also made relatively new diesels redundant Each BR standard locomotive type is described in its own chapter The performance of each class is given its rightful emphasis The book is comprehensively illustrated with largely unpublished pictures that cover a wide range of locations and locomotive duties *Australia's Last Steam Railways* John Woodhams,2024-08-15 Rare and previously unpublished images illustrate the story of the last commercial steam working in Australia which was active until 1987 *The Great Eastern Railway - From the Grouping to the Elizabeth Line 1923-2023* Charles Phillips,2025-03-06 Explores the transformation of the Great Eastern Section from a backwater to a modernized railway hub from 1923 to 2023 This book is the sequel to the author s two previous volumes on the history of the Great Eastern covering the Early Years from 1811 to 1862 and the Late 19th Century and early 20th Century from 1862 to 1924 This book cover the years 1923 to 2023 describes how the Great Eastern Section of the London and North Eastern Railway was transformed from being something of a backwater during the inter war years to being very much at the forefront of modernisation under British Railways Within the book will be found how the Great Eastern Section coped with the threat of road competition during the inter war years its involvement in the Second World War and how under British Railways it came to be seen the epitome of modernisation beginning with the arrival of the Britannia Class locomotives in 1951 and culminating the complete elimination of steam power in the East of England at the end of 1963 The book describes the impact of the Beeching Report on the former Great Eastern It chronicles the progress of the Section s through the electrification of its two main lines and the construction and opening of the Elizabeth Line Preservation is also mentioned as are possible future developments It is book for anyone who is interested in the history of the railways of the East of England railways in general and the history of the East of England *The Last Steam Locomotive of British Railways* P.
