

## Vaccines are safe

All vaccines available in Australia have been assessed by the Therapeutic Goods Administration to ensure they are safe and effective before they are approved for use. Their safety continues to be monitored once in use.

All vaccines used in Australia provide benefits that far outweigh any risks.

It is safer to be vaccinated than get the disease.

## Vaccination records

Your child's vaccinations should be recorded in their Personal Health Record booklet given at birth.

Your vaccination provider will also record their vaccinations on the Australian Immunisation Register (AIR).

You can get your child's Immunisation History Statement from the AIR by:

- going to my.gov.au and logging in to access your Medicare online account or using the Express Plus Medicare mobile app
- calling Services Australia on 1800 653 809 to request a copy
- asking your vaccination provider to print a copy for you.

## MORE INFORMATION

- talk to your vaccination provider
- visit [health.gov.au/childhoodimmunisation](http://health.gov.au/childhoodimmunisation)
- contact your state or territory health department.

Should Vaccinations Be Mandatory? Roman Espejo, 2014-04-17 Vaccines are meant to help us but there are contrary ideas as to whether vaccines are the best alternative Supporters say that vaccines prevent deadly and serious diseases including rubella diphtheria smallpox polio and whooping cough People against vaccination believe that children s immune systems can deal with most infections naturally They point out that injecting questionable vaccine ingredients into a child may cause side effects including seizures paralysis and death This book examines the importance of childhood vaccinations for public health weighing concerns about

the risks of vaccines against the consequences of not vaccinating It explores the issue of mandating vaccinations in the context of personal and religious freedom and discusses the likelihood that the HPV vaccine will encourage early sexual activity
