The Kingdom Of Science Literary Utopianism And British Education 1612 187:

The Kingdom of Science Paul A. Olson, 2002-01-01 The Kingdom of Science examines Baconian utopias as blueprints for a scientific sociology of knowledge that founded a new social and economic world in the seventeenth century Looking backward Paul A Olson begins with More's Utopia and Shakespeare's The Tempest static state utopias designed to woo us toward a moral as opposed to a scientific reform To these Olson then contrasts the primary subjects of his study Bacon's New Atlantis the Commonwealth educational utopias and the utopianism of Adam Smith and his Utilitarian followers These later utopias increasingly point to an ideal world to be dominated by a science linked to technology compelled education and competitive capitalism They posit as their end the conquest of nature and use as their means the routinizing of research and education Their visions Olson argues lie at the center of the educational models adopted by mainstream British and American policymakers in the last century and a half despite the warnings of both conservative and radical critics concerning their potential consequences for the environment and for culture The challenge Olson presents for those responsible for forging our social future is creating visions sufficient to energize human groups while allowing both for the critical reflection necessary for constructive policy debate and for the action necessary to prevent environmental chaos and cultural disruption The Kingdom of Science is a companion to Olson's earlier book The Journey to Wisdom and carries the assumptions of that patristic medieval study into the early modern and modern periods [The Eighteenth Century](#) American Society for Eighteenth-Century Studies, Jim Springer Borck, 2006-12 This 17th volume from the series of bibliographies of the 18th century is divided into sections on printing and bibliographic studies historical social and economic studies philosophy science and religion the fine arts literary studies and individual authors *Bibliographic Guide to Education 2003* GK Hall, 2004-10 The Bibliographic Guide to Education lists recent publications cataloged during the past year by Teachers College Columbia University supplemented by publications in the field of education cataloged by The Research Libraries of The New York Public Library selected on the basis of subject headings Non book materials including theses are included in this Guide with the exception of serials All aspects and levels of education are represented in this Guide including such areas as American elementary and secondary education higher and adult education early childhood education history and philosophy of education applied pedagogy international and comparative education educational administration education of the culturally disadvantaged and physically handicapped nursing education and education of minorities and women Also well covered are the administrative reports of departments of education for various countries and for U S states and large cities The Teachers College collection covers over 200 distinct educational systems Works in all languages are included The Bibliographic Guide to Education serves in part as an annual supplement to the Dictionary Catalog of the Teachers College Library Columbia University G K Hall Second Supplement 1973 Third Supplement 1977 **Arts & Humanities Citation Index**, 1975 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the

world's leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals Utopian Literature and Science Patrick Parrinder, 2015-08-11 Scientific progress is usually seen as a precondition of modern utopias but science and utopia are frequently at odds Ranging from Galileo's observations with the telescope to current ideas of the post human and the human animal boundary this study brings a fresh perspective to the paradoxes of utopian thinking since Plato **Science in Utopia** Nell Eurich, 1967 □□□□□□□□□□□□
