Samis, 2013-03-09 Aging is one of the most serious and costly health problems in the Western world A disproportionate amount of the available health care capability is devoted to the health care of the aged and the cost of this care is soaring Viewed in wide perspective aging presents two problems for the researcher s consideration First is that of providing the most efficacious therapeutic regimens and the best possible care for those already in their latter years The second is to determine the cause or causes for senescence and all its attendant problems in order to decrease the impact of senescence on general health and well being This volume is aimed at examining possible relationships between biological time structure and aging and ways by which these interrelationships might be examined in terms of both the causes of
