The Land And People Of Central America:

The Land and People of Central America Ruth Karen, 1972 An introduction to the seven countries of Central America including a discussion of the people and culture of the Mayan empire **The Land and People of Central America** Ruth Karen, 1965 Central America Gerard Colvin, 1964 **The Earth and Its Inhabitants ...: Mexico, Central America, West Indies** Elisée Reclus, 1891 **Regions and trade** Joseph Russell Smith, 1922 **Civil Judgment Recognition and the Integration of Multiple-state Associations** Robert C. Casad, 1981 This book represents a prodigious study of judgment recognition practices in the Central American states and is for that reason alone an important and needed contribution to comparative law Distinguished legal scholar Robert C Casad details the history and present arrangements in Central America compares the Central American system to interstate judgment recognition arrangements in the U S and the European Economic Community and considers important suggestions for reform in Central America This book brings together for the first time in one source translated into English the texts of the relevant code provisions of each of the six Central American countries as well as the text of the Bustamante Code the multi lateral treaty and the European Economic Community judgment recognition convention **The States of Central America** Ephraim George Squier, 1858 **Central America's Indians** David Stephen, Phillip Wearne, 1984-04-01 In Latin America today we find one of the largest remnants of colonialism in the world The concept Indian itself is of course a European invention which served the colonizers well for reducing the varied and numerous cultures and societies which existed in the 16th century to an undifferentiated mass of subordinate and exploitable natives To put it succinctly this has traditionally been a relationship of oppression and exploitation of the Indians by the European settlers and their descendants the principal mechanisms of which has been the agrarian structure By depriving the Indian communities of their own land base and therefore of their economic self sufficiency the colonial and national governments and more particularly the ruling landowning classes created for themselves an almost inexhaustible cheap and subordinate labour supply Rebellious groups were pushed into the marginal fringes of jungles and inaccessible mountains or simply repressed through military might This basic system of economic exploitation which has a number of regional and local variants has been upheld over the centuries by a supporting structure of political power social constraints and ideological justification which has placed the Indians at the bottom of the social hierarchy and outside the mainstream of what has come to be known as national culture Economically subordinate politically powerless and culturally isolated from the national decision making centres the native population of Latin America has become a marginalized underclass of rural proletarians exiles in their own countries discriminated against by the dominant Spanish speaking population even in such countries as Guatemala Bolivia Peru and Ecuador where they represent at least half of the total population Please note that the terminology in the fields of minority rights and indigenous peoples rights has changed over time MRG strives to reflect these changes as well as respect the right to self identification on the part of minorities and

indigenous peoples At the same time after over 50 years work we know that our archive is of considerable interest to activists and researchers Therefore we make available as much of our back catalogue as possible while being aware that the language used may not reflect current thinking on these issues

I Am Destroying The Land! Susan C Stonich, 2021-01-07 This book is about interconnections those among the historical geographic demographic social economic and ecological aspects of development as well as how Central Americans struggle with the interplay of increasing poverty and environmental degradation Centering on the case of southern Honduras and expanding to include the Central American region Susan Stonich's analysis employs an integrative approach that builds on a strong and varied methodological foundation to encompass both political economy and ecology Stonich examines the systemic linkages among the dynamics of dominant development models and associated patterns of capitalist accumulation regional demography rural impoverishment and environmental decline By casting the discussion against the backdrop of southern Honduras she presents a powerful historical record of how larger socio political communities impact individuals and the natural environment and how in turn people respond She charts the destiny of peasant groups within the dynamics of contemporary capitalism recognizing that the fates of the peasantry and the natural environment are intimately linked Stonich's study contributes to an improved understanding of the complex interrelationships between social processes and environmental degradation offering a timely and pertinent comment on one of the most serious modern challenges
