Halff,Benjamin K. Sovacool,Jon Rozhon,2014-11-27 This edited volume looks at energy poverty an issue whose pivotal role in the fight for human development is only now being recognised by policymakers Nearly one quarter of humanity still lacks access to electricity Close to one third rely on traditional fuels like firewood and cow dung for cooking at great cost to their health and welfare While most prevalent in parts of Africa and Asia energy poverty is a global problem which concerns us all This book which brings together economists policymakers entrepreneurs and other practitioners from all over the world is dedicated to a single goal finding a solution to this haunting problem It is part history part economics part political analysis part business case review and part field handbook Part One focuses on defining and measuring the problem and benchmarking progress in solving it an obvious prerequisite to any successful energy access policy Part Two reviews past and current energy access programs with an eye towards finding out what worked and what didn't and what can be replicated elsewhere These case reviews are told as seen on the ground China's experience by top Chinese officials and Africa's by African regulators and scholars Based in part on those cases the book's last more forward looking section aims to present practitioners with a tool kit a menu of options to speed up their efforts The energy access agenda is gaining traction at a time of rising concerns about climate change and resource constraints This book shows that bringing modern energy to those who lack it not just a moral imperative but will likely benefit the world as a whole without harming the environment or unduly stretching finite resources *Entrepreneurship Class 11* Dr. S. Ramola Ramtohul, Hylland Eriksen, 2018-04-11 Speaking of Mauritius as an economic miracle has become a cliché and with good reason Its development since Independence in 1968 can easily be narrated as a rags to riches story In addition it is a stable democracy capable of containing the conflict potential inherent in its complex ethnic and religious demography This book brings together some of the finest scholarship domestic as well as foreign on contemporary Mauritius offering perspectives from constitutional law cultural studies sociology archaeology economics social anthropology and more While celebrating the indisputable and impressive achievements of the Mauritian nation on its fiftieth birthday this book is far from toothless Looking back inevitably implies looking ahead and in order to do so critical self scrutiny is essential to be able to learn from the mistakes of the past The contributors raise fundamental questions concerning a broad range of issues from the dilemmas of multiculturalism to the marginal role of women in public life from the question of constitutional reform and the continued problem of corruption to the slow destruction of Mauritius joy and pride namely the beauty and purity of its

natural scenery Taking stock of the first fifty years this book also looks ahead to the next fifty years giving some cues as to where Mauritius can and should aim in the next decades

*Critical Debates in Tourism* Tej Vir Singh, 2012 The book is a landmark volume which examines perplexing tourism debates such as the relevance of mass tourism climate change authenticity tourism and poverty and slow tourism Multidisciplinary in content it covers applied aspects of sociology anthropology humanities and biosciences The book is unique in its presentation and style and will be an essential resource for scholars academics and practitioners *STOP, THAT and One Hundred Other Sleep Scales* Azmeh Shahid, Kate Wilkinson, Shai Marcu, Colin M Shapiro, 2012-01-06 There are at least four reasons why a sleep clinician should be familiar with rating scales that evaluate different facets of sleep First the use of scales facilitates a quick and accurate assessment of a complex clinical problem In three or four minutes the time to review ten standard scales a clinician can come to a broad understanding of the patient in question For example a selection of scales might indicate that an individual is sleepy but not fatigued lacking alertness with no insomnia presenting with no symptoms of narcolepsy or restless legs but showing clear features of apnea exhibiting depression and a history of significant alcohol problems This information can be used to direct the consultation to those issues perceived as most relevant and can even provide a springboard for explaining the benefits of certain treatment approaches or the potential corollaries of allowing the status quo to continue Second rating scales can provide a clinician with an enhanced vocabulary or language improving his or her understanding of each patient In the case of the sleep specialist a scale can help him to distinguish fatigue from sleepiness in a patient or elucidate the differences between sleepiness and alertness which is not merely the inverse of the former Sleep scales are developed by researchers and clinicians who have spent years in their field carefully honing their preferred methods for assessing certain brain states or characteristic features of a condition Thus scales provide clinicians with a repertoire of questions allowing them to draw upon the extensive experience of their colleagues when attempting to tease apart nuanced problems Third some scales are helpful for tracking a patient's progress A particular patient may not remember how alert he felt on a series of different stimulant medications Scale assessments administered periodically over the course of treatment provide an objective record of the intervention allowing the clinician to examine and possibly reassess her approach to the patient Finally for individuals conducting a double blind crossover trial or a straightforward clinical practice audit those who are interested in research will find that their own clinics become a source of great discovery Scales provide standardized measures that allow colleagues across cities and countries to coordinate their practices They enable the replication of previous studies and facilitate the organization and dissemination of new research in a way that is accessible and rapid As the emphasis placed on evidence based care grows a clinician's ability to assess his or her own practice and its relation to the wider medical community becomes invaluable Scales make this kind of standardization possible just as they enable the research efforts that help to formulate those standards The majority of Rating Scales in Sleep and Sleep Disorders 100 Scales for Clinical Practice is devoted to briefly discussing individual scales When possible an example of the scale is provided so that readers may gain a sense of the instrument's content

Groundbreaking and the first of its kind to conceptualize and organize the essential scales used in sleep medicine Rating Scales in Sleep and Sleep Disorders 100 Scales for Clinical Practice is an invaluable resource for all clinicians and researchers interested in sleep disorders *Administrative Report H*, 1985 **Everyday humanitarianism in Cambodia** Anne-Meike Fechter, 2023-10-24 Faced with the scale of global challenges such as poverty and inequality one question is where to start Humanitarian efforts can only ever have limited reach Among all of human suffering whom should we support And what shapes our choices Such questions are at the core of this book Through an ethnographic account of moralities it traces how everyday humanitarian practitioners challenge entrenched values of what matters upending the notion that the large scale is inherently important and even questioning what large means in the first place Instead these practitioners typically aim to create a difference in the life of a particular person situating their limited actions within pervasive poverty

**A Textbook of Human Psychology** Hans J. Eysenck, G.D.
