Ghosts in the Dating App Machine Gregory Narr, 2025-10-28 Ghosts in the Dating App Machine offers a critical examination of the shift to dating apps to illustrate key features of a broader shift to a mode of data colonialism based on datafication and AI orchestration This book analyses 48 in depth and mediated interviews forums blogs and official statements made by dating apps It situates this transition within the broader culture of data colonialism through close readings of science fiction suggesting the world has become like Us where doppelgangers constituted from reprehensible proclivities have emerged as digital profiles reflected back to users through the horrific play of social media mirrors to govern their encounters against their wishes These mirrors allow media companies to conduct surreptitious experiments on users dispossessed desires devise digital doppelgangers from those they disavow and compel behaviors that are lucrative precisely because they are misaligned with humane values Yet this horrific play of mirrors is not inevitable By attending to the ghosts of colonialism unleashed by media companies through the approach developed in this book it is still possible to galvanize the collective will to combat data colonialism and strive to create a world where love disentangled from colonial modes of desire is possible This study will interest scholars attempting to understand the rapidly evolving ecology of dating apps within the areas of digital media media sociology cultural studies anthropology and media and communication studies

The Dating Blueprint Jason Evert, 2019-10-11 Women don t feel comfortable telling a man what they wish he knew about dating He s expected to know it Unfortunately the only time men

receive specific guidelines is when they're being told what they're not supposed to do. As a result, very few know what they are supposed to do. What men want is a clear blueprint. Imagine how much simpler dating would be if women could just speak their minds. Therefore, Jason Evert surveyed more than a thousand women and asked them questions such as: How would you want a man to ask you out? How do you not want to be asked on a date? This book reveals their surprising answers plus: How to know if she's the right one? Where women don't want to go on a first date? What word they want a man to say when he asks? When, where, and how he should ask? What she hopes the date will include? How a man can save his marriage before he's married? Dating doesn't need to become a relic of the past. It needs to be revived. For this to happen, men need to put down their screens, look a woman in the eye, and ask her on a date. *The Dating Blueprint* explains how. **Hardware**, 1899

Code of Federal Regulations, 1976. Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries. Voices from a Black Heart Speak Rosetta Hopkins, 2005-08. Expressed through poetry, essays, and short stories, *Voices from a Black Heart Speak* examines deep-seated beliefs, perspectives, and emotional feelings derived from the cultural development of black people in the United States. We live in a world where television tells us what to want, how we want to live, and what we want to do. We live in a world where fear of the unknown is to be feared, and that's considered normal. It may be considered normal and acceptable, but it's totally irrational as our entire lives and world is based on the unknown. We slide through life on a hope and wish that our lives work out as we planned them. If we look at the major earthquake in the Indian Ocean on December 26, 2004, that created a Tsunami or Great Wave that killed over 100,000 people and destroyed towns, cities, and property in the billions in Asia, we can realize the truth of the fact is that we live our lives in the unknown from moment to moment. The one thing that sustains us is our faith as we journey through life. Landslides: Detection, Prediction and Monitoring P. Thambidurai, T. N. Singh, 2023-03-02. This book intends to decipher the knowledge in the advancement of understanding detecting, predicting, and monitoring landslides. International experts provide their experience in landslide research and practice to help stakeholders mitigate and predict potential landslides. The book comprises chapters on Dynamics, mechanisms, and processes of landslides; Geological, geotechnical, hydrological, and geophysical modelling for landslides; Mapping and assessment of hazard, vulnerability, and risk associated with landslides; Monitoring and early warning of landslides; Application of remote sensing and GIS techniques in monitoring and assessment of landslides. The book will be of interest to researchers, practitioners, and decision makers in adapting suitable modern techniques for landslide study.
