Bartholomew,Benjamin Radford,2011-11-08 History is replete with examples of media created scares and panics This book presents more than three dozen studies of media scares from the 17th century to the 21st century including hoaxes perpetrated via newspapers radio television and cyberspace From the 1835 batmen on the Moon hoax to more recent bird flu scares and Hurricane Katrina myths this book explores hoaxes that highlight the impact of the media on our lives and its tendency to sensationalize Most of the hoaxes covered occurred in the United States though incidents from Europe Asia Africa South America and Australia are featured as well Several are global in scope revealing the power global media wields **Bibliography of the History of Medicine** , White Market Drugs David Herzberg,2020-10-23 The contemporary opioid crisis is widely seen as new and unprecedented Not so It is merely the latest in a long series of drug crises stretching back over a century In White Market Drugs David Herzberg explores these crises and the drugs that fueled them from Bayer s Heroin to Purdue s OxyContin and all the drugs in between barbiturate goof balls amphetamine thrill pills the love drug Quaalude and more As Herzberg argues the vast majority of American experiences with drugs and addiction have taken place within what he calls white markets where legal drugs called medicines are sold to a largely white clientele These markets are widely acknowledged but no one has explained how they became so central to the medical system in a nation famous for its drug wars until now Drawing from federal state industry and medical archives alongside a wealth of published sources Herzberg re connects America s divided drug history telling the whole story for the first time He reveals that the driving question for policymakers has never been how to prohibit the use of addictive drugs but how to ensure their availability in medical contexts where profitability often outweighs public safety Access to white markets was thus a double edged sword for socially privileged consumers even as communities of color faced exclusion and punitive drug prohibition To counter this no win setup Herzberg advocates for a consumer protection approach that robustly regulates all drug markets to minimize risks while maintaining safe reliable access and treatment for people with addiction Accomplishing this requires rethinking a drug medicine divide born a century ago that unlike most policies of that racially segregated era has somehow survived relatively unscathed into the twenty first century By showing how the twenty first century opioid crisis is only the most recent in a long history of similar crises of addiction to pharmaceuticals Herzberg forces us to rethink our most basic ideas about drug policy and addiction itself ideas that have been failing us catastrophically for over a century **The Illustrated London News** ,1844 *The Secret Poisoner* Linda Stratmann,2016-03-22 This fine social history charts the changing patterns of using poison and the forensic methods developed to detect it in the Victorian Era The Guardian UK Murder by poison alarmed enthralled and in some ways even

defined the Victorian age Linda Stratmann's dark and splendid social history reveals the nineteenth century as a gruesome battleground where poisoners went head to head with scientific and legal authorities who strove to detect poisons control their availability and bring the guilty to justice Separating fact from Hollywood fiction Stratmann corrects many misconceptions about particular poisons and their deadly effects She also documents how the motives for poisoning which often involved domestic unhappiness evolved as marriage and child protection laws began to change Combining archival research with vivid storytelling Stratmann charts the era's inexorable rise of poison cases Maxwell's History of the World in 366 Lessons M.
