Sleep The Complete Guide To Sleep Disorders And A Better Nights Sleep:

The Complete Guide to a Good Night's Sleep Carmel Harrington, 2014-05-01 Between 20-30% of the population experience problems with either falling asleep or staying asleep. The reasons are many and varied from anxiety to sleep apnoea or poor sleep hygiene such as the overuse of technology or too many wines before bed. Short term effects of too little sleep include changes in mood we feel tired, cranky, depressed, unmotivated, indecisive and unable to process information. We'll be disinclined to exercise. Our appetite hormones become irregular so we experience a strong desire to eat all the wrong types of food, chocolate chips and hamburgers. People suffering from chronic insomnia are far more likely to develop depression, certain types of cancer, cardiovascular diseases such as high blood pressure and heart disease, metabolic diseases such as type II diabetes and obesity and to top off an already grim picture are more likely to die younger. Dr Carmel Harrington knows that sleep solutions are not a one size fits all. Sleep is highly individual and there are many reasons why you may not be sleeping well. In this definitive guide she examines the process of sleep, the particular reasons why you are having trouble sleeping, well the behaviour patterns that hinder your restful sleep and helps you to uncover ways to achieve deep restful sleep on a permanent basis.

Sleep J. Paul Caldwell, 2003 Sleep helps readers understand what makes or breaks a good night's sleep, discussing the many disorders that can affect sleep and research that will help us sleep better. The revised edition has been updated for 2003.

Alternative Medicine Magazine's Definitive Guide to Sleep Disorders Herbert Ross, Keri Brenner, 2013-08-20 If you suffer from insomnia, sleep apnea, restless leg syndrome or other sleep disorders, you don't have to endure another long sleepless night. This second edition of ALTERNATIVE MEDICINE MAGAZINE'S DEFINITIVE GUIDE TO SLEEP DISORDERS holds the keys to lasting relief from such sleep disturbing factors as toxic overload and body clock disruptions. Outlining seven reasons why people have trouble falling and staying asleep, sleep specialist Dr Herbert Ross recommends several natural techniques: detoxification, dietary change, mind/body therapies, exercise and more to promote better sleep while enhancing your overall health. Unlike sleeping pills which decrease sleep quality and become less effective over time, these holistic treatments will benefit your whole body over the long term to help you lose weight, increase immune system function, boost energy, improve mood and enhance concentration. Good health and vitality are just a good night's sleep away.
