Andy Stern, 2005-10-10 Since oil displaced coal as the fuel of choice a century ago it has been the cause of some of the world's bloodiest conflicts This book examines the role oil has played in these conflicts in the last hundred years It looks at the actions governments and multinational companies have taken to secure their oil supplies since the 1920s often provoking accusations that they promote conflict and support corrupt or violent regimes Oil was an important factor in both world wars Conspiracy theorists believe it also sparked the Suez Crisis the Iran Iraq War the Biafra war and conflicts in Angola and Chad in which oil companies such as Elf Angola and various companies including ExxonMobil Chad are said to have played a murky role The book starts with a look at Empire building and how at the start of the 20th century Britain France and Germany sought to carve up the world's supplies of black gold The clamour for oil intensified during World War II in fact the bombing of Pearl Harbor was allegedly at least in part to prevent Indonesian oil from reaching the US Successive chapters chart the rise of OPEC and the Suez Crisis in 1956 and the Cold War Proxy Wars when the importance of Middle East drew the US and Soviet Union then perceived as the world's superpowers into conflicts between states in the region The book also assesses the power of major oil companies not only the huge environmental devastation they have caused but the local conflicts that have arisen For instance scandals involving the French oil company Elf indicate that it had funded both sides in the civil wars in Angola and the Congo In conclusion the book looks at other sources of oil chiefly in Latin America and sub Saharan Africa What effect will large scale oil extraction have on these regions **To Be Continued** Hope Apple, Merle L. author retraces Mark Twain's footsteps in *The Innocents Abroad* travelling across the Middle East and reflecting on the similarities and differences wrought in the region over the past 150 years Capitalism and Environmental Collapse Luiz Marques, 2020-08-17 This book intends to be an alert to the fact that the curve measuring environmental costs against the economic benefits of capitalism has irreversibly entered into a negative phase. The prospect of an environmental collapse has been evidenced by the sciences and the humanities since the 1960s. Today it imposes its urgency. This collapse differs from past civilizations in that it is neither local nor just civilizational. It is global and occurs at the broadest level of the biosphere, accelerated by the convergence of different socio-environmental crises such as Earth energy imbalance, climate change and global warming, sea level rise, decrease and degradation of forests, collapse of terrestrial and aquatic biodiversity, floods, droughts, wildfires and extreme weather events, degradation of soils and water resources, increase in pollution caused by fossil fuels and coal, increase in waste production and industrial intoxication. The book is divided in two parts. In the first part it presents a comprehensive review of scientific data to show the already visible effects of each of the different environmental crises and its consequences to human life on Earth. In the second part Luiz Marques critically discusses what he calls the three concentric illusions that prevent us from realizing the gravity of the current socio-environmental crises: the illusion of a sustainable capitalism, the illusion that economic growth is still capable of providing more well-being, and the anthropocentric illusion. Finally Marques argues that fitting back into the biosphere will only be possible if we dismantle the expansive socioeconomic gear that has shaped our societies since the 16th century by moving from a Social Contract to a Natural Contract which takes into account the whole biosphere. According to him the future society will be post-capitalist or it will not be a complex society and even perhaps we must fear no society at all. This book is backed up with the latest and best science and has made the complexities understandable for the average reader, all in a context of hope for the future. William J. Ripple, PhD Distinguished Professor of Ecology, Director of the Alliance of World Scientists, Oregon State University Public Culture Marguerite S. Shaffer, 2012-04-17 In the United States today many people are as likely to identify themselves by their ethnicity or region as by their nationality. In this country with its diversity and inequalities, can there be a shared public culture? Is there an unbridgeable gap between cultural variety and civic unity, or can public forms of expression provide an opportunity for Americans to come together as a people? In *Public Culture: Diversity, Democracy and Community in the United States* an interdisciplinary group of scholars addresses these questions while considering the state of American public culture over the past one hundred years. From medicine shows to the Internet, from the Los Angeles Plaza to the Las Vegas Strip, from the commemoration of the Oklahoma City bombing to television programming after 9/11, public sights and scenes provide ways to negotiate new forms of belonging in a diverse postmodern community. By analyzing these cultural phenomena, the essays in this volume reveal how mass media, consumerism, increased privatization of space and growing political polarization have transformed public culture and the very notion of the American public. Focusing on four central

themes public action public image public space and public identity and approaching shared culture from a range of disciplines including mass communication history sociology urban studies ethnic studies and cultural studies Public Culture offers refreshing perspectives on a subject of perennial significance *Forgetting Children Born of War* Charli Carpenter, 2010-05-31 Sexual violence and exploitation occur in many conflict zones and the children born of such acts face discrimination stigma and infanticide Yet the massive transnational network of organizations working to protect war affected children has for two decades remained curiously silent on the needs of this vulnerable population Focusing specifically on the case of Bosnia Herzegovina R Charli Carpenter questions the framing of atrocity by human rights organizations and the limitations these narratives impose on their response She finds that human rights groups set their agendas according to certain grievances the claims of female rape victims or the complaints of aggrieved minorities for example and that these concerns can overshadow the needs of others Incorporating her research into a host of other conflict zones Carpenter shows that the social construction of rights claims is contingent upon the social construction of wrongs According to Carpenter this pathology prevents the full protection of children born of war **Want, Waste or War?** Philip Andrews-Speed, Raimund Bleischwitz, Tim Boersma, Corey Johnson, Geoffrey Kemp, Stacy D. VanDeveer, 2014-11-13 In addition to environmental change the structure and trends of global politics and the economy are also changing as more countries join the ranks of the world's largest economies with their resource intensive patterns The nexus approach conceptualized as attention to resource connections and their governance ramifications calls attention to the sustainability of contemporary consumer resource use lifestyles and supply chains This book sets out an analytical framework for understanding these nexus issues and the related governance challenges and opportunities It sheds light on the resource nexus in three realms markets interstate relations and local human security These three realms are the organizing principle of three chapters before the analysis turns to crosscutting case studies including shale gas migration lifestyle changes and resource efficiency nitrogen fertilizer and food systems water and the Nile Basin climate change and security and defense spending The key issues revolve around competition and conflict over finite natural resources The authors highlight opportunities to improve both the understanding of nexus challenges and their governance They critically discuss a global governance approach versus polycentric and multilevel approaches and the lack of those dimensions in many theories of international relations *Killing the Planet* Rodney Howard-Browne, Paul L. Williams, 2019-11-05 In *Killing the Planet* How A Financial Cartel Doomed Mankind best selling authors Rodney Howard Browne and Paul L Williams investigate the true motives and consequences of the Pilgrim Society Early members of the Society included J P Morgan Andrew Carnegie Andrew Mellon Cornelius Vanderbilt Paul Warburg Mortimer I Schiff Otto Kahn and John D Rockefeller Although the Pilgrim Society and the powerful men involved are often praised for their philanthropic actions Howard Browne and Williams show that the Society was self serving and subjected the American people to a brutal system of economic tyranny one which is still in place today As a sequel to *The*
