History Of Ships Handbook Peter Kemp, 2004-12 The ships of any age express the needs and ambitions of the people who build them They also reflect the state of technology at the time But the history of ships is not just a reflection of the history of man it is a complete and fascinating story in itself It began 5 000 years ago on the banks of the Nile with the funeral ship of a distant pharaoh At first ship propulsion was largely a matter of sweated labour but gradually the oared ship gave way to the sailing ship With progress in ship design voyages became longer and more adventurous The result was the discovery of new lands and an upsurge in maritime trade calling for new types of ship to carry and protect it Then in the 1880s seafaring was transformed by the twin revolutions of steam power and iron construction Today little more than half a century since the demise of the last great sail trading vessels we are in the age of the hovercraft container ship and nuclear submarine The scope of this book includes merchantmen and men of war ceremonial pleasure and working craft of all civilizations and all ages as well as the people who built and sailed them

Sailing Ships E. Keble Chatterton, 2017-10-26 Excerpt from *Sailing Ships The Story of Their Development From the Earliest Times to the Present Day* I trust that both the yachtsman and sailorman

will find in these pages something of the same exciting pleasure which has been mine in tracing the course of the evolutions through which their ships have passed Those whose work or amusement it is to acquaint themselves with the sailing ship and her ways and for lack of time and Opportunity are unable to seek out the noble pedigree of what Ruskin truly described as one of the loveliest things man ever made and one of the noblest may care to learn what were the changing conditions which combined to bring about such a highly complex creature as the modern sailing ship Perhaps at some time when handling a rope a spar a tiller or a sail they may have wondered how it all began what were the origins of all those various parts of a ships furniture why some essential portions have scarcely changed and how other portions are the outcome of time Experiment and science I hope that to neither the amateur nor the professional sailor I shall seem impertinent if I have attempted to tell them something about their ship which they did not know before But if on the other hand I shall have succeeded in increasing their love for the sailing ship by outlining her career I trust that this may be allowed to counterbalance the defects which in a subject of so vast a scope are hardly to be avoided in spite of considerable care and the generous assistance of many kind friends Finally I make my appeal to the younger generation to whom ships and the sea have in all times suggested so much that is bound up with adventure and brave deeds The present moment sees us at a stage in the history of ships when the Royal Navy as a whole and the Merchant Service almost entirely have no longer any convenience for sail There is a dire need in the latter for both officers and men whilst on shore the conditions of employment are exactly the reverse About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
