theorizing but a formulation of design culture's fundamental core of ideas. These ideas, which form the design way, are applicable to an infinite variety of design domains, from such traditional fields as architecture and graphic design to such nontraditional design areas as organizational, educational, interaction, and healthcare design. The text of this second edition is accompanied by new detailed images, schemas that visualize, conceptualize, and structure the authors' understanding of design inquiry. The text itself has been revised and expanded throughout, in part in response to reader feedback.

The A to Z of the Fashion Industry Francesca Sterlacci, Joanne Arbuckle, 2009-10-26. The history of clothing begins with the origin of man, and fashionable dress can be traced as far back as 25,000 years ago. Recent scientific explorations have uncovered graves in northern Russia with skeletons covered in beads made of mammoth ivory that once adorned clothing made of animal skin. The Ancient Egyptians, Greeks, and Romans each made major contributions to fashion's legacy from their textile innovations, unique clothing designs, and their early use of accessories, cosmetics, and jewelry. During the Middle Ages, fashion trends emerged as trade and commerce thrived, allowing the merchant class to afford to emulate the fashions worn by royals. However, it is widely believed that fashion didn't become an industry until the industrial and commercial revolution during the latter part of the 18th century. Since then, the industry has grown exponentially. Today, fashion is one of the biggest businesses in the world, with hundreds of billions of dollars in turnover and employing tens of millions of workers. It is both a profession, an industry, and in the eyes of many, an art.

The A to Z of the Fashion Industry examines the origins and history of this billion-dollar industry. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced entries on designers, models, couture houses, significant articles of apparel, and fabrics, trade unions, and the international trade organizations.
