**A History of the Warfare of Science with Theology in Christendom** Andrew Dickson White, 1913 *A History of the Warfare of Science with Theology in Christendom* Andrew White, 2017-07-12 Given the powerful and forthright title of Andrew Dickson White's classic study it is best to make clear his own sense of the whole as given in the original 1896 edition. My conviction is that science though it has evidently conquered dogmatic theology based on biblical texts and ancient modes of thought will go hand in hand with religion and that although theological control will continue to diminish religion as seen in the recognition of a power in the universe not ourselves which makes for righteousness and in the love of God and of our neighbor will steadily grow stronger and stronger not only in the American institutions of learning but in the world at large. White began to assemble his magnum opus a two volume work first published in 1896 as *A History of the Warfare of Science with Theology in Christendom*. In correspondence he wrote that he intended the work to stake out a position between such religious orthodoxy as John Henry Newman's on one side and such secular scoffing as Robert Ingersoll's on the other. Historian Paul Carter declared that this book did as much as any other published work toward routing orthodoxy in the name of science. Insofar as science and religion came to be widely viewed as enemies with science holding the moral high ground White inadvertently became one of the most effective and influential advocates for unbelief. *A History Of The Warfare Of Science With Theology In Christendom* Andrew Dickson White, 2023 Andrew Dickson White a founding member of Cornell University released *A History of the Warfare of Science with Theology in Christendom* in two volumes in 1896. The original purpose of White's 1874 lecture on *The Battlefields of Science* is stated in the introduction. White expanded on this idea in a book titled *The Warfare of Science* that same year. He traces the growing separation of science from theology in numerous domains in these books. According to science historian Lawrence M Principe No credible historians of science now continue to support the warfare thesis. The foundations of the warfare thesis may be found in the writings of two persons John William Draper and Andrew Dickson White from the late 19th century. Scientists have known for years that White and Draper's claims are more propaganda than history according to science historian and atheist Ronald Numbers who wrote in a collection about errors committed by White and others. The battle paradigm was based on a terrible oversimplification that required all facets of the history of science and religion to fit into one ill chosen conceptual box. As a result many scholars ignored the vast amount of historical information that simply didn't fit into that box. **History of the Warfare of Science with Theology in Christendom** Andrew Dickson White, 1896-01-01 Among those masses of cathedral sculpture which preserve so much of medieval theology one frequently recurring group is noteworthy for its presentment of a time honoured doctrine regarding the origin of the universe. The Almighty in human form sits benignly making the sun moon and stars and hanging them from the solid firmament which supports the heaven above and overarches the earth beneath. The furrows of thought on the Creator's brow show that in this work he is obliged to contrive the knotted muscles upon his arms show that he is obliged

to toil naturally then the sculptors and painters of the medieval and early modern period frequently represented him as the writers whose conceptions they embodied had done as on the seventh day weary after thought and toil enjoying well earned repose and the plaudits of the hosts of heaven In these thought fossils of the cathedrals and in other revelations of the same idea through sculpture painting glass staining mosaic work and engraving during the Middle Ages and the two centuries following culminated a belief which had been developed through thousands of years and which has determined the world s thought until our own time Its beginnings lie far back in human history we find them among the early records of nearly all the great civilizations and they hold a most prominent place in the various sacred books of the world In nearly all of them is revealed the conception of a Creator of whom man is an imperfect image and who literally and directly created the visible universe with his hands and fingers Among these theories of especial interest to us are those which controlled theological thought in Chaldea The Assyrian inscriptions which have been recently recovered and given to the English speaking peoples by Layard George Smith Sayce and others show that in the ancient religions of Chaldea and Babylonia there was elaborated a narrative of the creation which in its most important features must have been the source of that in our own sacred books It has now become perfectly clear that from the same sources which inspired the accounts of the creation of the universe among the Chaldeo Babylonian the Assyrian the Phoenician and other ancient civilizations came the ideas which hold so prominent a place in the sacred books of the Hebrews In the two accounts imperfectly fused together in Genesis and also in the account of which we have indications in the book of Job and in the Proverbs there is presented often with the greatest sublimity the same early conception of the Creator and of the creation the conception so natural in the childhood of civilization of a Creator who is an enlarged human being working literally with his own hands and of a creation which is the work of his fingers To supplement this view there was developed the belief in this Creator as one who having from his ample palm Launched forth the rolling planets into space sits on high enthroned upon the circle of the heavens perpetually controlling and directing them

**A History of the Warfare of Science with Theology in Christendom** Andrew D. White, 2013-01-01 The battle between science and religion in American popular life is as old as America itself By the late 19th century it had reached a fever pitch culminating in the two volume 1896 work *A History of the Warfare of Science with Theology in Christendom* The result of thirty years of research by historian and educator ANDREW DICKSON WHITE 1832 1918 a founder of Cornell University this is White s attack on intellectually stifling religious dogma and his explication of the conflict thesis of outright warfare between science and religion While scholars today generally see the situation as more nuanced the conflict thesis remains a popular metaphor in the mind of the general public and White s work continues to speak to us today H L Mencken called this one of the noblest monuments of American scholarship and it will fascinate anyone who is troubled by the ongoing influence by religious authorities into secular science
