Pieter Bruegel the Elder Todd M. Richardson, 2017-07-05 *Pieter Bruegel the Elder Art Discourse in the Sixteenth Century Netherlands* examines the later images by Bruegel in the context of two contemporary discourses art theoretical and convivial The first concerns the purely visual interactions between artists and artistic practices that unfold in pictures which often transgress the categorical boundaries modern scholars place on their work such as sacred and profane antique and modern and Italian and Northern In this context the images themselves those of Bruegel his contemporaries and predecessors make up the primary source material from which the author argues The second deals with the dialogue that occurred between viewers in front of pictures and the way in which pictorial strategies facilitated their visual experience and challenged their analytical capabilities In this regard the author expands his base of primary sources to include convivial texts dialogues and correspondences and texts by rhetoricians and Northern humanists addressing art theoretical issues Challenging the conventional wisdom that the artist eschewed Italianate influences this study demonstrates how Bruegel's later peasant paintings reveal a complicated artistic dialogue in which visual concepts and pictorial motifs from Italian and classical ideas are employed for a subject that was increasingly recognized in the sixteenth century as a specifically Northern phenomenon Similar to the Dutch rhetorician societies and French Pléiade poets who cultivated the vernacular language using classical Latin the function of this inter pictorial discourse the author argues was not simply to imitate international trends a common practice during the period but to use it to cultivate his own visual vernacular language Although the focus is primarily on Bruegel's later work the author's conclusions are applied to sketch a broader understanding of both the artist himself and the vibrant artistic dialogue

Reading Architectural History Dana Arnold, 2003-09-02 Architectural history is more than just the study of buildings Architecture of the past and present remains an essential emblem of a distinctive social system and set of cultural values and as a result it has been the subject of study of a variety of disciplines But what is architectural history and how should we read it *Reading Architectural History* examines the historiographic and socio cultural implications of the mapping of British architectural history with particular reference to eighteenth and nineteenth century Britain Discursive essays consider a range of writings from biographical and social histories to visual surveys and guidebooks to examine the narrative structures of histories of architecture and their impact on perception and understanding of the architecture of the past Alongside this each chapter cites canonical histories juxtaposed with a range of social and cultural theorists to reveal that these writings are richer than we have perhaps recognised and that architectural production in this period can be interrogated in the same way as that from more recent past and can be read in a variety of ways The essays and texts combine to form an essential course reader for methods and critical approaches to architectural history and more generally as examples of the kind of evidence used in the formation of architectural histories while also offering a thematic introduction to architecture in Britain and its social and cultural meaning

Dance, Spectacle, and the Body Politick, 1250-1750 Jennifer Nevile, 2008-06-25 From the mid 13th to the mid 18th century the ability to dance was an important social skill for both men and women Dance performances were an integral part of court ceremonies and festivals and in the 17th and 18th centuries of commercial theatrical productions Whether at court or in the public theater danced spectacles were multimedia events that required close collaboration among artists musicians designers engineers and architects as well as choreographers In order to fully understand these practices it is necessary to move beyond a consideration of dance alone and to examine it in its social context This original collection brings together the work of 12 scholars from the disciplines of dance and music history Their work presents a picture of dance in society from the late medieval period to the middle of the 18th century and demonstrates how dance practices during this period participated in the intellectual artistic and political cultures of their day

"Architects, Angels, Activists and the City of Bath, 1765-1965" Cynthia Imogen Hammond, 2017-07-05 A unique contribution to the architectural and social history of Bath Architects Angels Activists and the City of Bath 1765-1965 Engaging with Women's Spatial Interventions in Buildings and Landscape approaches the past with the methods of the architectural historian and the site specific interventions of the contemporary artist Looking beyond and behind Bath's strategic marshalling of its past Cynthia Imogen Hammond presents the ways in which women across classes shaped the built environment and designed landscapes of one of England's most architecturally significant cities This study argues that Bath's efforts to preserve itself as an idealized Georgian town reveal an aesthetics of exclusion Jane Austen may be well known but the role of historic women in the creation of this city has had minimal treatment within the city's collective public memory This book is an intervention into this memory the author uses site specific works of public art as

strategic counterparts to her historical readings Through them she aims to transform as well as critique the urban image of Bath At once a performative literature an extensively researched history and an alternative guide to the city Architects Angels Activists engages with current struggles over urban signification in Bath and beyond

Modernism and the Mediterranean Jan K. Birksted, 2017-07-05 Situated in a Mediterranean landscape the Maeght Foundation is a unique Modernist museum product of an extraordinary collaboration between the architect Jos uis Sert and the artists whose work was to be displayed there The architecture garden design and art offer a rare opportunity to see work in settings conceived in active collaboration with the artists themselves By focusing on the relationship between this art foundation and its Arcadian setting including Joan Mir labyrinth George Braque s pool Tal Coat s mosaic wall and Giacometti s terrace Jan K Birksted demonstrates how the building articulates many of the ideas that preoccupied this group of artists during the culminating years of their lives The study pays special attention to the ways in which architecture can shape the experience of time and addresses the Modernist desire for wilderness and its problematic roots in the classical Mediterranean ideal In showing how the design of the Maeght Foundation is a Modernist representation of Mediterranean culture the author has developed an interpretation of architecture that accommodates not only the architect s handling of material or function but shows as well how it can be the embodiment of a particular vision of space and time

The Emerald City and Other Essays on the Architectural Imagination Daniel Willis,1999 In The Emerald City Dan Willis takes us on a flight of imagination that paradoxically never strays far from the most tangible even intimate subjects His essays range from the Tower of Babel to the Wizard of Oz from Christo to Christmas trees from the lightness of being to the weight of architecture This ultimately

optimistic book suggests that architecture is as vital as ever It is tempting to say that our present cultural situation has rendered architecture nearly impossible if not unnecessary But it is also possible to look to what our lives at the turn of the millennium typically lack fulfillment spirituality a sense of belonging weight and to conclude that the ground for architecture has never been more fertile The texts intelligent and readable draw equally from literary sources architectural practice philosophical analyses pop culture and everyday experiences Willis s perspective as a writer architect artist and teacher informs his work his texts are at once reflective and proactive as they challenge readers to rethink their participation in the built environment Accompanying the text are the author s original illustrations which link the forms and forces surrounding architecture at the end of the twentieth century in novel thought provoking ways [The Oxford Handbook of Contemporary Buddhism](#) Michael K.
