

# Consumer goods in the soviet economy

- The Russian Revolution led to the rapid industrialization of the previously agrarian Russian economy & this made the economy lag behind in the output of light industrial production & consumer durables.
- In the early years, wages were rising & priorities were shifting from consumer to producer goods which resulted in inflation. After WWII, wages were better controlled and consumer goods output was increased.
- The stagnation in the 70's & 80's led to expectations of increased role for consumer goods in the soviet.
- But despite a greater emphasis on light industry and efforts to restructure the entire planning and production systems, the results were not heartening as was seen in the chronic shortage that would grip the entire economy.
