SLA Research And Language Teaching:

SLA Research and Language Teaching Rod Ellis, 1997-11-20

SLA Research and Materials Development for Language Learning Brian Tomlinson, 2016-05-20 SLA Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Theories in Second Language Acquisition Bill VanPatten, Gregory D. Keating, Stefanie Wulff, 2025-07-03 This fourth edition of the best selling *Theories in Second Language Acquisition* surveys the major theories and frameworks currently used in second language acquisition SLA research, serving as an ideal introductory text for graduate students in SLA and language teaching. Designed to provide a consistent and coherent presentation for those seeking a basic understanding of the theories and frameworks that underlie contemporary SLA research, each chapter focuses on a single theory. Chapters are written by leading scholars in the field and incorporate a basic foundational description of the theory, relevant data or research models used with this theory, common misunderstandings, and a sample study from the field to show the theory in practice. New to this fully revised edition is the incorporation of a new theoretical framework to replace several lesser used theories. A key work in the study of second language acquisition, this volume will be useful to students of linguistics, language and language teaching, and to researchers as a guide to theoretical work outside their respective domains.

Doing SLA Research with Implications for the Classroom Robert M. DeKeyser, Gorette Prieto Botana, 2019-03-15 This book is unique in bringing together studies on instructed second language acquisition that focus on a common question: What renders this research particularly relevant to classroom applications and what are the advantages, challenges, and potential pitfalls of the methodology adopted? The empirical studies feature experimental, quasi-experimental, and observational research in settings ranging from the classroom to the laboratory and CALL contexts. All contributors were asked to discuss issues of cost, ethics, participant availability, experimental control, teacher collaboration, and student motivation, as well as the generalizability of findings to different kinds of educational contexts, languages, and structures. This volume should be of interest to graduate students in second language research, practicing teachers who want some guidance to navigate the sometimes overwhelming array of publications, and to researchers who are planning studies on instructed second language learning or teaching and are looking to make principled decisions on which of the existing methodologies to adopt.

Key Topics in Second Language Acquisition Vivian Cook, David Singleton, 2014-04-03 This textbook offers an introductory overview of

eight hotly debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology. The topics are treated independently so that they can be read in any order that interests the reader.

Language Teaching Research and Language Pedagogy Rod Ellis, 2012-03-27 This book examines current research centered on the second language classroom and the implications of this research for both the teaching and learning of foreign languages. It offers illuminating insights into the important relationship between research and teaching and the inherent complexities of the teaching and learning of foreign languages in classroom settings. Computer Learner Corpora, Second Language Acquisition and Foreign Language Teaching Sylviane Granger, Joseph Hung, Stephanie Petch-Tyson, 2002-12-11 This book takes stock of current research into computer learner corpora conducted both by ELT and SLA specialists. It should be of particular interest to researchers looking to assess its relevance to SLA theory and ELT practice. Throughout the volume emphasis is also placed on practical methodological aspects of computer learner corpus research in particular the contribution of technology to the research process. The advantages and disadvantages of automated and semi automated approaches are analyzed the capabilities of linguistic software tools investigated the corpora and compilation processes described in detail. In this way an important function of the volume is to give practical insight to researchers who may be considering compiling a corpus of learner data or embarking on learner corpus research. The volume is divided into three main sections. Section 1 gives a general overview of learner corpus research. Section 2 illustrates a range of corpus based approaches to interlanguage analysis. Section 3 demonstrates the direct pedagogical relevance of learner corpus work.

Contemporary Approaches to Second Language Acquisition María del Pilar García Mayo, María Junkal Gutierrez Mangado, María Martínez Adrián, 2013-02-19 Second language acquisition SLA is a field of inquiry that has increased in importance since the 1960s. Currently researchers adopt multiple perspectives in the analysis of learner language all of them providing different but complementary answers to the understanding of oral and written data produced by young and older learners in different settings. The main goal of this volume is to provide the reader with updated reviews of the major contemporary approaches to SLA the research carried out within them and wherever appropriate the implications and or applications for theory research and pedagogy that might derive from the available empirical evidence. The book is intended for SLA researchers as well as for graduate MA Ph D students in SLA research applied linguistics and

linguistics as the different chapters will be a guide in their research within the approaches presented The volume will also be of interest to professionals from other fields interested in the SLA process and the different explanations that have been put forward to account for it **SLA Research and Materials Development for Language Learning** Brian

Lee,2013-10-08 A volume on second language acquisition theory and pedagogy is at the same time a mark of progress and a bit of an anomaly The progress is shown by the fact that the two disciplines have established themselves as areas of study not only distinct from each other but also different from linguistic theory This was not always the case at least not in the United States The anomaly results from the fact that this book deals with the relationship between L2 theory and pedagogy despite

the conclusion that there is currently no widely accepted theory of SLA Grouped into five sections the papers in this volume consider questions about L2 theory and pedagogy at the macro level from the standpoint of the L2 setting consider input in terms of factors which are internal to the learner examine the question of external factors affecting the input such as the issue of whether points of grammar can be explicitly taught deal with questions of certain complex linguistic behaviors and the various external and social variables that influence learners and discuss issues surrounding the teaching of pronunciation factors that affect a non native accent
