Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-09-27 In recent years textbooks have been widely criticized for low standards lack of imaginativeness and insensitivity to racial and gender issues Increasingly they are cited as another weak link in American public education This book goes beyond the headlines to examine how textbooks are produced how they are selected and what pressures are placed on textbook authors and publishers The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy the determinants of textbook content the role of textbooks in educational reform and the process of selection at the state level The authors offer current research on textbook policy including perspectives from those directly involved with textbooks from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction The Economics Anti-Textbook Rod Hill, Professor Tony Myatt, 2010-03-11 Mainstream textbooks present economics as an objective science free from value judgements that settles disputes by testing hypotheses that applies a pre-determined body of principles and contains policy prescriptions supported by a consensus of professional opinion The Economics Anti Textbook argues that this is a myth one which is not only dangerously misleading but also bland and boring It challenges the mainstream textbooks assumptions arguments models and evidence It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study one which is more an art of persuasion than it is a science The Economics Anti Textbook's chapters parallel the major topics in the typical text beginning with a boiled down account of them before presenting an analysis and critique Drawing on the work of leading economists the Anti Textbook lays

bare the blind spots in the texts and their sins of omission and commission It shows where hidden value judgements are made and when contrary evidence is ignored It shows the claims made without any evidence and the alternative theories that aren't mentioned It shows the importance of power social context and legal framework The Economics Anti Textbook is the students guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on Chemistry in the Community American Chemical Society,2006-01-31 This laboratory based text centres itself around decision making activities where students apply their chemistry knowledge to realistic situations This fifth edition includes more photographs new drawings and new design *Foundations of Nursing in the Community - E-Book* Marcia Stanhope,Jeanette Lancaster,2013-10-15 With concise focused coverage of community health nursing Foundations of Nursing in the Community Community Oriented Practice 4th Edition provides essential information for community practice from nursing roles and care settings to vulnerable population groups The book uses a practical community oriented approach and places an emphasis on health promotion and disease prevention Practical application of concepts is highlighted throughout the text in case studies critical thinking activities QSEN competencies and Healthy People 2020 objectives Evidence Based Practice boxes highlight current research findings their application to practice and how community public health nurses can apply the study results Levels of Prevention boxes identify specific nursing interventions at the primary secondary and tertiary levels to reinforce the concept of prevention as it pertains to community and public health care Focus on health promotion throughout the text emphasizes initiatives strategies and interventions that promote the health of the community Clinical Application scenarios offer realistic situations with questions and answers to help you apply chapter concepts to practice in the community Case Studies provide client scenarios within the community public health setting to help you develop assessment and critical thinking skills What Would You Do boxes present problem solving challenges that encourage both independent and collaborative thinking required in community settings How To boxes offer specific instructions on nursing interventions NEW QSEN boxes illustrate how quality and safety goals competencies objectives knowledge skills and attitudes can be applied in nursing practice in the community NEW Feature box on Linking Content to Practice highlights how chapter content is applied in the role of public community health nursing NEW Healthy People 2020 objectives in every chapter address the health priorities and emerging health issues expected in the next decade

Anti-Textbook Rod Hill, Tony Myatt, 2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students **The American Community College** Carrie B.
