On Believing David Hunter, 2022-03-31 Developing original accounts of the many aspects of belief On Believing puts the believer at the heart of the story Hunter argues that to believe something is to be in position to do think and feel things in light of a possibility whose obtaining would make one right The logical aspect is that being right depends only on whether that possibility obtains The psychological one concerns how that possibility can rationalise what one does thinks and feels But Hunter argues beliefs are not causes capacities or dispositions Rather believing rationalises because possibilities are potential reasons Hunter also denies that believing is a form of representing The objects of belief are possibilities not representations and belief states are not themselves true or false Hunter defends this modal view against familiar objections and explores how objective and subjective limits to belief generate credal illusions and ground credal necessities Developing a novel account of the normativity of belief he argues that voluntary acts of inference make us responsible for our beliefs While denying that believing is intrinsically normative Hunter grounds the ethics of belief in attributive goodness Believing something is to our credit when it shows us to be good in some way and what we ought to believe depends on what we ought to know and not on the evidence we have The ethics of belief Hunter argues concern how a believer ought to be positioned in a world of possibilities
