The Defense Industry:

The Structure of the Defense Industry Nicole Ball, Milton Leitenberg, 2021-05-30 Proponents of arms control and disarmament are often confronted with the argument that reductions in defense expenditure lead to cutbacks in military industries and thus to economic hardship While a reduction in defense production would cause some economic dislocation this would be mitigated by the ability of the economy to adapt to changing patterns of production This book first published in 1983 assesses the likely effects of reductions in defense industries by an examination of the roles these industries play in national economies Each chapter discusses industry employment output research and development capital value profitability concentration and competition internal organization and regional employment concentration Other questions considered include the economic importance of weapons exports the defense industry as a leading edge in maintaining national technological capabilities and the reliance of individual firms on defense contracting *Military transformation and the defense industry after next the defense industrial implications of network-centric warfare* , **The Structure of the**

Military Transformation and the Defense Industry After Next: the Defense Industrial Implications of Network-Centric Warfare Peter J. Dombrowski,Eugene Gholz,Andrew L. Ross,Naval War College Press,2012-08-09 Though still adjusting to the end of the Cold War the defense industry is now confronted with the prospect of military transformation Since the terrorist attacks on 11 September 2001 many firms have seen business improve in response to the subsequent large increase in the defense budget But in the longer run the defense sector s military customers intend to reinvent themselves for a future that may require the acquisition of unfamiliar weapons and support systems Joint and service visions of the military after next raise serious questions that require the attention of the Defense Department s civilian and uniformed leadership and industry executives alike What are the defense industrial implications of military transformation Will military transformation lead to major changes in the composition of the defense industrial base This study employs network centric warfare a Navy transformation vision that is being adopted increasingly in the joint world as a vehicle for exploring the defense industrial implications of military transformation We focus on three defense industrial sectors shipbuilding unmanned vehicles and systems integration The transformation to NCW will require both sustaining and disruptive innovation that is innovation that improves performance measured by existing standards and innovation that defines new quality metrics for defense systems The dominant type of innovation needed to support transformation varies across industrial sectors some sectors face more sustaining than disruptive innovation while some sectors will need more disruptive than sustaining innovation as they supply systems for the Navy after Next Military transformation does not entail wholesale defense industrial transformation In the systems integrations sector much of the innovation required to effect networkcentric warfare is likely to be sustaining rather than disruptive In the parts of the defense industrial base that build platforms on the other hand the standards by which proposals are evaluated for the Navy after Next will be somewhat different than the standards used in the past As a result transformation could significantly change the industrial landscape of shipbuilding The unmanned vehicle sector falls somewhere in between because unmanned vehicles have not been acquired in quantity in the past their performance metrics are not well established Existing suppliers of unmanned vehicles will have a role in the future industry but some innovative concepts and technologies may come from nontraditional suppliers such as start up firms The U S Navy bears the responsibility of transforming itself Internally it must find ways to deconflict the needs of the current Navy and the Next Navy from the needs of the Navy after Next if industry is to support its long term transformation requirements Externally pervasive organizational and political obstacles to transformation require that the Navy carefully manage its relationships with Congress and industry Recognition that military transformation need not drive

Creating a 21st Century Defense Industry Panel on Business Challenges within the Defense Industry of the Committee on Armed Services House of Representatives, 2012-08-03 In our hearings on the issue we have heard from a variety of witnesses in the field and the Department of Defense about the current challenges and future projections regarding the United States defense industrial base The conversation thus far has been very informative as each and every person we meet with brings a unique perspective about how to learn from our past failures and establish stability in the industrial base Today we continue that dialogue by focusing on the future In doing so we are asking some very basic questions regarding a complex subject matter What can we do to adapt the current environment to meet the needs of the 21st century security strategy What can we learn from other nations who are implementing strategies that deal with this critical issue What changes are necessary in

our workforce and acquisition policies to meet that vision **Arming the Future** Ann R. Markusen, 1999 A Council on Foreign Relations book Cover **Insight Turkey 2020/03 - Transformation of Turkey's Defense Industry**, 2020-10-01

Turkey's contemporary defense and military strategy can be best understood as a result of the historical process the country has experienced. This historical process has significantly altered the security environment surrounding Turkey while transforming her alliance relations ultimately producing a new political vision for the country and a defense and military strategy that serves this vision. Firstly, although the end of the Cold War and the ensuing dissolution of the Soviet Union has ameliorated international security, Turkey was faced with both conventional and asymmetric threats on multiple fronts. This situation kept defense spending of the country at record levels despite military expenditures within NATO showing a rapid decline. On the other hand, the emerging political geography led to a series of new conflicts erupting in several hotspots from the Balkans through to the Caucasus and the Middle East. Emerging conflicts were thought to require a common response which precipitated NATO's evolution from a collective defense organization to a collective security organization. Concurrently, it meant that Turkey would actively join NATO's new missions ranging from the peaceful resolution of disputes to stability operations with expeditionary forces featured by mobility, jointness and readiness. Secondly, the 9/11 terrorist attacks against the U.S. created profound ramifications for Turkey's regional security and her alliance relations. In particular, the American military occupation of Iraq jeopardized Turkey's national security by effectively removing the political authority of that country and dismantling the Iraqi army. While the emerging political vacuum was filled by sectarian politics, the scarcity of security was exploited by the PKK consolidating its presence in northern Iraqi territories. Divided Iraq has also transformed into a breeding ground for international terrorism which resulted in the rise of various extremist armed organizations including ISIS. Thirdly, since the so-called Arab Spring started in the early 2010s, the political and security landscape of the Middle East and North Africa has undergone significant changes. While the overthrow of dictators led to intra-state conflicts in several places, it was particularly the civil war in Syria that alarmed Turkish decision makers due to its transformation into a safe haven for various terrorist groups operating at Turkey's southern frontiers. Bereft of concrete ally support, Turkey unilaterally launched military operations into northern Syria in order to eliminate ISIS elements as well as curbing the long-term territorial ambitions of the PKK. The Arab Spring has also aggravated previous tensions and engendered various factions that facilitated new alignments, which is the case for today's Eastern Mediterranean and Arab-Israeli relations. Against the backdrop of these considerations, Turkey's contemporary defense and military strategy has been formed. In general, this strategy lays down the principles of using military force to support the political aims of the country. It operates as a bridge between policy and operation in a classical sense. And that strategy is now not just informed by protecting the territorial integrity of the nation but has wider objectives including enhancing the country's international standing as well as achieving strategic autonomy. This in turn has necessitated new tools that extend beyond a sole deterrent force, namely military.

activism and defense industry investments along with the contribution to international security and commitments to the NATO alliance The summer issue of Insight Turkey aims to explain the changing dynamics of Turkey's military and defense strategy by taking into consideration current foreign and security policy practices of Turkey in the Middle East and North Africa region More specifically this issue is an attempt to develop a new framework to understand Turkey's revolution in its military and defense strategies Hulusi Akar the Minister of National Defense of Turkey in his commentary sheds light on the global and regional developments that threaten Turkey's peace and stability and which contributed to shaping its defense strategy A strategy that targets finding common solutions to international problems in a collaborative way Akar gives special attention to the contribution of the distinguished deterrent efficient motivated well trained and disciplined Armed Forces that are equipped with high level weaponry produced domestically using national resources Within the context of the Turkish Defense Industry's strong historical background Smail Demir highlights the transformation and rationality of the Turkish Defense Industry He emphasizes the necessity of addressing the recent rise of the Turkish Defense Industry in two different but interrelated periods The first provided the defense industry with strong support with an extremely decisive and long term projection The second represents the transformation of the expectations from the defense industry in coordination with the changing position and function of the defense industry in bureaucratic mechanisms Michael Tanchum's commentary is a coherent and rigorous analysis of the logical result of Turkey's post Cold War strategic reorientation presented in its new expeditionary capability of enhanced naval capacity and new forward bases Michael examines Ankara's challenge of calibrating the use of its hard power instruments to serve its post Lausanne strategic orientation toward establishing Turkey centered inter regional connectivity In the middle of the COVID 19 global pandemic Minister of Health of the Republic of Turkey Fahrettin Koca underscores the role of Turkey in the management of COVID 19 His commentary asserts that Turkey has successfully contained the COVID 19 pandemic and prevented devastating consequences due to its idiosyncratic approach to the crisis and the robustness of its healthcare system After 85 years as a museum Hagia Sophia welcomes Muslim worshippers a decision that has drawn intense criticism in Turkey and worldwide However Deputy Minister of Foreign Affairs of the Republic of Turkey Yavuz Selim Kalkan argues that the functional change of Hagia Sophia will not affect Turkey's centuries old tradition of promoting tolerance harmony and diversity The final off topic commentary of this issue underlines the challenges to Pakistan's nuclear threshold Muhammad Haris Bilal Malik and Muhammad Abbas Hassan explain why Pakistan has been further threatened by India's aggressive policies and provocative military modernization The commentary concludes that Pakistan may be compelled to further revisit its nuclear threshold level to overcome India's aggression Besides the commentaries this issue comprises five articles that focus on the Turkish Defense Industry past present and future and underline the factors that led to its remarkable evolution The first article by Murat Yetil presents a general framework of Turkey's Military and Defense Strategy By taking into account the main drivers primary objectives and

essential pillars as well as its tangible repercussions on the military mindset the author explains how the change in Turkey's defense and military strategy stems both from Turkey's changing security landscape and its quest to be an assertive regional player Can Kasapoğlu's research article covers two interrelated strategic topics regarding Turkey's national military capacity in the 21st century its defense technological and industrial base and its military policy both currently characterized by a burgeoning assertiveness In light of the rapid advances in technology that are continually shaping developments in the aerospace and defense sector notably the evolution of airpower Arda Mevlitoğlu provides us with an understanding of the features of the next generation of air warfare while presenting the status of the Turkish Air Force and offering suggestions on several challenges and opportunities As a reply to the critics that Turkey is caught between a rock and a hard place due to the adamant opposition of its NATO allies Mustafa Kibaroğlu tries to make sense of Turkey's S 400 choice by assessing the impact of the S 400 deal on Turkey's defense industries On one hand he presents his conception of the current international political non order as an underlying factor behind the deal On the other he suggests that the deal must be approached from a wider perspective to grasp the extent of the service it has done in bolstering Turkey's military industrial complex The last article related to the main theme of this issue focuses on Turkey's defense spending Merve Seren attempts to show that prioritization of defense spending during the AK Party era is specifically the outcome of a political preference In other words the shift in the political landscape from idealism to realism associated with pragmatism Our initial off topic article highlights how Trump's peace plan optimistically called the Deal of the Century adopts the Zionist discourse regarding al Aqsa and its effects on undermining the Muslim sovereignty over the mosque which will be a clear violation of the International law and status quo Khalid el Awaisi and Cuma Yavuz investigate the results of the implementation of Trump's plan which they assert will lead to three main changes that would undo the centuries old status quo of Masjid al Aqsa completely and give Israel full control over this important historic and religious site Ahmad AlShwawra and Ahmad Almuhtady's off topic article completes the dossier of this issue The authors examine the potential implications of Jordan's decision to import Mediterranean gas through Israel on Jordanian energy security with special attention to how this decision will impact Jordanian foreign policy regarding the Palestinian cause Through a wide range of articles and commentaries this issue aims to bring to its readers a comprehensive framework on the transformation of Turkey's Defense Industry and changing patterns of its military strategy

Panel on Business Challenges within the Defense Industry, 2012 Defense Industry Bulletin , 1971 The Economics of Defense Industry Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to

their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis *The Economics of the Global Defence Industry* Keith Hartley, Jean Belin, 2019-11-08 This book makes an original contribution to our knowledge of the world s major defence industries Experts from a wide range of different countries from the major economies of North America and Western Europe to developing economies and some unique cases such as China India Singapore South Africa and North Korea describe and analyse the structure conduct and performance of the defence industry in that country Each chapter opens with statistics on a key nation s defence spending its spending on defence R D and on procurement over the period 1980 to 2017 allowing for an analysis of industry changes following the end of the Cold War After the facts of each industry the authors describe and analyse the structure conduct and performance of the industry The analysis of structure includes discussions of entry conditions domestic monopoly oligopoly structures and opportunities for competition The section on conduct analyses price non price competition including private and state funded R D and performance incorporates profitability imports and exports together with spin offs and technical progress The conclusion explores the future prospects for each nation s defence industry Do defence industries have a future What might the future defence firm and industry look like in 50 years time This volume is a vital resource and reference for anyone interested in defence economics industrial economics international relations strategic studies and public procurement *Managing Change* Larry A. The Defense Industry Introduction

In today's digital age, the availability of The Defense Industry books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of The Defense Industry books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of The Defense Industry books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for

educational or professional purposes. By accessing The Defense Industry versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, The Defense Industry books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing The Defense Industry books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for The Defense Industry books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, The Defense Industry books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of The Defense Industry books and manuals for download and embark on your journey of knowledge?
