marked by a growing enthusiasm for the moral and educational activism of the state which plays against the idea of Dissent as a static purely negative identity This collection shows that Dissent was a political and constitutional identity which was often only strong where a dominant Church of England existed to dissent against Labour and the Free Churches, 1918-1939 Peter Catterall, 2016-10-06 Did the Labour Party in Morgan Phillips famous phrase owe more to Methodism than Marx Were the founding fathers of the party nurtured in the chapels of Nonconformity and shaped by their emphases on liberty conscience

and the value of every human being in the eyes of God How did the Free Churches traditionally allied to the Liberal Party react to the growing importance of the Labour Party between the wars This book addresses these questions at a range of levels including organisation rhetoric policies and ideals and electoral politics It is shown that the distinctive religious setting in which Labour emerged indeed helps to explain the differences between it and more Marxist counterparts on the Continent and that this setting continued to influence Labour approaches towards welfare nationalisation and industrial relations between the wars In the process Labour also adopted some of the righteousness of tone of the Free Churches This setting was however changing Dropping their traditional suspicion of the State Nonconformists instead increasingly invested it with religious values helping to turn it through its growing welfare functions into the provider of practical Christianity This nationalisation of religion continues to shape British attitudes to the welfare state as well as imposing narrowly utilitarian and material tests of relevance upon the churches and other social institutions The elevation of the State was not however intended as an end in itself What mattered were the social and individual outcomes Socialism for those Free Churchmen and women who helped to shape Labour in the early twentieth century was about improving society as much as systems

The Oxford History of Protestant Dissenting Traditions, Volume III Timothy Larsen, Michael Ledger-Lomas, 2017-04-28 The five volume Oxford History of Dissenting Protestant Traditions series is governed by a motif of migration out of England It first traces organized church traditions that arose in England as Dissenters distanced themselves from a state church defined by diocesan episcopacy the Book of Common Prayer the Thirty Nine Articles and royal supremacy but then follows those traditions as they spread beyond England and also traces newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent Secondly it does the same for the doctrines church practices stances toward state and society attitudes toward Scripture and characteristic patterns of organization that also originated in earlier English Dissent but that have often defined a trajectory of influence independent ecclesiastical organizations The Oxford History of Protestant Dissenting Traditions Volume III considers the Dissenting traditions of the United Kingdom the British Empire and the United States in the nineteenth century It provides an overview of the historiography on Dissent while making the case for seeing Dissenters in different Anglophone connections as interconnected and conscious of their genealogical connections The nineteenth century saw the creation of a vast Anglo world which also brought Anglophone Dissent to its apogee Featuring contributions from a team of leading scholars the volume illustrates that in most parts of the world the later nineteenth century was marked by a growing enthusiasm for the moral and educational activism of the state which plays against the idea of Dissent as a static purely negative identity This collection shows that Dissent was a political and constitutional identity which was often only strong where a dominant Church of England existed to dissent against

Victorian Nonconformity David W. Emerging Geographies of Belief Catherine Brace, 2010-10-12 This interdisciplinary book presents new research from international scholars that explores questions of belief faith and religion Focusing on theoretically informed cultural geographical and historical analyses of faith belief religion society and space the book presents new and revised theoretical approaches and methodologies grounded in rigorous empirical research both contemporary and historical The volume takes a deliberately eclectic approach reflecting the complex interactions of the political and poetic dimensions of sacredness in contemporary societies Taking this research agenda forward this book explores how religious beliefs inform and construct social identities public knowledge and modes of governance In particular the book meets an urgent need for a critical understanding of how terms such as religion faith fundamentalism and secularism for example inform public debates and foster constructive engagements both between faith groups and between people of faith and people of no faith The essays in Emerging Geographies of Belief also show that religion cannot be mapped neatly onto faith or belief We attempt to tease out the different circumstances in which for example belief can operate without religious adherence or faith can inspire social action in geographies of hope The geography of the title relates to an overarching concern with space and spatiality rather than describing a single disciplinary approach Our concern with belief faith and religion operates at different temporal and spatial scales in different localities from the contemporary appeal to a

more global sense of responsibility to a historically situated account of faith led educational practices This reflects more generally the so called spatial turn in the social sciences and humanities But despite this wide historical and geographical sweep the authors share some key concerns This collection is unique in combining theoretical conceptual and discursive approaches to the emerging geographies of belief with substantive examples of the intersection of belief faith and religion with aspects of everyday life Discussions of the potential subversive and prophetic capacities of faith belief and religion sit alongside consideration of how these have become implicated in the spaces and performances of hope It provides a critique of the situationist and substantive approaches to religion along with insights into the role of faith in education community and social work It considers the practices of remembrance representation and pilgrimage and the place of religion in contemporary identity politics In sum the book problematises the seemingly simple categories of faith religion and belief calling attention to how these are mobilised and implicated differently in different circumstances In addressing these themes the book provides a key theoretical resource but crucially goes on to show how multiple perspectives on belief however defined can be applied in practice Whilst there has been much contemporary work on the individual areas covered by the book they have not been brought together before to provide a dynamic insight into issues of the most pressing relevance

Periodizing Secularization Clive D. Field, 2019 Moving beyond the now somewhat tired debates about secularization as paradigm theory or master narrative Periodizing Secularization focuses upon the empirical evidence for secularization viewed in its descriptive sense as the waning social influence of religion in Britain Particular emphasis is attached to the two key performance indicators of religious allegiance and churchgoing each subsuming several sub indicators between 1880 and 1945 including the first substantive account of secularization during the fin de siecle A wide range of primary sources is deployed many of them relatively or entirely unknown and with due regard to their methodological and interpretative challenges On the back of them a cross cutting statistical measure of active church adherence is devised which clearly shows how secularization has been a reality and a gradual not revolutionary process The most likely causes of secularization were an incremental demise of a Sabbatarian culture coupled with the associated emergence of new leisure opportunities and transport links and of religious socialization in the church at home and in the school The analysis is also extended backwards to include a summary of developments during the eighteenth and early nineteenth centuries and laterally to incorporate a preliminary evaluation of a six dimensional model of diffusive religion demonstrating that these alternative performance indicators have hitherto failed to prove that secularization has not occurred The book is designed as a prequel to the author s previous volumes on the chronology of British secularization Britain s Last Religious Revival 2015 and Secularization in the Long 1960s 2017 Together they offer a holistic picture of religious transformation in Britain during the key secularizing century of 1880 1980

A New England? G. R. Searle, 2005 G R Searle s narrative history breaks conventional chronological barriers to carry the reader from England in 1886 the apogee of the Victorian era with the nation poised to celebrate the

empress queen s golden jubilee to 1918 as the war to end all wars drew to a close

Religious Vitality in Victorian London W. M. Jacob, 2021-09-01 This innovative book challenges many of the widely held assumptions about the place of religion in Victorian society and in London the world s first great industrial and commercial metropolis Against the background of Victorian London it explores the religiosity of Londoners as expressed through the dynamic renewal of traditional faith communities including Judaism and the historic churches as well as fresh expressions of religion including the Salvation Army Mormons spiritualism and the occult It shows how laypeople especially the rich and women were mobilised in the service of their faith and their fellow citizens Drawing on research in social economic oral cultural and women s history Jacob argues that religious motivations lay behind concerns that subsequently preoccupied people in the twentieth and twenty first centuries These include the changing place of women in society an active concern for social justice the sexual exploitation of women and children and provision of education for all classes and all ages By examining religion broadly in its social and cultural context and looking beyond conventional approaches to religious history *Religious Vitality in Victorian London* illustrates the dynamic significance of religion in society influencing even the expression of secularism

A New England? G. R. Searle, 2005-07-29 G R Searle s absorbing narrative history breaks conventional chronological barriers to carry the reader from England in 1886 the apogee of the Victorian era with the nation poised to celebrate the empress queen s golden jubilee to 1918 as the war to end all wars drew to a close leaving England to come to term with its price above all in terms of human life but also in the general sense that things would never be the same again This was an age of extremes a period of imperial pomp and circumstance with a political elite preoccupied with display and ceremony alongside the growing cult of the simple life the zenith of imperialism with its idealization of war on the one hand the start of the Labour Party a socialist renaissance and welfare politics on the other and a radical challenging of traditional gender stereotypes in the face of the prevailing cult of masculinity Under Professor Searle s historical microscope all the details of daily life spring into sharp relief Half forgotten figures such as Edward Carpenter Vesta Tilley and Sir Henry Campbell Bannerman take their place on stage beside Oscar Wilde the Pankhursts and Lloyd George Motoring and aviation to become such an intrinsic part of life within the next decades had their beginnings in this period as pastimes for the rich From the wretched slums of England s great cities to their bustling docks and factories from the grand portals of Westminster to the violent political challenges of the Ulster Unionists and the militant suffrage movement from Blackpool s tower and beach packed with holidaymakers to the trenches of the Western Front the energy creativity and often destructive turmoil of the years 1886 1918 are brought into focus in this magisterial history

THE NEW OXFORD HISTORY OF ENGLAND The aim of the New Oxford History of England is to give an account of the development of the country over time It is hard to treat that development as just the history which unfolds within the precise boundaries of England and a mistake to suggest that this implies a neglect of the histories of the Scots Irish and Welsh Yet the institutional core of the story which runs from Anglo

Saxon times to our own is the story of a state structure built round the English monarchy and its effective successor the Crown in Parliament While the emphasis of individual volumes in the series will vary the ultimate outcome is intended to be a set of standard and authoritative histories embodying the scholarship of a generation

Disavowing Constantine Nigel G. Wright, 2007-01-01 Disavowing Constantine draws upon the work of two highly influential modern theologians Jürgen Moltmann and John Howard Yoder to develop an independent and constructive understanding of the relation of the church to the state Its aim is to restate for modern understanding the insights of the Believers Church tradition and to work out their implications for Christian participation in the civil order In this complex realm positive insights are located in traditions usually regarded as incompatible but the thesis of the book concerns disavowing Constantine renouncing the reliance of the church upon coercive power to further its mission in order to rediscover how a faithful church might nonetheless participate as a witness within the power structures of human society

Communion with Christ and His People Peter J. Morden, 2014-01-31 Charles Haddon Spurgeon 1834 1892 was the most famous Baptist minister of his generation For such a significant figure he has received surprisingly little scholarly coverage This present work seeks to make a contribution to Spurgeon studies by examining him through the lens of his spirituality A wealth of primary material much of it previously untapped is used to build up a picture of his spiritual life Whereas older and more recent interpretations of Spurgeon have a tendency to be one dimensional examination of his spirituality reveals him to be a complex figure one who was molded by a diverse range of factors Despite this complexity a unifying theme for Spurgeon s spirituality is traced and fresh light is shed on the foremost popular preacher of the Victorian age

Anglicanism, Methodism and Ecumenism Andrew Chandler, 2018-09-30 For almost 200 years the city of Birmingham has been a key location for the training of clergy From 1828 Anglican clergy studied at the Queen s College and in 1881 the Methodist Church developed their own training facility at Handsworth College In this book Andrew Chandler tells the tale of these two colleges This is a history not simply of the creation and evolution of these two religious institutions but a study full of significance for the wider history of Christianity in British society across the nineteenth and twentieth centuries The foundation of both colleges occurred in a confident age of civic progress and reform and their subsequent histories reveal much that was at work in the experience of the British churches at large They were at first expressions of denominational identity and a determination to educate a class of clergy In time they found themselves negotiating new prospects within the ecumenical currents of a later age and the deepening realities of secularization In 1970 they united This is a book which blends local national and international dimensions and also shows how the two theological colleges came to embrace all kinds of intellectual cultural social and political history in a period of restless change

Bedford's Victorian Pilgrim Michael Brealey, 2014-07-08 A close reading of the life and letters of William Hale White shows that some misunderstandings have arisen in the interpretation of this important figure The book offers such significant issues as doubt loss of faith and crises over vocation and church This work represents a revisionist

approach to William Hale White It corrects previous studies at some important points questions existing interpretations and employs new theoretical strategies alongside fresh research in primary sources **Nonconformity in the Nineteenth Century** David M. Thompson, 2021-02-25 First published in 1972 this volume shows the potency and the limitations of Nonconformity in shaping the beginning of modern Britain It draws upon a wide range of sources including the writings and discussions of Nonconformists themselves their critics and contemporary commentators The extracts and the extensive introduction set Nonconformity in the broader context of social and political history and address the life of the free Churches their conflicts internal and external their organization and spread and their theology The collection demonstrates the variety and diversity of Nonconformity as well as the controversies and debates of the period This book will be an excellent reference for students of History English and Theology and will provide a starting point for those who wish to explore Nonconformist history
