The Decline Of Belgian Fertility 1800 197:

The Decline of Belgian Fertility, 1800-1970 Ron J. Lesthaeghe, 2015-03-08 Fertility in Belgium declined early and remained low compared with that in other European countries For this reason and because of the nation s heterogeneity study of its demographic transition illuminates the relationship between fertility behavior and socioeconomic development Professor Lesthaeghe first describes the Belgian experience in a way that permits direct comparison with that of other European nations He then tests the several explanatory hypotheses for the European fertility decline against his data Belgium s heterogeneity in the nineteenth century and in the first half of the twentieth was economic social and cultural Some areas of the country underwent industrialization as early as 1800 1830 while others shifted away from agriculture and artisanal modes of production only between 1880 and 1910 Between 1890 and 1900 regional fertility levels differed drastically as did regional infant mortality rates and life expectancies at birth In addition wide variation occurred in the process of secularization linguistic characteristics demographic trends and other cultural indicators By describing and analyzing these data in relation to Belgium s fertility decline Professor Lesthaeghe makes a major contribution to the theory of the demographic transition that occurred throughout Europe Originally published in 1978 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

From Provinces into Nations Susan Cotts Watkins, 2014-07-14 Between 1870 and 1960 national boundaries became more evident on the demographic map of Western Europe In most of the fifteen countries examined here differences in marital fertility illegitimacy and marriage from one province counties cantons arrondissements to another diminished considerably From Provinces into Nations describes this shift to greater national demographic homogeneity and places it in the context of a parallel decline in linguistic diversity as well as in the context of increases in national market integration the expansion of state activities and nation building The book interprets the shift as evidence of the influence of communities on demographic behavior and as an indication of the growing predominance of national over local communities The author uses demographic data too often the property of specialists to examine themes of interest to historians sociologists economists and political scientists interested in the integration of modern societies Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Cities and Economic Development Paul Bairoch, 1988 When and how were cities born Does urbanization foster innovation and economic development What was the level of urbanization in traditional societies Did the Industrial Revolution facilitate urbanization Has the growth of cities in the Third World been a handicap or an asset to economic development In this revised translation of *De J richo Mexico* Paul Bairoch seeks the answers to these questions and provides a comprehensive study of the evolution of the city and its relation to economic life Bairoch examines the development of cities from the dawn of urbanization Jericho to the explosive growth of the contemporary Third World city In particular he defines the roles of agriculture and industrialization in the rise of cities A hefty history from the Neolithic onward It s ambitious in scope and rich in subject detailing urbanization and of course the links between cities and economies Scholarly accessible and significant *Newsday* This book offers a path breaking synthesis of the vast literature on the history of urbanization *John C Brown Journal of Economic Literature* One leaves this volume with the feeling of positions intelligently argued and related to the existing state of theory and knowledge One also has the pleasure of reading a book unusually well written It will long both be a standard and stimulate new thought on the central issue of urban and economic growth *Thomas A Reiner Annals of the American Academy of Political and Social Science*
