Fish, Paul R. Fish, M. Elisa Villalpando, 2018-07-02 The intriguing hilltop archaeological sites known as cerros de trincheras span almost three millennia from 1250 BC to AD 1450 Archaeologists have long viewed them as a unitary phenomenon because they all have masonry architecture and occur mostly on low volcanic peaks Scattered across the southwestern United States and northwestern Mexico these sites received little comprehensive research until the 1980s This first volume in the Amerind Studies in Archaeology series from the Amerind Foundation documents considerable variability among trincheras sites with respect to age geographic location and cultural affiliation This multi author volume integrates a remarkable body of new data representing a textbook like array of current research issues and methodologies in the archaeology of the region Scholars from the United States and Mexico offer original research on trincheras sites in Chihuahua Sonora Arizona and New Mexico Scales of focus range from intensive intrasite sampling to the largest contiguous survey in the region Authors incorporate
