Europe Second Edition presents the latest update on the only primary source of complete and comparative baseline data on the biological and hydrological characteristics of more than 180 of the highest profile rivers in Europe With even more full color photographs and maps the book includes conservation information on current patterns of river use and the extent to which human society has exploited and impacted them Each chapter includes up to 10 featured rivers with detailed information on their physiography hydrology ecology biodiversity and human impacts Rivers selected for specific coverage include the largest the most natural and those most affected by humans This book provides the most comprehensive information ecologists and conservation managers need to better assess their management and meet the EU legislative good governance targets Includes comparison photos of rivers along with information on the history and management of each river Presents summary information on hydrological ecological and freshwater biodiversity patterns and trends of each river Highlights environmental issues of great importance to citizens and governments including fragmentation by dams pollution introduction of nonnative species and reductions in biodiversity    **American Book Publishing Record** ,2004    [The Lower Danube River](#) Abdelazim Negm,Liliana Zaharia,Gabriela Ioana-Toroimac,2022-06-14 This book provides essential information and recent findings on hydro environmental issues in the Lower Danube River particularly its hydrological and hydromorphological processes physico chemical features climate and water related hazards and not only the biodiversity and quality but also the sustainable management and governance of its hydro environment Accordingly it presents a broad range of scientific information on the lower sector of the second longest river in Europe which holds major economic importance and has been severely impacted by human pressures especially since the second part of the last century The engineering works e g dams reservoirs levees channelization etc on the Danube and its tributaries despite their benefits to society have altered its flow and significantly reduced its sediment load with consequences for hydromorphological processes and aquatic ecosystems These ecosystems have also been affected by pollution from various sources To promote sustainable management of the Danube River and its watershed several strategies and measures have been developed by a number of institutions from the European level to the national and regional levels commissions national authorities non governmental organizations etc Compared to the upper and middle sectors of the Danube the lower sector has received less attention in the international scientific literature in terms of hydro environmental issues The book fills this gap and provides current and original insights and findings from recent studies conducted by scientists from three countries drained by the Lower Danube River and its tributaries Bulgaria Romania and Serbia This unique book will be of great scientific interest to professional engineers policy planners and policymakers in the three countries mentioned above helping them to implement their own sustainable development plans It also offers a valuable resource for graduate students researchers and stakeholders    *Facing Global Environmental Change* Hans Günter Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Úrsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be

described as the year when climate change finally received the attention that this challenge deserves globally. Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth Assessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media. This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large. The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore. By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world.

*Hydropolitical Vulnerability and Resilience Along International Waters*, 2009. The hydro vulnerability of Europe is governed by the institutions created to resolve transboundary water issues in a cooperative manner that attempts to prevent potential conflict. Institutional capacity through water management bodies treaties or generally positive international relations is possibly more important than the physical environment for minimising hydropolitical vulnerability and conflict on the one hand and strengthening resilience and cooperation on the other hand. This publication aims at a broader promotion and dissemination of assessed information and data that can support informed policy making.

**An Introduction to European Intergovernmental Organizations** Marc Cogen, 2016-04-15. An Introduction to European Intergovernmental Organizations provides an up to date and accessible reference to European intergovernmental organizations other than the European Union. The EU is so dominant that people often overlook the multitude of older and newer smaller and larger intergovernmental organizations rooted in the history of contemporary Europe which continue to help shape its future. The specialized character of these organizations adds value to cooperation in Europe as a whole creates permanent channels of communication regardless of EU membership and allows the possibility for non European involvement through organizations such as the European Bank for Reconstruction and Development and NATO. It also allows sub regional groups of states such as the Nordic countries or the Benelux countries to exist and express their own identity via their own

organizations This book looks at the history of Non EU organizations their decision making characteristics membership policies legal powers actions and interactions with each other and the European Union A uniform scheme of analysis is used to make European intergovernmental organizations comparable and by studying them we gain a deeper understanding and insight into European affairs   **Implementing Transboundary Water Agreements** Alistair Rieu-Clarke,2025-04-09

Interdisciplinary and international in scope this detailed book examines the types of compliance and implementation mechanisms that can support transboundary water cooperation By drawing upon a range of theoretical accounts case studies from the Danube Orange Senqu and Mekong rivers and treaty practice the book offers practical insights into how these mechanisms can be incorporated into transboundary water agreements   **Large Rivers** Avijit Gupta,2022-05-02 An
