Hossain,2013-08-15 Following the acquisition of its sovereignty from the Netherlands in 1949 Indonesia experienced serious economic and political problems during the 1950s and 1960s before entering a three decade long period of rapid economic growth Hard hit by the financial crisis of the late 1990s Indonesia undertook a wide range of economic and financial reforms These reforms served to prepare it well for the 2007 08 global financial crisis through which Indonesia passed relatively unscathed Drawing on empirical research this book presents a comprehensive empirical study on the key macroeconomic relations and monetary policy issues in Indonesia The book analyses monetary fiscal and exchange rate policies looking at their interactions and impacts on the economy It demonstrates how important macroeconomic management for monetary and financial stability is to sustained national economic growth and development Data from the 1970s is compared and contrasted with 1950s data to analyse macroeconomic policies and issues in an historical context Statistical and econometric techniques are juxtaposed with general empirical results to supplement informative discussion of macroeconomic and monetary developments This book is a useful contribution to studies on macroeconomics and international development as well as Southeast Asian studies *Currency Use and Payment Patterns* W.C. Boeschoten,2012-12-06 Acknowledgements

The work underlying this study was performed at the Econometric and Special Studies Department of the Nederlandsche Bank where many contributed to it I am indebted to all the statistical assistants of the department especially to Anja Wouters and Rob Vet for their patient assistance in building up the data sets and analysing the survey data Also Corina den Broeder rendered devoted and persistent research assistance with respect to the multicountry analysis during her stay at the Bank and I am grateful to Mike Clements of the Bank of England for his careful reading and commenting on that part My colleagues Peter van Els and Carlo Winder made some valuable suggestions Liesbeth Klein and Coen Collee helped me avoid a number of errors in English and thanks to the skilful efforts of Marietta Bakker Gita Gajapersad and Carolien Verhoeven the text looks as it does Above all owe a debt of gratitude to Martin Fase one of the pioneers in this field of research for his efforts and contribution to the improvement of this study INTRODUCTION We seem to be well on the way to a cashless society Paradoxically however the majority of the transactions are still paid in cash even in the most advanced economies A second paradoxical observation is that despite the primary and common character of currency the economic theory on the use of and demand for cash is only rarely supported by empirical evidence *IMF Staff Papers, Volume 48, No. 2* International

Monetary Fund. Research Dept.,2001-12-12 This paper analyzes the link between product variety and economic growth It finds support for the hypothesis that a greater degree of product variety relative to the United States helps to explain relative per capita GDP levels The paper presents an empirical study for South Africa which indicates that there exists a stable money demand type of relationship among domestic prices broad money real income and interest rates as well as a long term relationship among domestic prices foreign prices and the nominal exchange rate

Essentials of Money, Banking and

Financial Institutions , Samuel K. Andoh,2014-10-15 The study of money banking and financial markets is a required or very popular elective in most undergraduate and graduate programs in economics and finance in Africa However the textbooks used are those written primarily for the developed world such as the United States or the U K The result is that students graduate with excellent theoretical knowledge about the subject matter as it pertains to the developed economies but lack the ability to apply the same knowledge to less developed economies Although the subject matter of money and banking can be treated at a theoretical level it is best done with institutions in mind As an application oriented course references and applications should as much as possible be to the conditions and institutions present in the environment where the subject is being studied and where the knowledge will be used rather than to institutions that exist elsewhere in developed economies The primary purpose of Essentials of Money Banking and Financial Institutions is to provide a text in money banking and financial institutions in the context of the developing economies especially Africa Throughout the book a deliberate effort will be made to focus the students attention on the need to develop the existing institutions so they can help to accelerate economic development

East European Transition and EU Enlargement Wojciech W.

Charemza,Krystyna Strzala,2012-12-06 In March 1998 the European Union formally launched the accession process that will lead to a significant enlargement of the Union So far ten countries from Central Europe Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania the Slovak Republic and Slovenia have submitted their applications for EU membership This unique process immediately attracted attention of economists and policy makers Nevertheless it can be noticed that among numerous results already published there is a distinctive shortage of books and papers in which quantitative research methods are applied This is to a large extent justified by the fact that the transition and accession processes are new to the economic sciences their methodology is not wellresearched statistical data for the Central and East European countries are scarce and not always reliable and generally quantitative approach seems to be a risky and uncertain business All these all problems can also be seen as a challenge rather than an obstacle With this on mind we have decided to clarify the status quo by organising a research seminar which focused on the methodology and quantitative analysis of the Central and East European transition and pre accession processes The seminar East European Transition and EU Enlargement a Quantitative Approach organised by Macroeconomic and Financial Data Centre University of Gdansk and University ofLeicester took place in Gdansk in June 2001 Our edited volume contains papers developed from this seminar

Testing Exogeneity Neil R. Ericsson, John S. Irons, 1994 This book discusses the nature of exogeneity a central concept in econometrics and shows how to test for it through numerous substantive empirical examples Part I considers what exogeneity is and how it can be tested Part II contains applications to models of expenditure money demand inflation wages and prices and exchange rates across both developed and developing countries Part III extends various tests of constancy and forecast accuracy which are central to testing super exogeneity The papers forming the core of this book from two special issues of the Journal of Policy Modeling provide a unique and unified perspective on applied econometric modelling in general and on exogeneity tests in particular The applications are substantive and diverse with a broad appeal to the applied economist Contributors H Ahumada G Bardsen J Campos M Deutsch R F Engle Neil R Ericsson C W J Granger B E Hansen David F Hendry J Hunter S Johansen K Juselius R Numoen Jean Francois Richard

Big Players and the Economic Theory of Expectations R. Koppl, 2002-06-19 Investment and all other economic actions depend on subjective expectations The problem is how to construct a theory of expectations that assumes people interpret their situations in unpredictable ways Building on the evolutionary economics of F A Hayek Koppl gives us such a theory This includes a theory of Big Players demonstrating that discretionary policy interventions create ignorance and uncertainty The volume uses innovative methods to address many vital problems in economic theory and connects with many other schools of economics including New Institutional Economics Constitutional Economics and Post Walsarian Economics
