## **1. INTRODUCTION**

The word "democracy" is a term that comes from Greek and it is made up with two other words 'demos' which means 'People' and 'kratein' that can be translated as 'to govern or to rule.' In simple words we can say that a government which comes from the people, it is exercised by the people, and for the purpose of the people's own interests. (Paula Becker and Dr. Jean-Aimé A. Raveloson, what is democracy?) "

Development can be defined as the improvement in the quality of life, expansion of the infrastructure, positive changes in various aspects of life. It should be kept in mind that it is a multi-dimensional process.

There are countless debates among scholars over whether democracy drives development or development drives democracy. The first side argues that democracy is a precondition for development because of its accountability mechanism, open participation, checks and balances, rule of law, respects for human rights and good governance. (Humphrey N. Nwobashi, Democracy versus Development Debate) These scholars have put forth the empirical evidence which indicates that democracy has consistently out-performed non democracies in terms of indicators of socio-economic well being.

On the other hand, scholars have argued that development drives democracy. These scholars say that the economic development leads to political decay giving room for political instability which later moves toward democracy through and after institutionalization.

However, Democracy and development must be seen as intimately related functioning under similar constraints, and equally subject to political negotiation. (Niraja Gopal Jayal, The Governance Agenda Making Democratic Development Dispensable)

## **2. RELATIONSHIP BETWEEN DEMOCRACY AND DEVELOPMENT**

The debate arises from the question that does the existence of democratic institutions makes the development slow. It is because of the representation of the interests of various groups, communities, and sections. Niraja Jayal points out in her book "democracy in India" the fact about the 1950s Indian state that, "Without doubt, both development and democracy were integral to the modernizing project of the Indian state at independence."

During the 1960s and the 1970s, an argument that gained considerable prominence in mainstream academic and policy circles was that democracy was more likely to emerge in countries with higher levels of socio-economic development.

However the Indian experience suggests that the debate on democracy and development is misconceived. By positing democracy and development as mutually exclusive
