exported to and from North America provides some better examples of sport's international power. It also creates a very new kind of sport celebrity albeit one that often shows a rather limited reach beyond that star's own country or continent. Thus rather than focusing on the Western Hemisphere this collection of some of world sport's most heralded celebrities including stars of Motocross surfing distance running and more serves as a sort of passport to many places that make up our global sporting environment.

Television/Death Helen Wheatley, 2024-04-30

Television Death intertwines the study of death, dying and bereavement on television with discussion of the ways that television and the TV archive provides access to the dead. Section One looks at the representation of death, dying and the afterlife on television in historical and contemporary factual television from around the world and in US television drama. Section Two focuses on dramas of grief and bereavement and discusses how the long form seriality and narrative complexity of television from family melodramas to the ghost serial allows for an emotionally realist representation of experiences of grief, bereavement and death-related trauma. Finally, Section Three proposes that television has been overlooked in critical analyses of recorded sounds and images, propensity to bring back the dead. It argues that television is the posthumous medium par excellence and looks at how the dead return via incorporation into new television programmes or through projects to bring television out of the archive.

CEO OF MY TIME FOR BEING A..I Rajeev Nalawadi, 2023-07-06 Each one of us has a perception of reality that is shaped by a number of factors such as our senses, our experiences, our beliefs, our emotions and our perspectives. This book draws from personal experiences, culture, technology, genes, philosophy and attempts to reveal a path that systematically unveils the tools to understanding ourselves better and as a result unlock the potential deep within us. If we believe that the world is a dangerous place we may be more likely to interpret events in a negative way. Conversely if we believe that the world is a friendly place we may be more likely to interpret events in a positive way. By creating an awareness of how these perceptions of reality are influential and understanding how our minds work we can become more objective in our thinking and make better informed decisions. Technology growth has fueled our communications by helping us stay in touch with friends and family anywhere in the world, collaborate with colleagues, clients located anywhere in the world, provided accessibility to almost unlimited information and knowledge at the click of a few buttons, improved quality of life for people with disabilities, wearables to monitor our health and fitness. Despite all these life enriching experiences there is a deep sense of anxiety, fear and tension that is tied to newer innovations like Artificial Intelligence, AI and many other products. Embark on this unique transformational journey with author Rajeev Nalawadi to analyze from an engineer's perspective the concepts of I, Me, Mine, You in our lives. When we see ourselves as I, we are seeing ourselves as separate from the world around us. When we see ourselves as me, we are seeing ourselves as a collection of thoughts, feelings and experiences. When we see ourselves as mine, we are seeing ourselves as attached to things and people in the material world. When we see ourselves as you, we are seeing ourselves as connected to all other beings in the universe. How can we transform ourselves to chart life's journey to lead a more fulfilling life amidst the wave of breakneck speed innovations about to be introduced? Tapping into the field of all possibilities is within reach for all of us, it just needs to be explored the right way. Rather than being overwhelmed by the blast of technological innovations headed our way, we can use some techniques to manage our life's transformations in a way that can instill peace and calmness.
