### **The Nuclear Tipping Point Why States Reconsider Their Nuclear Choices Paperback:**

*The Nuclear Tipping Point* Kurt M. Campbell, Robert J. Einhorn, Mitchell B. Reiss, 2005-06-22 More than half a century after the advent of the nuclear age is the world approaching a tipping point that will unleash an epidemic of nuclear proliferation Today many of the building blocks of a nuclear arsenal scientific and engineering expertise precision machine tools software design information are more readily available than ever before The nuclear pretensions of so called rogue states and terrorist organizations are much discussed But how firm is the resolve of those countries that historically have chosen to forswear nuclear weapons A combination of changes in the international environment could set off a domino effect with countries scrambling to develop nuclear weapons so as not to be left behind or to develop nuclear hedge capacities that would allow them to build nuclear arsenals relatively quickly if necessary The Nuclear Tipping Point examines the factors both domestic and transnational that shape nuclear policy The authors distinguished scholars and foreign policy practitioners with extensive government experience develop a framework for understanding why certain countries may originally have decided to renounce nuclear weapons and pinpoint some more recent country specific factors that could give them cause to reconsider Case studies of eight long term stalwarts of the nonproliferation regime Egypt Germany Japan Saudi Arabia South Korea Syria Turkey and Taiwan flesh out this framework and show how even these countries might be pushed over the edge of a nuclear tipping point The authors offer prescriptions that would both prevent such countries from reconsidering their nuclear option and avert proliferation by others The stakes are enormous and success is far from assured To keep the tipping point beyond reach the authors argue the international community will have to act with unity imagination and strength and Washington's leadership will be essential Contributors include Leon Feurth George Wash *The Ethics of Nuclear Weapons Dissemination* Thomas E. Doyle, II, 2015-02-11 Offers an original and timely contribution to the nuclear ethics debate Examines the moral dilemmas of state and non state actor nuclear proliferation Will be of much interest to students of nuclear proliferation ethics international relations and international security **The India-Pakistan Nuclear**

**Relationship** E. Sridharan, 2020-11-29 Conflict resolution and promotion of regional cooperation in South Asia has assumed a new urgency in the aftermath of the nuclear tests by India and Pakistan in 1998 and underlined by the outbreak of fighting in Kargil in 1999 full mobilization on the border during most of 2002 and continued low intensity warfare and terrorism in Jammu and Kashmir The stability of nuclear deterrence between the two countries is therefore a matter of great urgency and has found a place on the scholarly agenda of security studies in South Asia Several books have been written on India's nuclear programme but these have been mostly analytical histories The India Pakistan Nuclear Relationship is a new departure in that it is the first time that a group of scholars from the South Asian subcontinent have collectively tried to apply deterrence theory and international relations theory to South Asia **Nuclear Proliferation and the Psychology of Political Leadership** Kelly O'Reilly, 2014-09-15 This book offers a novel approach to understanding the puzzle of nuclear

proliferation by examining how leaders beliefs and perceptions about the international system influence states decisions to acquire nuclear weapons Today there is a persisting dilemma over the spread of nuclear weapons for both practitioners and scholars of international affairs Uncertainty remains whether determined proliferators can be stopped as shown by the cases of North Korea and Iran These instances of proliferation raise questions about regional stability the use of pre emptive military action and the potential for reactive proliferation by neighbouring countries Despite the serious implications surrounding the spread of these weapons proliferation scholarship has thus far failed to solve what has been described as the proliferation puzzle why do some countries choose nuclear weapons while others do not The author argues that understanding basic psychological motivations such as the role of power and perceptions of self and others forms a strategic context which provides answers about a leader s willingness to proliferate Proliferation willingness is a critical yet frequently overlooked part of the proliferation equation Ultimately it is the combination of willingness and proliferation opportunity i e technical and scientific capabilities that determines whether a country goes nuclear By examining several historical instances of proliferation decision making in South Africa India Libya and Australia the book s findings highlight the fundamental role of leaders beliefs in shaping proliferation outcomes This book will be of much interest to students of nuclear proliferation political psychology security studies and IR in general

*Ballistic Missile Proliferation in Non-Nuclear States* Karim El-Baz, Ali Ghanbarpour-Dizboni, 2024-08-14 This book offers an exploration of ballistic missile proliferation in the Middle East and also delves into the geopolitical landscape to unveil a narrative of contemporary Middle Eastern history The central focus of this book is to decipher the pivotal moments when three regional powers of the Middle East Egypt Saudi Arabia and Iran embraced ballistic capabilities as a strategic response to military vulnerabilities The authors contend that the very essence of ballistic proliferation incorporates a tactical rationale provided by military needs that varies from one state to another and it is upon the assessment of these military needs that the decision to procure ballistic missiles is made Offering a blend of theoretical insights and primary sources based case studies this book dissects the decision making processes that spurred these states to choose ballistic missiles despite their inefficiencies in delivering conventional payloads The absence of an effective air force emerges as a catalyst triggering what the authors term a moment of ballistic consciousness Spanning three diverse regimes the work provides a rich historical tapestry and untangles the complexities of political decisions with military implications providing a fresh perspective on global power dynamics This narrative sheds light on the intersection of military strategy geopolitical realities and the pursuit of ballistic capabilities that shapes the world s security landscape This book will be of much interest to students of arms control nuclear proliferation Middle Eastern politics and International Relations

*Nuclear Politics* Alexandre Debs, Nuno P. Monteiro, 2017 A comprehensive theory of the causes of nuclear proliferation alongside an in depth analysis of sixteen historical cases of nuclear development

**Nuclear Logics** Etel Solingen, 2009-02-09 Nuclear Logics examines why some states seek nuclear weapons while others renounce them Looking

closely at nine cases in East Asia and the Middle East Etel Solingen finds two distinct regional patterns In East Asia the norm since the late 1960s has been to forswear nuclear weapons and North Korea which makes no secret of its nuclear ambitions is the anomaly In the Middle East the opposite is the case with Iran Iraq Israel and Libya suspected of pursuing nuclear weapons capabilities with Egypt as the anomaly in recent decades Identifying the domestic conditions underlying these divergent paths Solingen argues that there are clear differences between states whose leaders advocate integration in the global economy and those that reject it Among the former are countries like South Korea Taiwan and Japan whose leaders have had stronger incentives to avoid the political economic and other costs of acquiring nuclear weapons The latter as in most cases in the Middle East have had stronger incentives to exploit nuclear weapons as tools in nationalist platforms geared to helping their leaders survive in power Solingen complements her bold argument with other logics explaining nuclear behavior including security dilemmas international norms and institutions and the role of democracy and authoritarianism Her account charts the most important frontier in understanding nuclear proliferation grasping the relationship between internal and external political survival Nuclear Logics is a pioneering book that is certain to provide an invaluable resource for researchers teachers and practitioners while reframing the policy debate surrounding nonproliferation

**Nuclear Nonproliferation** Phillip Margulies, 2008 History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of this timely issue Nuclear Nonproliferation explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia North Korea

**Air Force Magazine** ,2004 **A Global History of the Nuclear Arms Race** Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the

piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime **The Challenges of Nuclear Non-Proliferation** Richard Dean Burns, Philip E. Coyle, 2015-03-12

**The Challenges of Nuclear Non Proliferation** is an exhaustive survey of the many aspects of non proliferation efforts It explains why some nations pursued nuclear programs while others abandoned them as well as the challenges strengths and weaknesses of non proliferation efforts It addresses key issues such as concerns over rogue states and stateless rogues delivery systems made possible by technology and the connection between nuclear weapons and ballistic missiles examining whether non proliferation regimes can deal with these threats or whether economic or military sanctions need to be developed It also examines the feasibility of eliminating or greatly reducing the number of nuclear weapons A broad survey of one of today's great threats to international security this text provides undergraduates students with the tools needed to evaluate current events and global threats *No Exit* Jonathan D. Pollack, 2017-10-03 This book chronicles the political military development of the Korean Peninsula since 1945 with particular attention to North Korea's pursuit of nuclear technology and nuclear weapons and how it has shaped Northeast Asian security and non proliferation policy and influenced the strategic choices of the United States and all regional powers I focus on North Korea's leaders institutions political history and the systems longer term prospects How has an isolated highly idiosyncratic small state repeatedly stymied or circumvented the policy preferences of much more powerful states culminating with its withdrawal from the Non Proliferation Treaty the only state ever to do so and the testing of nuclear weapons in open defiance of adversaries and allies alike What does this portend for the region's future Unlike most of the literature that focuses on US non proliferation policy this is a book about decision making in North Korea and the state's survival in the face of daunting odds It draws on extensive interviews with individuals in China South Korea Japan Russia and the EU who have had ample experience in and with North Korea additional interviews with former US policy makers and the results from two visits to the North The author makes extensive use of archival materials from the Cold War International History Project enabling a far fuller rendering of North Korean history than appears in most of the literature on the North Korean nuclear weapons issue **The Politics of**

**Nuclear Non-Proliferation** Ursula Jasper, 2013-10-08 This book examines the puzzle of why some states acquire nuclear weapons whereas others refrain from trying to do so or even renounce them Based on the predominant theoretical thinking in International Relations it is often assumed that nuclear proliferation is inevitable given the anarchic nature of the international system Proliferation is thus often explained by vague references to states' insecurity in an anarchic environment Yet elusive generalisations and grand abstract theories inhibit a more profound and detailed knowledge of the very political processes that lead towards nuclearisation or its reversal Drawing upon the philosophical and social theoretical insights of American pragmatism *The Politics of Nuclear Non Proliferation* provides a theoretically innovative and practically useful

framework for the analysis of states nuclear proliferation policies Rather than recounting a parsimonious lean account of proliferation the framework allows for the incorporation of multiple paradigms in order to depict the complex political contestation underlying states proliferation decisions This pragmatist framework of analysis offers ways of overcoming long standing metatheoretical gridlocks in the IR discipline and encourages scholars to reorient their efforts towards imminent real world challenges This book will be of much interest to students of nuclear proliferation international security and IR theory

**Asia, the US and Extended Nuclear Deterrence** Andrew O'Neil, 2013-09-02 Since the end of the Cold War significant attention has focussed on the issue of nuclear deterrence and in particular whether formal nuclear security guarantees from nuclear weapons states to non nuclear weapons states involving the possible use of nuclear weapons have a place in the twenty first century global strategic landscape Growing support for nuclear disarmament in the US and elsewhere has seen serious doubts being raised about the ongoing utility of extended nuclear deterrence This book provides the first detailed analysis of the way in which extended nuclear deterrence operates in contemporary Asia It addresses the following key questions What does the role of extended nuclear deterrence in Asia tell us about the broader role of extended nuclear deterrence in the contemporary international system Is this role likely to change significantly in the years ahead O Neil uses a theoretical and historical framework to analyse the contemporary and future dynamics of extended nuclear deterrence in Asia and challenges many of the existing orthodox perspectives on the topic Providing a new perspective on debates surrounding extended nuclear deterrence this book will be of interest not only to students and scholars of Asian politics international relations and security studies but also to policy makers and professionals

**Unthinkable** Kenneth Pollack, 2013-09-10 Examines Iran s current nuclear potential while charting America s future course of action recounting the prolonged clash between both nations to outline options for American policymakers

Unmaking the Bomb Harold A. Feiveson, Alexander Glaser, Zia Mian, Frank N. von Hippel, 2014-08-29 A new approach to nuclear disarmament nonproliferation and the prevention of nuclear terrorism that focuses on controlling the production and stockpiling of nuclear materials Achieving nuclear disarmament stopping nuclear proliferation and preventing nuclear terrorism are among the most critical challenges facing the world today Unmaking the Bomb proposes a new approach to reaching these long held goals Rather than considering them as separate issues the authors physicists and experts on nuclear security argue that all three of these goals can be understood and realized together if we focus on the production stockpiling and disposal of plutonium and highly enriched uranium the fissile materials that are the key ingredients used to make nuclear weapons The authors describe the history production national stockpiles and current military and civilian uses of plutonium and highly enriched uranium and propose policies aimed at reducing and eventually eliminating these fissile materials worldwide These include an end to the production of highly enriched uranium and plutonium for weapons an end to their use as reactor fuels and the verified elimination of all national stockpiles

*China and Global Nuclear Order* Nicola Horsburgh, 2015 This book

offers an empirically rich study of Chinese nuclear weapons behaviour and the impact of this behaviour on global nuclear politics since 1949 China's behaviour as a nuclear weapons state is a major determinant of global and regional security For the United States there is no other nuclear actor with the exception of Russia that matters more to its long term national security However China's behaviour and impact on global nuclear politics is a surprisingly under researched topic Existing literature tends to focus on narrow policy issues such as misdemeanours in China's non proliferation record the uncertain direction of its military spending and nuclear force modernization or enduring opaqueness in its nuclear policy This book proposes an alternative context to understand both China's past and present nuclear behaviour its engagement with the process of creating and maintaining global nuclear order The concept of global nuclear order is an innovative lens through which to consider China as a nuclear weapons state because it draws attention to the inner workings institutional and normative that underpin nuclear politics It is also a timely subject because global nuclear order is considered by many actors to be under serious strain and in need of reform Indeed today the challenges to nuclear order are numerous from Iranian and North Korean nuclear ambitions to the growing threat of nuclear terrorism This book considers these challenges from a Chinese perspective exploring how far Beijing has gone to the aid of nuclear order in addressing these issues *Delaying Doomsday* Rupal N. Mehta, 2020 In 1960 President Kennedy warned of a dangerous future rife with nuclear armed states and a widespread penchant for conflict by the end of the century Thankfully his prediction failed to pass in fact roughly three times as many countries have since opted to give up their nuclear pursuit or relinquish existing weapons than have maintained their arsenals Nevertheless clandestine acquisition of nuclear materials and technology by states such as Iraq Syria and Iran and a nuclear North Korea has reaffirmed the need for United States commitment to pursuing aggressive counterproliferation strategies particularly with rogue states This book looks at the experiences of countries that ventured down the path of nuclear proliferation but were stopped short and examines how the international community bargains with proliferators to encourage nuclear reversal It asks why so many states have relented to pressure to abandon their nuclear weapons programs and which counterproliferation policies have been successful Rupal N Mehta argues that the international community can persuade countries to reverse their weapons programs with rewards and sanctions especially when the threat to use military force remains on the table Specifically nuclear reversal is most likely when states are threatened with sanctions and offered face saving rewards that help them withstand domestic political opposition Historically the United States has relied on a variety of policy levers including economic and civilian nuclear assistance and sometimes security guarantees as well as economic sanctions to achieve nuclear reversal Underlying these negotiations is the possibility of military intervention which incentivizes states to accept the agreement often spearheaded by the United States and end their nuclear pursuit The book draws on interviews with current and former policymakers as well as in depth case studies of India Iran and North Korea to provide policy recommendations on how best to manage nuclear proliferation challenges from rogue

states It also outlines the proliferation horizon or the set of state and non state actors that are likely to have interest in acquiring nuclear technology for civilian military or unknown purposes The book concludes with implications and recommendations for U S and global nuclear counterproliferation policy     *The Globalization of World Politics* John Baylis, Steve Smith, Patricia Owens, 2011 Now in its fifth edition this title has been fully revised and updated in the light of recent developments in world politics with new chapters on the changing nature of war human security and international ethics     **Difficult Choices** Richard C. Bush, 2021-04-13 How Taiwan can overcome internal stresses and the threat from China Taiwan was a poster child for the third wave of global democratization in the 1980s It was the first Chinese society to make the transition to democracy and it did so gradually and peacefully But Taiwan today faces a host of internal issues starting with the aging of society and the resulting intergenerational conflicts over spending priorities China's long term threat to incorporate the island on terms similar to those used for Hong Kong exacerbates the island's home grown problems Taiwan remains heavily dependent on the United States for its security but it must use its own resources to cope with Beijing's constant intimidation and pressure How Taiwan responds to the internal and external challenges it faces and what the United States and other outside powers do to help will determine whether it is able to stand its ground against China's ambitions The book explores the broad range of issues and policy choices Taiwan confronts and offers suggestions both for what Taiwan can do to help itself and what the United States should do to improve Taiwan's chances of success
