Snow Leopards in Nepal Pavel Kindlmann, 2022-09-30 Snow leopard *Panthera uncia* is an endangered species and its population size is steadily declining The main threats to the snow leopard include illegal trade conflict with locals human snow leopard conflict lack of conservation awareness and policy and climate change To avoid its extinction we badly need a good knowledge of its ecology distribution and population dynamics including interactions with its prey which will take into account various scenarios of changes in climate and human impact on snow leopard This book aims to put together a considerable amount of unpublished

data collected by the co author of most of the chapters Bikram Shrestha which might be useful for other researchers working on snow leopard In addition researchers might find it useful to have a key for determining the diet of snow leopard based on remnants of its food in its scats Last but not least based on the difficulty we experienced trying to compare and combine different sets of results we propose a general methodology for collecting data Thus this book is not an all encompassing compendium but an attempt to fill some gaps in the literature and to show how to publish new data on snow leopard in a useful and workable way The first part describing the main features of snow leopard and its main prey ecology is followed by a comprehensive review of data available on its abundance and threats to its survival The third most extensive part the substance of the book presents new data from 15 years of intensive camera trapping combined with scat sampling These data are analyzed by means of advances GIS and genetic techniques which yields a large amount of conservation implications The purpose of this book is to provide a tool for both environmental managers and researchers to find quickly what is known about this species for conservation planning and for an effective protection of snow leopard However enthusiasts interested in wild cats may welcome the book too

Snow Leopard (Panthera Uncia). , As part of Kids Planet Defenders of Wildlife presents a fact sheet on the Snow Leopard Panthera uncia which is an endangered species The snow leopard is a solitary animal that lives in the high mountains of central Asia The fact sheet provides a description of the leopard and highlights information on such topics as the lifespan size range diet behavior and offspring of the leopard

The Snow Leopard and the Goat Shafqat Hussain,2020-01-10 Who should bear the cost of protecting charismatic wildlife Following the downgrading of the snow leopard s status from endangered to vulnerable by the International Union for Conservation of Nature in 2017 debate has renewed about the actual number of snow leopards in the wild and the most effective strategies for coexisting with these enigmatic animals Evidence from Pakistan and other countries in the snow leopard s home range shows that they rely heavily on human society domestic livestock accounts for as much as 70 percent of their diet Maintaining that the snow leopard is a wild animal conservation NGOs and state agencies have enacted laws that punish farmers for attacking these predators while avoiding engaging with efforts to mitigate the harms suffered by farmers whose herds are reduced by snow leopards This ethnography examines the uneven distribution of costs and benefits involved in snow leopard conservation and shows that for the conservation of nature to be successful the vision interests and priorities of those most affected by conservation policies in this case local farmers must be addressed A case history of Project Snow Leopard in the mountains of northern Pakistan which inspired similar programs in India Bhutan Nepal Mongolia Afghanistan and Tajikistan describes how the animal s food habits are studied how elusive individuals are counted and how a novel kind of snow leopard insurance has protected the species by compensating farmers for livestock losses The Snow Leopard and the Goat demonstrates that characterizing this conflict as one between humans farmers and wildlife snow leopards is misleading as the real conflict is between two human groups farmers and conservationists who see the snow leopard differently
