The Concept Of Language:

<u>The Meaning of Language, second edition</u> Heidi Savage,Melissa Ebbers,Robert M. Martin,2020-01-21 A new edition of a comprehensive introduction to the philosophy of language substantially updated and reorganized The philosophy of language aims to answer a broad range of questions about the nature of language including what is a language and what is the source of meaning This accessible comprehensive introduction to the philosophy of language begins with the most basic properties of language and only then proceeds to the phenomenon of meaning The second edition has been significantly expanded and reorganized putting the original content in a contemporary context and offering substantial new material with extended discussions and entirely new chapters After establishing the basics the book discusses general criteria for an adequate theory of meaning takes a first pass at describing meaning at an abstract level and distinguishes between meaning and other related phenomena Building on this the book then addresses various specific theories of meaning beginning with early foundational theories and proceeding to more contemporary ones New to this edition are expanded discussions of Chomsky s work and compositional semantics among other topics and new chapters on such subjects as propositions Montague grammar and contemporary theories of language Each chapter has technical terms in bold followed by definitions and offers a list of main points and suggested further readings The book is suitable for use in undergraduate courses in philosophy and linguistics Some background in philosophy is assumed but knowledge of philosophy of language is not necessary   **The Concept of Sentence and Meaning** Sarath P. Nath,2025-03-19 Definition and sense of the meaning were a great concern for the Indian thinkers In order to finalize this they have examined all the components of a communicative unit such as syllables words sentences and intentions of the speakers After this examination different philosophers specifically M m sakas Naiy yikas and bdikas have arrived at the conclusion that sentence is an essential component to convey the sense of meaning to the listener The theory of akha av kya is based on the indivisible spho a theory and the sentence meaning is experienced by the concept of pratibh The division of sentence as per the priority of words occurred on the basis of mutual expectancy by which the intended meaning may be assumed by the listener The V kyapad ya of Bhart hari sixth century is a text which elaborately explains the notions on sentence The book systematically presents the philosophical dimensions of grammatical units The author has attempted to present the philosophy of language in a Bhart harian perspective To substantiate his views syntactic and semantic thoughts in India are elaborately discussed Though the significance of the work can only be understood by those scholars who are well versed in Hel r ja and Pu yar ja it will undoubtedly remain an asset to the field of grammatical deliberations   **The Meaning of Language** Hans Götzsche,2018-11-07 The Meaning of Language illustrates the diversity of approaches in linguistics The volume revolves around two main chapters authored by two internationally acknowledged Scandinavian scholars Hans Basb ll and Stig Eliasson Basb ll s contribution is the most detailed and coherent English language presentation of the pioneering Danish 18th century linguist Jens Pedersen H ysgaard and his work and Eliasson

explores the intricacy of the issue of whether morphology can be borrowed between languages and the mechanisms of actual borrowings The other contributions illustrate which topics may be taken up by language scholars today from metaphor regional phonology morphology and syntax language learning discourse analysis intensifier semantics and Indo European to the interface between language and logic The approaches invoke a wide spectrum of theoretical models and assumptions

Understanding the Language Classroom S. Gieve,I. Miller,2005-11-30 The starting point for this collection is a chapter by Dick Allwright on the language learning and teaching classroom experience entitled Six Promising Directions in Applied Linguistics The other distinguished contributors respond to this discussion with their own interpretations and from their own experience The collection problematizes prescription efficiency and technical solutions as orientations to classroom language learning Complexity and idiosyncrasy on the other hand are recognized as central concepts in a move towards centralizing teachers and learners own understanding of classroom life in the contexts of language learning adult literacy education and language teacher education *The Spirit of Language in Civilization* Karl Vossler,1932 *Language and Its Functions* Pieter Adrianus Verburg,1998-01-01 When Pieter Verburg 1905 1989 published Taal en Functionaliteit in 1952 the work was received with admiration by linguistic scholars though the number of those who could read the Dutch text for themselves remained limited The title alludes to the theories of linguistic function set out in 1936 by Karl B hler but Verburg regards the three functions of discourse focussing respectively on the speaker the person addressed and the matter discussed as no more than sub functions of the human function of speech His central concern is to explore the relationships between thought and language and language and reality and the work sets out to provide a historical analysis of views on these relationships in the period 1100 to 1800 The great strength of the work lies in the way in which the views of language are related to contemporaneous moves in philosophy and science contrasting essentially the mediaeval acceptance of authority the beginnings of induction in the Renaissance the dependence of early rationalism on calculation based on axiomatic truths and the further development of independent observation All these trends are reflected in the way men thought about language as well as in the way they used it Much has been written on the history of linguistics since this book was written but it still offers a unique view of the development of thinking about language *Modern Poetry and the Idea of Language* Gerald L. Bruns,2001 Gerald Bruns s ground breaking analysis compares two contrasting functions of language the hermetic where language is self contained and self referencing and the Orphic which originates from a belief in the mythical unity of word and being Bruns lucidly depicts the distinctions and convergences between these two lines of thought by examining the works of Mallarme Flaubert Joyce Beckett and others *The Concept of Language* Neil Leslie Wilson,1959

Towards a Holistic Understanding of Language Contact in the Past Nikolaos Lavidas,Ioanna Sitaridou,Igor Yanovich,2025-10-06 The tendency to view grammar in isolation from multilingual settings is so pervasive that even modern approaches do not often overcome the monolingual paradigm At the same time the effects of language contact very clearly

manifest themselves as discussed in the literature on language contact contact induced and shared grammaticalization sometimes resulting in areal patterns particularly relevant for linguistic typology It appears that there continues to be an important gap between the fact of commonly happening grammatical transfer in language contact and our theorizing about such grammars This gap needs to be narrowed and eventually closed for the sake of both theories of grammar and theories of language contact In fact one can take this further and ask the question Do we really need a separate theory of language contact The rather attractive alternative would be to reduce the effects of language contact to theories of language acquisition sociolinguistics external factors as well as more generalised cognitive mechanisms such as copy and analogy which once properly interwoven they can offer holistic explanations The aim of the edited volume is to contribute to this and other related questions **Language, Form(s) of Life, and Logic** Christian Martin,2018-09-10 This volume deals with the connection between thinking and speaking and our form s of life All contributions engage with Wittgenstein s approach to this topic As a whole the volume takes a stance against both biological and ethnological interpretations of the notion form of life and seeks to promote a broadly logico linguistic understanding instead The structure of this book is threefold Part one focuses on lines of thinking that lead from Wittgenstein s earlier thought to the concept of form of life in his later work Contributions to part two examine the concrete philosophical function of this notion as well as the ways in which it differs from cognate concepts Contributions to part three put Wittgenstein s notion of form of life in perspective by relating it to phenomenology ordinary language philosophy and problems in contemporary analytic philosophy **Language and Mental Development** Pierre Oléron,2021-09-17 Originally published in 1977 this book considers the role language plays in psychological development It tries to avoid general discussions of language and thought an approach already sufficiently developed by philosophers and although somewhat less by psychologists Instead it attempts to focus specifically upon what we can learn about the topic from available research findings at the time Theoretical considerations are developed only when necessary to clarify an issue or to facilitate the integration of presented material The aim of the work is simple to share with the reader the author s thoughts and understanding of available knowledge of the role of language in mental development

Acquisition Christina E. Erneling,1993-07-01 How is language acquisition possible How is it that humans within a few years of birth can speak and understand language transcending both its limited experience and biological limitations In this challenge to the narrow confines of psychology and philosophy Christina Erneling argues that language acquisition results from the interaction between linguistic creativity inherent in language and a biological and social framework of learning Erneling explains and critically analyzes the idea that language acquisition requires a meaningful language of thought contrasting this with Wittgenstein s ideas on language and learning Erneling shows that the assumptions in J Fodor s development of Chomky s ideas into a theory of language of thought have significantly influenced developmental theories yet fail to resolve the conflict between linguistic creativity and the necessity of a framework for learning She argues that the later Wittgenstein was more concerned with the conditions of learning than is generally appreciated and shows how his remarks can be developed into an alternative approach to language learning Understanding Language Acquisition has profound implications for evaluating hidden metatheoretical assumptions as well as for empirical research and methods for teaching language and treating language disorders **Conceptual Metaphors as an Organisational Framework of the Specialist Language of IT** Magdalena Krawiec,2022-06-13 Magdalena Krawiec provides insight into the underlying conceptual structure of information technology and gives a plausible account of the patterns of metaphorical conceptualisation manifested in the specialist language of IT Conceptual metaphors map our concrete experience onto abstract experiences so as to effortlessly get hold of new emergent concepts On the one hand our ability to make our world thinkable rests on the use of our past experiences whereas on the other hand IT specialists familiarise themselves with yet unknown conceptual structures through the interaction with the specialist scenery Specialists thinkability of the specialist surroundings is grounded in their perception of similarity which enables them to adapt both conceptually and linguistically to their specialist practice Status and Function of Languages and Language Varieties Ulrich Ammon,2012-06-25 No detailed description available for Status and Function of Languages and Language Varieties **History of the Language Sciences / Geschichte der Sprachwissenschaften / Histoire des sciences du langage. 2. Teilband** Sylvain Auroux,E.F.K. Koerner,Hans-Josef Niederehe,Kees Versteegh,2008-07-14 Volume 2 treats in great detail and at times quite innovatively the individual stages of development of the study of language as an autonomous discipline from the growing awareness in 17th and 18th century Europe of genetic relationships among a host of languages to the establishment of comparative historical Indo European linguistics in the 19th century from the generation of the Schlegels Bopp Rask and Grimm to the Neogrammarians and the application of the comparative method to non Indo European languages from all over the globe Typological linguistic interests first synthesized by Humboldt as well as the development of various other non historical endeavours in the 19th and the first half of the 20th century such as language and psychology semantics phonetics and dialectology receive ample attention **The Limits of Language and the Search for Understanding in Artificial**

Intelligence Peter Pink-Howitt,2023-12-21 The development of artificial intelligence AI has led to remarkable advances in natural language processing NLP enabling machines to process human language with increasing sophistication While this progress holds extraordinary promise for various applications it also raises profound philosophical questions about meaning sentience and understanding within language games This paper delves into the intricate relationship and interplay between AI language and meaning It explores some of the philosophical underpinnings of language examining how AI systems can extract translate and manipulate semantically sensible content It also investigates a few of the challenges of developing AI systems with the ability to understand meaningful language that goes beyond surface semantic and syntactic proficiency The paper addresses the wider limits of logic and language for humans as well as for digital intelligence By examining some of the philosophical and practical dimensions of meaning in AI NLP and LLM The paper also seeks to encourage greater humility in how Homo sapiens define and approach the concept of intelligence The author deprecates our historic excessive interspecies exceptionalism The author makes no claims of original thoughts or research in the fields of philosophy of language linguistics or the development of more generally applicable AI The paper is intended to help specify the key issues using ordinary human readable language and to understand some of the main conceptual issues involved in the development of artificial general intelligence AGI Images stated as being by the author have been created using generative AI image creation tools AI tools have also been used to advise on improvements to structure and on content
