The Hidden Life of Clothing Rachel Worth, 2023-06-15 Since the democratisation of the clothing industry in the early 19th century buyers have become increasingly disconnected from the creative and human aspects of the production of clothing Arguably clothing is now valued less for its aesthetic qualities or because of the hours spent in its making but more for the extent to which it serves current fashion In a climate of increasing anxiety about the environmental and social impact of the contemporary global fashion industry Rachel Worth suggests that rather than seeking solutions only in the present looking to history can assist in understanding better the challenges consumers face today in making decisions about the contents of their wardrobes which in turn will impact on the nature of the future global fashion industry She does not seek to offer simplistic historical solutions to contemporary problems but explores ways in which it might be possible to bridge divides between knowledge of the past current individual choice and possible directions for future action The more we know about our clothes the less likely it is that we will wear an item of clothing only a few times before replenishing it with newer purchases that are on trend By taking ownership of our personal clothing choices rather than feeling pressurised to respond to sophisticated marketing and to influencers this book suggests how we might rethink our wardrobes in philosophical and practical ways in order to create a sense of order and beauty in our lives and to wrest control back from the increasing chaos of seemingly endless choice that perpetuates unsustainable impersonal and fast fashion

The Sonic Self Naomi Cumming, 2000 Semioticians began by looking at literature but have gradually applied their techniques to other disciplines including music The late Naomi Cumming based this consideration of the sources of musical expression on her experiences as a performer with interesting if rarely surprising results Choice Using classical violin music as her principal laboratory the author examines how a performance incorporates distinctive features not only of the work but of the performer as well and how the listener goes about interpreting not only the composer s work and the performer s rendering of the work but also of the performer s and listener s identities A richly interdisciplinary approach to a very common yet persistently mysterious part

The Bonds of Humanity Cary J. Nederman, 2020-01-06 Of the great philosophers of pagan antiquity Marcus Tullius Cicero is the only one whose ideas were continuously accessible to the Christian West following the collapse of the Roman Empire Yet in marked contrast with other ancient philosophers Cicero has largely been written out of the historical narrative on early European political thought and the reception of his ideas has barely been studied The Bonds of Humanity corrects this glaring oversight arguing that the influence of Cicero s ideas in medieval and early modern Europe was far more pervasive than previously believed In this book Cary J Nederman presents a persuasive counternarrative to the widely accepted belief in the dominance of Aristotelian thought Surveying the work of a diverse range of thinkers from the twelfth to the sixteenth century including John of Salisbury Brunetto Latini Marsiglio of Padua Christine de Pizan and Bartolom de Las Casas Nederman shows that these men and women inherited deployed and adapted key Ciceronian themes He argues that the rise of scholastic Aristotelianism in the thirteenth century did not supplant but rather supplemented and bolstered Ciceronian ideas and he identifies the character and limits of Ciceronianism that distinguish it from other schools of philosophy Highly original and compelling this paradigm shifting book will be greeted enthusiastically by students and scholars of early European political thought and intellectual history particularly those engaged in the conversation about the role played by ancient and
