## **The Last Little Citadel American High Schools Since 1940 Study Of High Schools:**

**The Last Little Citadel** Robert L. Hampel, National Association of Secondary School Principals (U.S.), National Association of Independent Schools. Commission on Educational Issues, 1986 Describes the sweeping transformation of secondary school education that has occurred over the past forty five years an essential background for understanding the high school today

The Failed Promise of the American High School, 1890-1995 David L. Angus, Jeffrey Mirel, 1999 This provocative new study of the American high school examines the historical debates about curriculum policy and also traces changes in the institution itself as evidenced by what students actually studied Contrary to conventional accounts the authors argue that beginning in the 1930s American high schools shifted from institutions primarily concerned with academic and vocational education to institutions mainly focused on custodial care of adolescents Claiming that these changes reflected educators racial class and gender biases the authors offer original suggestions for policy adjustments that may lead to greater educational equality for our ever growing and ever more diverse population of students

**New Perspectives on the History of the Twentieth-Century American High School** Kyle P. Steele, 2021-11-07 The growth of the American high school that occurred in the twentieth century is among the most remarkable educational social and cultural phenomena of the twentieth century The history of education however has often reduced the institution to its educational function alone thus missing its significantly broader importance As a corrective this collection of essays serves four ends as an introduction to the history of the high school as a reevaluation of the power of narratives that privilege the perspective of school leaders and the curriculum as a glimpse into the worlds created by students and their communities and most critically as a means of sparking conversations about where we might look next for stories worth telling

**Paul Diederich and the Progressive American High School** Robert L. Hampel, 2014-04-01 Paul Diederich worked in five new organizations dedicated to transforming American schools the Ohio State University lab school the Eight Year Study a Harvard institute to revamp English language instruction the University of Chicago's Board of Examiners and the Educational Testing Service Throughout his career he wrote critiques of American high schools and set forth many proposals to make them more flexible without sacrificing academic excellence This anthology resurrects 14 Diederich essays eight of them never before published The scope ranges from visions of social justice to the details of the daily schedule Like his heroes Benjamin Franklin and Thomas Jefferson he combined a passion for utopian speculation with a fascination for practical problems a combination that is rare in the world of school reform today

**The Last Little Citadel** Robert L. Hampel, 1986

**Leadership Challenges in High Schools** W. Norton Grubb, 2015-12-03 Principals are responsible for an increasing range of duties in an era of school reform standardized testing and more These responsibilities are even greater in high schools which are many times larger and more complex than elementary and middle schools Yet little has been written on the special challenges of high schools and their leadership This book fills the gap by exploring the challenges specific to high schools including their size and

complexity the special difficulties in improving instruction the crucial role of high schools for students futures adolescent behavioral issues and many more Grubb shows how principals and other leaders can address the complexities of multiple pathways or efforts to create theme based trajectories through high school one of the most promising high school reforms Looking to the future he offers alternative ways of preparing professionals for high schools and the responsibilities of districts for improving high schools and their leadership *Prioritizing Urban Children, Teachers, and Schools through Professional Development Schools* Pia Lindquist Wong, Ronald David Glass, 2009-03-17 How can we better educate disadvantaged urban students Drawing on over five years experience in a broad partnership involving twelve urban professional development schools in five districts a teachers union a comprehensive public university and several community based organizations the contributors to this volume describe how they worked together to help disadvantaged urban students through an innovative professional development program By networking with educators at different levels and coordinating curriculum projects they were able to begin overcoming rigid and ineffective mandates and curricula tied to standardized test scores and get through to their students on more meaningful and productive levels The contributors share their successes and failures with these efforts as well as insights related to the ethical political and academic challenges faced by professional development schools *The Other Struggle for Equal Schools* Rubén Donato, 1997-01-01 Examining the Mexican American struggle for equal education during the 1960s and 1970s in the Southwest in general and in a California community in particular Donato challenges conventional wisdom that Mexican Americans were passive victims accepting their educational fates He looks at how Mexican American parents confronted the relative tranquility of school governance how educators responded to increasing numbers of Mexican Americans in schools how school officials viewed problems faced by Mexican American children and why educators chose specific remedies Finally he examines how federal state and local educational policies corresponded with the desires of the Mexican American community **The Comprehensive Public High School** G. Sherington, Craig Campbell, 2006-02-04 This book traces the decline of the public comprehensive high school New educational markets emphasized school diversity and parental choice rather than social equity through common schooling and they were criticized for declining standards The book also considers government education policies and their regional manifestations **Handbook of Research in Social Studies Education** Linda S. Levstik, Cynthia A. Tyson, 2010-04-15 Introduction Linda L Levstik and Cynthia A Tyson Change and continuity in social studies curriculum Stephen J Thornton Early elementary social studies Jere Brophy and Janet Alleman What happens in social studies classrooms research on K 12 Classroom practice Linda S Levstik Knowing and doing in democratic citizenship education Walter C Parker International political socialization research Carole L Hahn and Theresa Alviar Martin Service learning Rahima Wade Controversial issues and democratic discourse Diana Hess Diversity and citizenship education historical theoretical and philosophical issues James A Banks and Nguyen Diem Social justice and the social studies Kathy Bickmore Gender and

Seeking Common Ground David B. Tyack, 2003 The American republic will survive only if its citizens are educated this was an article of faith of its founders But seeking common civic ground in public schools has never been easy in a society where schoolchildren followed different religions adhered to different cultural traditions spoke many languages and were identified as members of different races In this wise and enlightening book filled with vivid characters and memorable incidents that make history but don't always make history books David Tyack describes how each American generation grappled with the knotty task of creating political unity and social diversity Seeking Common Ground illuminates puzzles about democracy in education and chronic conflicts that continue to make new Americans mistrust government yet they entrusted the civic education of their children to public schools American history textbooks were notoriously dull but they were also highly controversial Although the people liked local control of schools educational experts called it democracy gone to seed and campaigned to take the schools out of politics Reformers argued about whether it was more democratic to teach all students the same subjects or to tailor curriculum to individuals And what was the best way to Americanize immigrants asked educators by forced federal assimilation or by honoring their ethnic heritages With a broad perspective and an eye for telling detail Tyack lets us see that debates about the civic purposes of schools are an essential part of a democratic culture and integral to its future

The History of "Zero Tolerance" in American Public Schooling J. Kafka, 2011-11-16 Through a case study of the Los Angeles city school district from the 1950s through the 1970s Judith Kafka explores the intersection of race politics and the bureaucratic organization of schooling Kafka argues that control over discipline became increasingly centralized in the second half of the twentieth century in response to pressures exerted by teachers parents students principals and local politicians often at different historical moments and for different purposes Kafka demonstrates that the racial inequities produced by today's school discipline policies were not inevitable nor are they immutable

*Whose Keeper?* Alan Wolfe, 2023-11-10 *Whose Keeper* is a profound and creative treatise on modernity and its challenge to social science Alan Wolfe argues that modern liberal democracies such as the United States and Scandinavia have broken with traditional sources of morality and instead have relied upon economic and political frameworks to define their obligations to one another Wolfe calls for reinvigorating a sense of community and thus a sense of obligation to the larger society This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to

1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 The Rise and Fall of an Urban School System Jeffrey Mirel,1999 The updated edition of the difficulties faced by the Detroit public schools and the historical reasons that led to the present situation

**Lessons from Privilege** Arthur G. Powell,1996 In this book a renowned historian of education searches out the lessons that private schooling might offer public education as cries for school reform grow louder Arthur Powell uses the experience of private education to put the whole schooling enterprise in fresh perspective He shows how the sense of schools as special communities can help instill passion and commitment in teachers administrators and students alike and how passion and commitment are absolutely necessary for educational success The power of economic resources invested fully in schools also becomes pointedly clear here as does the value of incentives for teachers and students The Last Little Citadel Robert L. Hampel,National Association of Secondary School Principals (U.S.),National Association of Independent Schools. Commission on Educational Issues,1986 Describes the sweeping transformation of secondary school education that has occurred over the past forty five years an essential background for understanding the high school today **Children of the Mill** Ronald D. Cohen,2014-05 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **The Social Economics of Poverty** Christopher B. Barrett,2006-10-03 A unique analysis of the moral and social dimensions of microeconomic behaviour in developing countries this book calls into question standard notions of rationality and many of the assumptions of neo classical economics and shows how these are inappropriate in communities with widespread disparity in incomes This book will prove to be essential for students studying development economics Education and Social Change John L. Rury,2015-07-24 This brief interpretive history of American schooling focuses on the evolving relationship between education and social change Like its predecessors this new edition adopts a thematic approach investigating the impact of social forces such as industrialization urbanization immigration globalization and cultural conflict on the development of schools and other educational institutions It also examines the various ways that schools have contributed to social change particularly in enhancing the status and accomplishments of certain social groups and not others Detailed accounts of the experiences of women and minority groups in American history consider how their lives have been affected by education while Focal Point sections within each chapter allow the reader to hone in on key moments in history and their relevance within the broader scope of American schooling from the colonial era to the present This new edition has been comprehensively updated and edited for greater readability and clarity It offers a revised final chapter updated to include recent change in education politics and policy in particular the decline of No Child Left Behind and the impact of the Common Core and movements against it Further additions include enhanced coverage of colonial and early post colonial American schooling added materials on persistent issues such as race in education an updated discussion of the GED program and a closer look at the role of technology in schools With its nuanced treatment of both historical and

contemporary factors influencing the modern school system this book remains an excellent resource for investigating and critiquing the social economic and cultural development of American education      **The Schoolroom** Dale Allen Gyure, 2018-07-26 This book examines schoolrooms and their material contents to reveal insights into the evolution of education and the translation of educational theories and cultural ideals into practice School attendance is nearly universal in our society yet very little is known about the history of the classrooms we occupy and the objects we encounter and use in our educational lives Why are our school classrooms designed as they are When was the blackboard invented When did computers start appearing in schools Through analysis of classrooms and objects within them The Schoolroom A Social History of Teaching and Learning details the history of American education describing how architects in collaboration with educators have shaped learning spaces in response to curricular and pedagogical changes population shifts cultural expectations and concern for children s health and well being It illustrates connections between form and function showing how a well designed school building can encourage learning and reveals little known histories of ubiquitous educational objects such as blackboards desks and computers
