A chronicle of snow crystal creation from the Caltech physicist known as the world's leading snowflake expert and consultant for the movie *Frozen*. Snowflakes may be an everyday common subject but you've never seen them like this. A collection of amazing photography of snow crystals using a unique system designed to take super detailed micro images of these miniature ice masterpieces. The Snowflake is an extraordinary look at a seemingly ordinary object. Author Kenneth Libbrecht, a physics professor at Caltech and the pre-eminent snow crystal researcher, discusses the physics and mythology of snow and how snow crystals are made. Photographer Patricia Rasmussen presents remarkable color micro photography of snowflakes and also discusses the history of snow crystal micro photography as invented by farmer Wilson Bentley. What better way to teach your children to truly appreciate the beauty of nature than seeing snow with their own eyes and then going on this journey with *The Snowflake Winter's Frozen Artistry*. Nothing else shows the miracle that is nature better than this book. The Palmetto Queen blog **The Snowflake** Kenneth George Libbrecht Patricia Rasmussen, 2003

[The Art of the Snowflake](#) Kenneth Libbrecht, 2007-10-15 The perfect geometry and exquisite beauty of nature is nowhere so clear to us as in the snowflake. But how have we been able to appreciate this infinitesimal wonder in all its crystalline glory? This book, as much a work of art as a testament to science, reveals how one of the snowflake's most inspired photographers came to such intimate knowledge of his craft and its fleeting focus. Beautiful pictures illustrate Kenneth Libbrecht's story of the microphotography of snow crystals from the pioneering work of Wilson Bentley in the 1890s right up to Ken's own innovations in our age of digital images. A breathtaking look at the works of art that melt in an instant, this is a book to page through and savor season after season. *The Little Book of Snowflakes* Kenneth

activities for a variety of learners **Teaching STEM in the Early Years** Sally Moomaw,2013-03-19 Weave STEM activities into young children s daily experiences for well rounded learning **Why Think?** Ronald de Sousa,2007-06-25 In a world where natural selection has shaped adaptations of astonishing ingenuity what is the scope and unique power of rational thinking In this short but wide ranging book philosopher Ronald de Sousa looks at the twin set of issues surrounding the power of natural selection to mimic rational design and rational thinking as itself a product of natural selection While we commonly deem ourselves superior to other species the logic of natural selection should not lead us to expect that nature does everything for the best Similarly rational action does not always promote the best possible outcomes So what is the difference Is the pursuit of rationality actually an effective strategy Part of the answer lies in language including mathematics and science Language is the most striking device by which we have made ourselves smarter than our nearest primate cousins Sometimes the purely instinctual responses we share with other animals put explicit reasoning to shame the movements of a trained athlete are faster and more accurate than anything she could explicitly calculate Language however with its power to abstract from concrete experience and to range over all aspects of nature enables breathtakingly precise calculations which have taken us to the moon and beyond Most importantly however language enables us to formulate an endless multiplicity of values in potential conflict with one another as well as with instinctual imperatives In short this sophisticated and entertaining book shows how our rationality and our irrationality are inextricably intertwined Ranging over a wide array of evidence it explores the true ramifications of being human in the natural world Brain-Compatible Science Margaret Angermeyer Mangan,2015-04-28 Gain fresh insights for teaching learning and assessing knowledge of critical science concepts through the exploration of research based practices for science education
