The twelve lays of the mysterious medieval poet Marie de France are here presented in sprightly English verse by poet and translator David R Slavitt Traditional Breton folktales were the raw material for Marie de France's series of lively but profound considerations of love life death fidelity and betrayal and luck and fate They offer acute observations about the choices that women make startling in the late twelfth century and challenging even today Combining a keen wit with an impressive technical bravura the lays are a minor treasure of European culture It was with some shame that he explained how in the wood he lived on whatever prey he could capture and kill She digested this and then inquired of him what his costume

was in these bizarre forays Lady werewolves are completely naked was his reply She laughed at this I can't guess why and asked him where he hid his clothes to make conversation I suppose *The Lais of Marie de France* Marie (de France), 2003

Marie de France and the Poetics of Memory Logan E. Whalen, 2008 Marie de France and the Poetics of Memory presents the first exhaustive treatment of the rhetorical use of description and memory in all the narrative works of the late 12th century poet Marie de France the first woman to compose literary texts in French *A Companion to Marie de France* Logan Whalen, 2011-05-10 Presenting traditional views alongside new critical approaches the chapters in this book present fresh perspectives on the poetics of the 12th century author Marie de France the first woman of letters to write in French

Howard Bloch, 2011-04-29 This book by one of our most admired and influential medievalists offers a fundamental reconception of the person generally assumed to be the first woman writer in French the author known as Marie de France The Anonymous Marie de France is the first work to consider all of the writing ascribed to Marie including her famous Lais her 103 animal fables and the earliest vernacular Saint Patrick's Purgatory Evidence about Marie de France's life is so meager that we know next to nothing about her not where she was born and to what rank who her parents were whether she was married or single where she lived and might have traveled whether she dwelled in cloister or at court nor whether in England or France In the face of this great writer's near anonymity scholars have assumed her to be a simple naive and modest Christian figure Bloch's claim in contrast is that Marie is among the most self conscious sophisticated complicated and disturbing figures of her time the Joyce of the twelfth century At a moment of great historical turning the so called Renaissance of the twelfth century Marie was both a disrupter of prevailing cultural values and a founder of new ones Her works Bloch argues reveal an author obsessed by writing by memory and by translation and acutely aware not only of her role in the preservation of cultural memory but of the transforming psychological social and political effects of writing within an oral tradition Marie's intervention lies in her obsession with the

performative capacities of literature and in her acute awareness of the role of the subject in interpreting his or her own world According to Bloch Marie develops a theology of language in the *Lais* which emphasize the impossibility of living in the flesh along with a social vision of feudalism in decline She elaborates an ethics of language in the *Fables* which within the context of the court of Henry II frame and form the urban values and legal institutions of the Anglo Norman world And in her *Espurgatoire* she produces a startling examination of the afterlife which Bloch links to the English conquest and occupation of medieval Ireland With a penetrating glimpse into works such as these The Anonymous Marie de France recovers the central achievements of one of the most pivotal figures in French literature It is a study that will be of enormous value to medievalists literary scholars historians of France and anyone interested in the advent of female authorship **Marie de France** Sharon Kinoshita, Peggy McCracken, 2012 Marie de France is the author of some of the most important and influential works of the French Middle Ages the *Lais* her best known work the *Ysop* a translation from the Aesopic tradition and the *Espurgatoire* saint Patriz St Patrick's Purgatory Taking Marie less as a biographical subject than as author of these three texts this Companion rethinks standard questions of interpretation through a variety of perspectives that highlight both the unity of Marie's oeuvre and the distinctiveness of the individual works attributed to her name Page 4 of cover *The Feminist Encyclopedia of French Literature* Eva M. Sartori, 1999-07-30 The earliest known literary productions by women living in Europe were probably written by French writers As early as the 12th century women troubadours in the south of France were writing poems French women continued writing through the ages their number increasing as education became more available to women of all classes And yet of the great number of works by women writers who preceded the current feminist movement very few have survived A few writers such as Marie de France George Sand and Simone de Beauvoir became part of the canon But critics mostly male had judged the works of only a few women writers worthy of recognition As part of the feminist move to reclaim women writers and to rethink literary history scholars in French literature began to take a new look at women writers who had been popular during their lifetimes but who had not been admitted into the canon This reference book provides extensive information about French women writers and the world in which they lived Included are several hundred alphabetically arranged entries for authors literary genres such as the novel poetry and the short story literary movements such as classicism realism and surrealism life cycle events particular to women such as menstruation and menopause events and institutions which affected women differently than men such as revolutions wars and laws on marriage divorce and education The volume spans French literature from the Middle Ages to the present and covers those writers who lived and worked mainly in France The entries are written by expert contributors and each includes bibliographical information The entries focus on each writer's awareness of how her gender shaped her outlook and opportunities on how categorizations structures and terms used to describe literary works have been defined for women and the ways in which women writers have responded to these definitions The volume begins with a feminist history of French

literature and concludes with a selected general bibliography and a chronology of women writers

Knighthood and Society in the High Middle Ages David Crouch, Jeroen Deploige, 2020-11-30 In popular imagination few phenomena are as strongly associated with medieval society as knighthood and chivalry At the same time and due to a long tradition of differing national perspectives and ideological assumptions few phenomena have continued to be the object of so much academic debate In this volume leading scholars explore various aspects of knightly identity taking into account both commonalities and particularities across Western Europe Knighthood and Society in the High Middle Ages addresses how between the eleventh and the early thirteenth centuries knighthood evolved from a set of skills and a lifestyle that was typical of an emerging elite habitus into the basis of a consciously expressed and idealised chivalric code of conduct Chivalry then appears in this volume as the result of a process of noble identity formation in which some five key factors are distinguished knightly practices lineage crusading memories gender roles and chivalric didactics

Wales and the Medieval Colonial Imagination M. Faletra, 2014-07-24 Focusing on works by some of the major literary figures of the period Faletra argues that the legendary history of Britain that flourished in medieval chronicles and Arthurian romances traces its origins to twelfth century Anglo Norman colonial interest in Wales and the Welsh

[The Power of a Woman's Voice in Medieval and Early Modern Literatures](#) Albrecht Classen, 2012-02-13 The study takes the received view among scholars that women in the Middle Ages were faced with sustained misogyny and that their voices were seldom heard in public and subjects it to a critical analysis The ten chapters deal with various aspects of the question and the voices of a variety of authors both female and male are heard The study opens with an enquiry into violence against women including in texts by male writers Hartmann von Aue Gottfried von Straßburg Wolfram von Eschenbach which indeed describe instances of violence but adopt an extremely critical stance towards them It then proceeds to show how women were able to develop an independent identity in various genres and could present themselves as authorities in the public eye Mystic texts by Hildegard of Bingen Marie de France and Margery Kempe the medieval conduct poem known as Die Winsbeckin the Devout Books of Sisters composed in convents in South West Germany but also quasi historical documents such as the memoirs of Helene Kottaner or Anna Weckerin's cookery book demonstrate that far more women were in the public gaze than had hitherto been assumed and that they possessed the self confidence to establish their positions with their intellectual and their literary achievements

The Song of Roland, 2015-08-06 On 15 August 778 Charlemagne's army was returning from a successful expedition against Saracen Spain when its rearguard was ambushed in a remote Pyrenean pass Out of this skirmish arose a stirring tale of war which was recorded in the oldest extant epic poem in French The Song of Roland written by an unknown poet tells of Charlemagne's warrior nephew Lord of the Breton Marches who valiantly leads his men into battle against the Saracens but dies in the massacre defiant to the end In majestic verses the battle becomes a symbolic struggle between Christianity and paganism while Roland's last stand is the ultimate expression of honour and feudal values of twelfth century France

Metamorphoses of the Werewolf Leslie A. Sconduto, 2014-01-10 The mythical werewolf is known for its sudden transformation under the full moon but the creature also underwent a narrative evolution through the centuries from bloodthirsty creature to hero Beginning with The Epic of Gilgamesh Ovid's *Metamorphoses* and an account in Petronius' *Satyricon* the book analyzes the context that created the traditional image of the werewolf as a savage beast The Catholic Church's response to the popular belief in werewolves and medieval literature's sympathetic depiction of the werewolf as victim are presented to support the idea of the werewolf as a complex and varied cultural symbol Instructors considering this book for use in a course may request an examination copy here

Reinventing Babel in Medieval French Emma

Campbell, 2023-09-09 How can untranslatability help us to think about the historical as well as the cultural and linguistic dimensions of translation For the past two centuries theoretical debates about translation have responded to the idea that translation overcomes linguistic and cultural incommensurability while never inscribing full equivalence More recently untranslatability has been foregrounded in projects at the intersections between translation studies and other disciplines notably philosophy and comparative literature The critical turn to untranslatability re-emphasizes the importance of translation's negotiation with foreignness or difference and prompts further reflection on how that might be understood historically philosophically and ethically If translation never replicates a source exactly what does it mean to communicate some elements and not others What or who determines what is translatable or what can or cannot be recontextualized What linguistic political cultural or historical factors condition such determinations Central to these questions is the way translation negotiates with and inscribes asymmetries among languages and cultures operations that are inevitably ethical and political as well as linguistic This book explores how approaching questions of translatability and untranslatability through premodern texts and languages can inform broader interdisciplinary conversations about translation as a concept and a practice Working with case studies drawn from the francophone cultures of Flanders England and northern France it explores how medieval texts challenge modern definitions of language text and translation and in so doing how such texts can open sites of variance and non-identity within what later became the hegemonic global languages we know today
