Focus Of Discoveries, A (Second Edition) Rudolf P Huebener, Heinz Lubbig, 2012-02-13 On the special occasion of the 125th anniversary in 2012 of the PTB and its predecessor PTR this second edition is presented in CD with a new chapter on the current impact of quantum standards In 1887 the Physikalisch Technische Bundesanstalt PTB was originally founded as the Physikalisch Technische Reichsanstalt PTR in Berlin in order to promote basic research in physics It subsequently developed into the largest research center worldwide as a place where scientists could concentrate exclusively on their research subject and served as a model for similar institutes established in other countries Within a very short time the PTR produced extremely important scientific results that cemented its international position at the top such as Max Planck's radiation law and energy quantization theory as well as Walther Meissner's discovery of the Meissner effect which represented a turning point in the field of superconductivity This book describes the scientific and industrial milieu of the time and explains in detail the role of the key people including Albert Einstein's involvement with the PTR A brief discussion on how the PTR was affected by the Nazi dictatorship in Germany is also given The Journals of Captain James Cook on his Voyages of Discovery J.C. Beaglehole, 2017-07-05 Captain James Cook's first two voyages of exploration in 1768-71 and 1772-75 had drawn the modern map of the South Pacific Ocean and had opened the door on the discovery of Antarctica These expeditions were the subject of Volumes I and II of Dr J C Beaglehole's edition of Cook's Journals The third voyage on which Cook sailed in 1776 was directed to the Northern Hemisphere Its objective was the discovery of a Northern Passage by sea from the Pacific to the Atlantic Ocean the North west Passage sought since the 16th century which would have transformed the pattern of world trade The search was to take Cook into high latitudes where as in the Antarctic his skill in ice navigation was tested Sailing north from Tahiti in 1778 Cook made the first recorded discovery of the Hawaiian Islands On March 7 he sighted the Oregon coast in 44°N The remarkable voyage which he made northward along the Canadian and Alaskan coasts and through Bering Strait to his farthest north in 70° nearly disproved the existence of a navigable passage towards the Atlantic and produced charts of impressive accuracy Returning to Hawaii to refit Cook met his death in a clash with the natives as tragic as it seems unnecessary Dr Beaglehole discusses with sympathy and insight the tensions which led Cook by then a tired man into miscalculations alien to his own nature and habits The volume and vitality of the records both textual and graphic for this voyage surpass those even for Cook's second voyage The surgeons William Anderson and David Samwell both admirable observers left journals which are also here printed in full for the first time The documentation is completed as in the previous volumes by appendixes of documents and correspondence and by reproductions of original drawings and paintings mainly by John Webber the artist of the expedition In Dr Beaglehole's words no one can study attentively the records of Cook's third and last voyage *Indo-Persian Travels in the Age of Discoveries, 1400-1800* Muzaffar Alam, Sanjay Subrahmanyam, 2007-02 A study of Persian travel accounts dealing with India Iran and Central Asia between 1400 and 1800
