The Limits of Labour David Bright, 2011-11-01 In a few short decades before the First World War Calgary was transformed from a frontier outpost into a complex industrial metropolis With industrialization there emerged a diverse and equally complex working class David Bright explores the various levels of class formation and class identity in the city to argue that Calgary s reputation as a prewar centre of labour conservatism is in need of revision Bright also delineates the trials of the Calgary labour movement in the 1920s Internal divisions and dissent prevented the movement from realizing the potential strength of the working class

Instead even as local capitalism restructured itself political and industrial labour organizations wilfully fragmented their own base of support In particular they failed to address the concerns and needs of the growing number of unemployed in the city a neglect that foreshadowed events of the 1930s This failure left the labour movement unable to meet the challenge of the Great Depression In part at least the demise of labour as a viable political alternative in Calgary paved the way for the rise of Social Credit Using Calgary as a model The Limits of Labour reasserts the need to place class formation at the heart of the development of western Canada and provides an historical context to the renewed struggle of labour for social justice in the 1990s

The Middling Sort of People Jonathan Barry, Christopher Brooks, 1994-10-26 This volume of essays seeks to offer a radical re evaluation of most of our preconceptions about the early modern English social order The majority of people who lived in early modern England were neither very rich nor very poor yet a disproportionate amount of historiography has been directed towards precisely these groups This book intends to define the term middle classes and treat them as active participants of history rather than as a simple by product rising and falling according to others activities

Class Struggles Dennis L. Dworkin, 2014-05-22 In the 1960s and 1970s the study of history and sociology was heavily

influenced by Marxism and theories of class But the collapse of Communism and significant changes in culture and society threw the study of class into crisis Its most basic premises were called into question More recently accelerating globalisation proliferating multinational corporations and unbridled free market capitalism have given the study of class a new significance and caused historians and sociologists to revisit the debate This book looks at the changes that caused the crisis in the study of class and shows how new vibrant theories have appeared that will drive forward our understanding of history and sociology

The English Novel In History 1840-1895 Elizabeth Ermarth,2006-09-07 The construction of history as a social common denominator is a powerful achievement of the nineteenth century novel a form dedicated to experimenting with democratic social practice as it conflicts with economic and feudal visions of social order Through revisionary readings of familiar nineteenth century texts *The English Novel in History 1840 1895* takes a multidisciplinary approach to literary history It highlights how narrative shifts from one construction of time to another and reformulates fundamental ideas of identity nature and society Elizabeth Ermarth discusses the range of novels alongside other cultural material including painting science religious political and economic theory She explores the problems of how a society as defined in democratic terms can accommodate political gender and class differences without resorting to hierarchy and how narrowly conceived economic agendas compete with social cohesion Students advanced undergraduates postgraduates and specialists will find this text invaluable

Historical Introduction to the Private Law of Rome James Muirhead,1916 [Class](#) Ulrika Holgersson,2016-08-31 There is hardly any discussion of class that does not in some way relate to the theories of Marx and Weber So profound was the impact of their ideas that their writings are often perceived as the only original and most reliable interpretations of class society But Marx and Weber were neither the first nor last to talk about class and they did so based on the specific conditions prevalent in their own communities *Class* explains this complex field using cultural sociological and feminist perspectives It deepens our understanding of the problems of class and uses illuminating examples from media popular culture and literature that explain current class analysis *Class* is an elegant lucid comprehensive introduction that broadens our understanding of the concept and the immense power that it exerts by way of in and exclusions [The Poverty of Planning](#) Benno Engels,2021-01-15 Using a neo Marxian perspective Benno Engels examines the absence of urban planning in nineteenth century England In his analysis of urbanization in England Engels considers the influences of property owners inheritance laws local government structures fiscal crises of the local and central state shifts in voter sentiments fluctuating economic conditions and class based pressure group activity

The New Politics of Class Geoffrey Evans,James Tilley,2017-02-16 This book explores the new politics of class in 21st century Britain It shows how the changing shape of the class structure since 1945 has led political parties to change which has both reduced class voting and increased class non voting This argument is developed in three stages The first is to show that there has been enormous social continuity in class divisions The authors demonstrate this using extensive evidence on class and educational inequality

perceptions of inequality identity and awareness and political attitudes over more than fifty years The second stage is to show that there has been enormous political change in response to changing class sizes Party policies politicians rhetoric and the social composition of political elites have radically altered Parties offer similar policies appeal less to specific classes and are populated by people from more similar backgrounds Simultaneously the mass media have stopped talking about the politics of class The third stage is to show that these political changes have had three major consequences First as Labour and the Conservatives became more similar class differences in party preferences disappeared Second new parties most notably UKIP have taken working class voters from the mainstream parties Third and most importantly the lack of choice offered by the mainstream parties has led to a huge increase in class based abstention from voting Working class people have become much less likely to vote In that sense Britain appears to have followed the US down a path of working class political exclusion ultimately undermining the representativeness of our democracy They conclude with a discussion of the Brexit referendum and the role that working class alienation played in its historic outcome
