The Dawn Of Empire Romes Rise To World Power By Errington Robert Malcolm:

The Cave and the Light Arthur Herman, 2014-06-03 The definitive sequel to New York Times bestseller *How the Scots Invented the Modern World* is a magisterial account of how the two greatest thinkers of the ancient world Plato and Aristotle laid the foundations of Western culture and how their rivalry shaped the essential features of our culture down to the present day Plato came from a wealthy connected Athenian family and lived a comfortable upper class lifestyle until he met an odd little man named Socrates who showed him a new world of ideas and ideals Socrates taught Plato that a man must use reason to attain wisdom and that the life of a lover of wisdom a philosopher was the pinnacle of achievement Plato dedicated himself to living that ideal and went on to create a school his famed Academy to teach others the path to enlightenment through contemplation However the same Academy that spread Plato's teachings also fostered his greatest rival Born to a family of Greek physicians Aristotle had learned early on the value of observation and hands on experience Rather than rely on pure contemplation he insisted that the truest path to knowledge is through empirical discovery and exploration of the world around us Aristotle Plato's most brilliant pupil thus settled on a philosophy very different from his instructor's and launched a rivalry with profound effects on Western culture The two men disagreed on the fundamental purpose of the philosophy For Plato the image of the cave summed up man's destined path emerging from the darkness of material existence to the light of a higher and more spiritual truth Aristotle thought otherwise Instead of rising above mundane reality he insisted the philosopher's job is to explain how the real world works and how we can find our place in it Aristotle set up a school in Athens to rival Plato's Academy the Lyceum The competition that ensued between the two schools and between Plato and Aristotle set the world on an intellectual adventure that lasted through the Middle Ages and Renaissance and that still continues today From Martin Luther who named Aristotle the third great enemy of true religion after the devil and the Pope to Karl Marx whose utopian views rival Plato's heroes and villains of history have been inspired and incensed by these two master philosophers but never outside their influence Accessible riveting and eloquently written *The Cave and the Light* provides a stunning new perspective on the Western world certain to open eyes and stir debate Praise for *The Cave and the Light* A sweeping intellectual history viewed through two ancient Greek lenses breezy and enthusiastic but resting on a sturdy rock of research Kirkus Reviews Examining mathematics politics theology and architecture the book demonstrates the continuing relevance of the ancient world Publishers Weekly A fabulous way to understand over two millennia of history all in one book Library Journal Entertaining and often illuminating The Wall Street Journal *International Law in Antiquity* David J. The Pre-Islamic Middle East Martin Sicker,2000-04-30 Sicker explores the political history of the Middle East from antiquity to the Arab conquest from a geopolitical perspective He argues that there are a number of relatively constant environmental factors that have helped condition not determine the course of Middle Eastern political history from ancient times to the present These factors primarily but not exclusively geography and topography contributed heavily to establishing the patterns of state development and interstate relations in the Middle East that have remained remarkably consistent throughout the troubled history of the region In addition to geography and topography the implications of which are explored in depth religion has also played a major political role in conditioning the pattern of Middle Eastern history The Greeks first introduced the politicization of religious belief into the region in the form of pan Hellenism which essentially sought to impose Greek forms of popular religion and culture on the indigenous peoples of the region as a means of solidifying Greek political control This ultimately led to religious persecution as a state policy Subsequently the Persian Sassanid Empire adopted Zoroastrianism as the state religion for the same purpose and with the same result Later when Armenia adopted Christianity as the state religion followed soon after by the Roman Empire religion and the intolerance it tended to breed became fundamental ingredients in regional politics and have remained such ever since Sicker shows that the political history of the pre Islamic Middle East provides ample evidence that the geopolitical and religious factors conditioning political decision making tended to promote military solutions to political problems making conflict resolution through war the norm with the peaceful settlement of disputes quite rare A sweeping synthesis that will be of considerable
