Nutrition and Growth D.B. Jelliffe,E.F.P. Jelliffe,2012-12-06 The science of nutrition has advanced beyond expectation since Antoine La voisier as early as the 18th century showed that oxygen was necessary to change nutrients in foods to compounds which would become a part of the human body He was also the first to measure metabolism and to show that oxidation within the body produces heat and energy In the two hundred years that have elapsed the essentiality of nitrogen containing nutrients and of proteins for growth and maintenance of tissue has been established the necessity for carbohydrates and certain types of fat for health has been documented vitamins necessary to prevent deficiency diseases have been identified and isolated and the requirement of many mineral elements for health has been demonstrated Further investigations have defined the role of these nutrients in metabolic processes and quantitated their requirements at various stages of development Additional studies have involved their use in the possible prevention of and therapy for disease conditions      **Assessing Contributions** M. It often disturbed public opinion being concerned as it is with nothing less than the life and death of babies The infant food industry was directly accused of having caused a decline in breast feeding through the inappropriate marketing of breast milk substitutes The problem was said to be particularly acute in poor under developed communities because illiterate mothers were unable to understand instructions for its use water was often contaminated and in order to stretch an admittedly expensive product it was over diluted The inevitable result said the critics of industry was malnutrition gastroenteritis and increased infant mortality These were very serious charges against companies which had until then been generally considered to provide an important contribution to medical progress and child health One company was to be particularly singled out Nestl SA the Swiss multinational Perhaps it became the target because it was the longest establishment and served well as a symbol of the whole industry It is a story which is full of confrontations intrigue and passionately held opinions based nevertheless on a sizeable body of medical science After countless twists and turns it has some sort of happy ending Yet a great deal remains to be said as will be seen throughout the book
