McDonald,2015-08-13 Offers a comprehensive framework for maintaining and strengthening the supporting bonds between cities and nature through innovative infrastructure projects After presenting a broad approach to incorporating natural infrastructure priorities into urban planning the author focuses each following chapter on a specific ecosystem service

The Conservation of Cities Unesco,1975 *Historic Cities* Jeff Cody,Francesco Siravo,2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities This book the eighth in the Getty Conservation Institute s Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

Conservation and Sustainability in Historic Cities Dennis Rodwell,2008-04-15 Conservation and Sustainability in Historic Cities examines how the two key issues of urban conservation and sustainability relate to each other in the context of historic cities and how they can be brought together in a common philosophy and practice that is mutually supportive It sets out the theoretical and practical background to architectural conservation and how its perceived relevance and level of attainment can be extended when harnessed to wider agendas of sustainability and cultural identity It tests the achievement of urban conservation through examples from across Europe and further afield and relates them to the sustainability agenda

Building Resilient Cities in China: The Nexus between Planning and Science Xueming Chen,Qisheng Pan,2015-05-20 This book discusses a range of planning and management issues related to building urban resiliency It covers such topics as urban environmental and transportation planning historical preservation emergency relief and management geographic information systems GIS and other technological applications The book includes case studies of several cities and districts in China including Shanghai and a number of cities in the United States of America Urban resiliency in the face of uncertainty is a priority for planning and governance in communities worldwide In China which has suffered many of the world s most devastating floods earthquakes and typhoons preparing for the threat of disaster has long been an important planning

objective Recent calamities such as the 2008 Winter Storms the 2008 Wenchuan Earthquake and the 2012 Beijing Floods have only made planning for resiliency more urgent As planners work to prepare for such events interdisciplinary collaboration becomes increasingly important Planners need the tools and insights offered by other fields including both the natural and social sciences At the same time these interdisciplinary relationships help shape the identity of urban rural planning in its new role as one of China s primary academic disciplines Thus the nexus between planning and science is critically important in building resilient cities in China and the Chinese planning experience can serve as an example to and benefit countries around the world

Port Cities of the Atlantic World Jacob Steere-Williams,Blake C. Scott,2023-12-14 Traces the maritime routes and the historical networks that link port cities around the Atlantic world Port Cities of the Atlantic World brings together a collection of essays that examine the centuries long transatlantic transportation of people goods and ideas with a focus on the impact of that trade on what would become the American South Employing a wide temporal range and broad geographic scope the scholars contributing to this volume call for a sea facing history of the South one that connects that terrestrial region to this expansive maritime history By bringing the study up to the 20th century in the collection s final section the editors Jacob Steere Williams and Blake C Scott make the case for the lasting influence of these port cities and Atlantic world history on the economy society and culture of the contemporary South
