Canal Irrigation in Prehistoric Mexico William E. Doolittle, 2014-07-03 Prehistoric farmers in Mexico invented irrigation developed it into a science and used it widely Indeed many of the canal systems still in use in Mexico today were originally begun well before the discovery of the New World In this comprehensive study William E Doolittle synthesizes and extensively analyzes all that is currently known about the development and use of irrigation technology in prehistoric Mexico from about 1200 B C until the Spanish conquest in the sixteenth century A D Unlike authors of previous studies who have focused on the political economic and social implications of irrigation Doolittle considers it in a developmental context He examines virtually all the known systems from small canals that diverted runoff from ephemeral mountain streams to elaborate networks that involved numerous large canals to irrigate broad valley floors with water from perennial rivers Throughout the discussion he gives special emphasis to the technological elaborations that distinguish each system from its predecessors He also traces the spread of canal technology into and through different ecological settings This research substantially clarifies the relationship between irrigation technology in Mexico and the American Southwest and argues persuasively that much of the technology that has been attributed to the Spaniards was actually developed in Mexico by indigenous people These findings will be important not only for archaeologists working in this area but also for geographers historians and engineers interested in agriculture technology and arid lands

A Selected Guide to the Literature of the Flowering Plants of Mexico Ida Kaplan Langman, 2018-01-09 This bibliography is a guide to the literature on Mexican flowering plants beginning with the days of the discovery and conquest of Mexico by the Spaniards in the early sixteenth century [Hinterlands to Cities](#)

Matthew C. Pailles, Michael T. Searcy, 2022-03-14 This approachable book in the SAA Press Current Perspectives Series is a comprehensive synthesis of Northwest Mexico from the US border to the Mesoamerican frontier Filling a vital gap in the regional literature it serves as an essential reference not only for those interested in the specific history of this area of Mexico but western North America writ large A period by period review of approximately 14 000 years reveals the dynamic connections that knitted together societies inhabiting the Sea of Cortez coast the Sonoran and Chihuahuan Deserts and the Sierra Madre Occidental Networks of interaction spanned these diverse ecological topographical and cultural terrains in the millennia following the demise of the megafauna The authors provide a fresh perspective that refutes depictions of the Northwest as a simple filter or conduit of happenings to the north or south and they highlight the role local motivations and dynamics played in facilitating continental scale processes

Missions Begin with Blood Brandon Bayne, 2021-10-26 Winner 2022 Frank S and Elizabeth D Brewer Prize While the idea that successful missions needed Indigenous revolts and missionary deaths seems counterintuitive this book illustrates how it became a central logic of frontier colonization in Spanish North America *Missions Begin with Blood* argues that martyrdom acted as a

ceremony of possession that helped Jesuits understand violence disease and death as ways that God inevitably worked to advance Christendom Whether petitioning superiors for support preparing to extirpate Native idolatries or protecting their conversions from critics Jesuits found power in their persecution and victory in their victimization This book correlates these tales of sacrifice to deep genealogies of redemptive death in Catholic discourse and explains how martyrological idioms worked to rationalize early modern colonialism Specifically missionaries invoked an agricultural metaphor that reconfigured suffering into seed that when watered by sweat and blood would one day bring a rich harvest of Indigenous Christianity
