Landscapes Maggie Roe, Ken Taylor, 2014-01-21 While historical and protected landscapes have been well studied for years

the cultural significance of ordinary landscapes is now increasingly recognised This groundbreaking book discusses how contemporary cultural landscapes can be and are created and recognised The book challenges common concepts of cultural landscapes as protected or special landscapes that include significant buildings or features Using case studies from around the world it questions the usual measures of judgement related to cultural landscapes and instead focuses on landscapes that are created planned or simply evolve as a result of changing human cultures management policy and practice Each contribution analyses the geographical and human background of the landscape and policies and management strategies that impact upon it and defines the meanings of cultural landscape in its particular context Taken together they establish a new paradigm in the study of landscapes in all forms

The History of the Countryside Oliver Rackham,2000 A tribute to Britain s countryside and how it developed over the centuries Going right up to the present day and including both natural and man made features it demonstrates the ways in which people flora fauna climate soils and other physical conditions have played a role in shaping the landscape Quirky and rewarding full of answers to questions that others have not had the wit to ask Economist No one would be wise to write further on our natural history without thinking very hard about what is contained in these authoritative pages Country Life

The Languages of Landscape ,1997 **British rural landscapes on film** Paul Newland,2016-09-01 British rural landscapes on film offers insights into how rural areas in Britain have been represented on film from the silent era through both world wars and on into the twenty first century It is the first book to exclusively deal with representations of the British countryside on film The contributors demonstrate that the countryside has provided Britain and its constituent nations and regions with a dense range of spaces in which cultural identities have been and continue to be worked through British rural landscapes on film demonstrates that British cinema provides numerous examples of how national identity and the identity of the countryside have been partly constructed through filmic representation and how British rural films can allow us to further understand the relationship between the cultural identities of specific areas of Britain and the landscapes they inhabit

The Peopling of Britain Paul Slack,Ryk Ward,2002-03-07 This volume reviews the way in which over the centuries the evolving human presence in Britain has shaped the British landscape and how in turn the British landscape has moulded the development of British communities From the beginnings of human settlement Britain has represented a final frontier for successive waves of colonists each bringing its own set of cultural adaptations and its own ethos into the landscape Over time both landscape and culture have matured from raw frontier to settled centre moulded by the advent of agriculture towns and industry and by streams of migration both within Britain and from outside The chapters in this book by archaeologists historians and geographers present an interdisciplinary and accessible account of that long process Together they trace the various phases of the story showing how much of it has only recently been unearthed and how much remains to be discovered
