Paul Auster's Writing Machine Evija Trofimova, 2014-08-28 Paul Auster is one of the most acclaimed figures in American literature Known primarily as a novelist Auster s films and various collaborations are now gaining more recognition Evija Trofimova offers a radically different approach to the author s wider body of work unpacking the fascinating web of relationships between his texts and presenting Auster s canon as a rhizomatic facto fictional network produced by a set of writing tools Exploring Auster s literal and figurative use of these tools the typewriter the cigarette the doppelg nger figure the city Evija Trofimova discovers Auster s writing machine a device that works both as a means to write and as a construct that manifests the emblematic writer figure This is a book about assembling texts and textual networks the writing machines that produce them and the ways such machines invest them with meaning Embarking on a scholarly quest that takes her from between the lines of Auster s work to between the streets of his beloved New York and finally to the man himself Paul Auster s Writing Machine becomes not just a critical investigation but a critical collaboration raising important questions about the ultimate meaning of Auster s work and about the relationship between texts their authors their readers and their critics **Mother Jones Magazine** , 1993-01 Mother Jones is an award winning national magazine widely respected for its

groundbreaking investigative reporting and coverage of sustainability and environmental issues **Tobacco Industry and Smoking** Fred C Pampel, Fred C. Pampel, 2009 Praise for the previous edition **Ashes to Ashes** Richard Kluger, 2010-05-26 PULITZER PRIZE WINNER No book before this one has rendered the story of cigarettes mankind's most common self-destructive instrument and its most profitable consumer product with such sweep and enlivening detail A great battleship of a book formidable majestic The New York Times Book Review Here for the first time in a story full of the complexities and contradictions of human nature all the strands of the historical process financial social psychological medical political and legal are woven together in a riveting narrative The key characters are the top corporate executives public health investigators and antismoking activists who have clashed ever more stridently as Americans debate whether smoking should be closely regulated as a major health menace We see tobacco spread rapidly from its aboriginal sources in the New World 500 years ago as it becomes increasingly viewed by some as sinful and some as alluring and by government as a windfall source of tax revenue With the arrival of the cigarette in the late nineteenth century smoking changes from a luxury and occasional pastime to an everyday to some indispensable habit aided markedly by the exuberance of the tobacco huskers This free enterprise success saga grows shadowed from the middle of this century as science begins to understand the cigarette's toxicity Ironically the more detailed and persuasive the findings by medical investigators the more cigarette makers prosper by seeming to modify their product with filters and reduced dosages of tar and nicotine We see the tobacco manufacturers come under intensifying assault as a rogue industry for knowingly and callously plying their hazardous wares while insisting that the health charges against them remain unproven and are universally understood so smokers indulge at their own risk Among the eye-opening disclosures here outrageous pseudo-scientific claims made for cigarettes throughout the 30s and 40s and the story of how the tobacco industry and the National Cancer Institute spent millions to develop a safer cigarette that was never brought to market Dealing with an emotional subject that has generated more heat than light this book is a dispassionate tour de force that examines the nature of the companies culpability the complicity of society as a whole and the shaky moral ground claimed by smokers who are now demanding recompense *Butt Busters* Bert Silva, 2005-08 In 20 years what smoker will legitimately be able to claim that he or she didn't know cigarettes were harmful or addictive And how shocked will a jury really be when it hears that a tobacco executive in the 1960s knew about the addictive nature of cigarettes There's no real evidence that telling kids not to smoke really works Indeed studies have shown that it can often have the opposite effect Children by their very nature love to defy authority and spending millions on advertising to vilify the cigarette could ultimately serve to enhance its appeal The cigarette is and will continue to be forbidden fruit Even though the films of Hollywood's Golden Age once portrayed smoking as a normal activity smoking no longer enjoys such popularity and for good reason An estimated 3.5 million people worldwide still die each year from smoking-related illnesses Through the use of factoids and cartoons author Gilbert M Silva illustrates his belief that smokers

are victims of what is essentially a ridiculous and deadly activity The accompanying health statistics and description of consequences caused by the use of tobacco products are indisputable and they deserve serious consideration Your body will appreciate it don t you think This is certainly an important topic and I want to congratulate you on an entertaining and well produced book Diane Scott Lichter publishing director the American Cancer Society

Putting Health into Place Robin A. Kearns, Wilbert M. Gesler, 1998-06-01 Putting Health into Place draws together original works that collectively argue for a reinvention of medical geography There is a growing interest worldwide in relationships between human health and the experience of place an interest driven both by developments in sociocultural theory and observed health concerns This book is a resource for those wishing to explore or to teach beyond the frontiers of conventional medical geography As the first word of the book s title suggests this is an active volume one that contributes to situating health in the simultaneously tangible negotiated and experienced realities of place Robin A Kearns and Wilbert M Gesler argue that medical issues are a necessary but insufficient focus in developing geographies of health and healing This contention is supported by the authors of the thirteen substantive chapters who convey research findings from the Americas Britain and the Pacific This book represents a collective commitment to exploring links between social and cultural theory ideas about place and discourses on health that will be of interest to readers across the social and health sciences

What's Wrong With Addiction Helen Keane, 2013-04-01 This is an impressive work carefully structured researched and written a refreshingly lucid account that is both intellectually stimulating and professionally helpful Janet McCalman Addicts are generally regarded with either pity or grave disapproval But is being addicted to something necessarily bad These attitudes are explicit both in contemporary medical literature and in popular self help texts We categorise addiction as unnatural diseased and self destructive We demonise pleasure and desire and view the addict as physically and morally damaged Helen Keane s thought provoking text examines these assumptions in a new light In asserting that the wrongness of addiction is not fixed or indeed obvious she presents a refreshing challenge to more conventional accounts of addiction She also investigates the notion that people can be addicted to eating love and sex just as they are to drugs and alcohol What s Wrong with Addiction shows that most of our ideas about addiction take certain ideals of health and normality for granted It exposes strains in our society s oppositions between health and disease between the natural and the artificial between order and disorder and between self and other
