**The Construction of Space in Early China** Mark Edward Lewis, 2012-02-01 This book examines the formation of the Chinese empire through its reorganization and reinterpretation of its basic spatial units the human body the household the city the region and the world The central theme of the book is the way all these forms of ordered space were reshaped by the project of unification and how at the same time that unification was constrained and limited by the necessary survival of the units on which it was based Consequently as Mark Edward Lewis shows each level of spatial organization could achieve order and meaning only within an encompassing superior whole the body within the household the household within the lineage and state the city within the region and the region within the world empire while each level still contained within itself the smaller units from which it was formed The unity that was the empire's highest goal avoided collapse back into the original chaos of nondistinction only by preserving within itself the very divisions on the basis of family or region that it claimed to transcend

**The Early Chinese Empires** Mark Edward Lewis,2010-10-30 In 221 BC the First Emperor of Qin unified what would become the heart of a Chinese empire whose major features would endure for two millennia In the first of a six volume series on the history of imperial China Lewis highlights the key challenges facing court officials and scholars who set about governing an empire of such scale and diversity **The Shaman and the Heresiarch** Gopal Sukhu,2012-08-08 The Li sao also known as Encountering Sorrow attributed to the poet statesman Qu Yuan 4th 3rd century BCE is one of the cornerstones of the Chinese poetic tradition It has long been studied as China s first extended allegory in poetic form yet most scholars agree that there is very little in the two thousand year old tradition of commentary on it that convincingly explains its supernatural flights its complex floral imagery or the gender ambiguity of its primary poetic persona The Shaman and the Heresiarch is the first book length study of the Li sao in English offering new translations of both the Li sao and the Nine Songs The book traces the shortcomings of the earliest extant commentary on those texts that of Wang Yi back to the quasi divinatory methods of the highly politicized tradition of Chinese classical hermeneutics in general and the political machinations of a Han dynasty empress dowager in particular It also offers an entirely new interpretation of the Li sao one based not on Qu Yuan hagiography but on what late Warring States period artifacts and texts including recently unearthed texts teach us about the cultural context that produced the poem In that light we see in the Li sao not only a reflection of the era of the great classical Chinese philosophers but also the breakdown of the political religious order of the ancient state of Chu *Battlefronts Real and Imagined* D. Wyatt,2008-05-12 This collection examines the cultural and intellectual dimensions of war and its resolution between Han Chinese and the various ethnically dissimilar peoples surrounding them during the crucial middle period of Chinese history **A History of the World in 12 Maps** Jerry Brotton,2014-10-28 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to

administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph
