The House Of Zondervan

Daniel Silliman

The House Of Zondervan:

The House of Zondervan James E. Ruark, Jim Ruark, 2006 The inspiring story of the first seventy five years of Zondervan of the people and products and events that have made it one of the world's largest Christian publishing houses Above all the history of Zondervan is the story of lives reached and transformed by the grace and power of God *The House of Zondervan* James E. Ruark, Ted Wilhelm Engstrom, 1981 *Evangelicals Incorporated* Daniel Vaca, 2019-12-03 American evangelicalism is big business It is not Daniel Vaca argues just a type of conservative Protestantism that market forces have commodified Rather evangelicalism is an expressly commercial practice in which the faithful participate learn and develop religious identities by engaging corporations and commercial products *Reading Evangelicals* Daniel Silliman, 2021-10-05 The story of five best selling novels beloved by evangelicals the book industry they built and the collective imagination they shaped Who are evangelicals And what is evangelicalism Those attempting to answer these questions usually speak in terms of political and theological stances But those stances emerge from an evangelical world with its own institutions institutions that shape imagination as much as they shape ideology In this unique exploration of evangelical subculture Daniel Silliman shows readers how Christian fiction and the empire of Christian publishing and bookselling it helped build is key to understanding the formation of evangelical identity With a close look at five best selling novels *Love Comes Softly* *This Present Darkness* *Left Behind* *The Shunning* and *The Shack* Silliman considers what it was in these books that held such appeal and what effect their widespread popularity had on the evangelical imagination *Reading Evangelicals* ultimately makes the case that the worlds created in these novels reflected and shaped the world evangelicals saw themselves living in one in which romantic love intertwines with divine love humans play an active role in the cosmic contest between angels and demons and the material world is infused with the literal workings of God and Satan Silliman tells the story of how the Christian publishing industry marketed these ideas as much as they marketed books and how during the era of the Christian bookstore this every bit as much as politics or theology became a locus of evangelical identity *The Business Turn in American Religious History* Amanda Porterfield, Darren E. Grem, John Corrigan, 2017 Business has received little attention in American religious history although it has profound implications for understanding the sustained popularity and ongoing transformation of religion in the United States This volume offers a wide ranging exploration of the business aspects of American religious organizations The authors analyze the financing production marketing and distribution of religious goods and services and the role of wealth and economic organization in sustaining and even shaping worship charity philanthropy institutional growth and missionary work Treating religion and business holistically their essays show that American religious life has always been informed by business practices Laying the groundwork for further investigation the authors show how American business has functioned as a domain for achieving religious goals Indeed they find that religion has historically been more powerful when interwoven with business Chapters on Mormon enterprise Jewish philanthropy Hindu gurus Native

American casinos and the wedding of business wealth to conservative Catholic social teaching demonstrate the range of new studies stimulated by the business turn in American religious history Other chapters show how evangelicals joined neo liberal economic practice and right wing politics to religious fundamentalism to consolidate wealth and power and how they developed marketing campaigns and organizational strategies that transformed the American religious landscape Included are essays exposing the moral compromises religious organizations have made to succeed as centers of wealth and influence and the religious beliefs that rationalize and justify these compromises Still others examine the application of business practices as a means of sustaining religious institutions and expanding their reach and look at controversies over business practices within religious organizations and the adjustments such organizations have made in response Together the essays collected here offer new ways of conceptualizing the interdependence of religion and business in the United States establishing multiple paths for further study of their intertwined historical development
